Rethinking International Relations Theory Martin Griffiths, 2011-03-02 International Relations IR theory has seen a proliferation of competing and increasingly trenchant worldviews with no consensus on how to evaluate their relative strengths and weakness This innovative new text provides an original interpretation of how best to navigate the clash of perspectives in contemporary IR theory The book provides a systematic overview of the main worldviews such as realism liberalism and constructivism and their associated theoretical underpinnings Placing liberal internationalism at the heart of the debate it argues that the main division in IR theory is between liberal internationalism and its critics Griffiths examines both the strengths and weaknesses of liberal internationalism as a worldview and also explores the competing worldviews that have been generated by the perceived flaws of this perspective Examination of crucial policy issues is incorporated throughout the text restoring the relevance of theory for those who wish to understand those policy issues Moreover this book revitalises the *raison d'être* of contemporary IR theory and shows the role it can play in making sense of the twenty first century

Creating European Citizens

Willem Maas, 2007-02-03 Exploring a key aspect of European integration this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU Governments around the world traditionally distinguish insiders citizens from outsiders foreigners Yet over the past half century an extensive set of supranational rights has been created in Europe that removes member governments authority to privilege their own citizens a hallmark of sovereignty The culmination of supranational rights European citizenship not only provides individuals with choices about where to live and work but also forces governments to respect those choices Explaining this innovation why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including foreigners Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights Imagining more than simply a free trade market the goal of building a broader and deeper community among peoples with a destiny henceforward shared creating European citizens has informed European integration since its origins The author argues that its success or failure will not only determine the future of Europe but will also provide lessons for political integration elsewhere

Williams, 1998 Francisco Gomez de Sandoval Duke of Lerma 1553-1625 is the last major unknown statesman in modern European history Patrick Williams brings him dramatically to life and challenges the assumptions that historians have made about him and about Spanish history at a time of profound crisis inviting a re-evaluation of the phenomenon of government by favourites in this seminal period of European history Lerma served Philip III as his favourite and first minister between 1598 and 1618 His power dazzled contemporaries one petitioner telling Philip that he had come to see him because I could not get an appointment with the Duke of Lerma Within a decade of assuming office Lerma had raised his family from humiliating poverty to great riches and was the greatest patron of the arts in Europe His use of power provoked intense debate about the nature of corruption in government Yet Lerma remained deeply ambivalent about his position Determined to follow family tradition and retire into religious life to secure the salvation of his soul he secured a cardinalate in 1617 ending his life as a prince of the Church

Williams, 1995 It has

become a truism to say that the security agenda for the 1990s cannot be the same as that which prevailed during the Long Peace of the period 1945-1990. This book addresses the changed security situation in Europe. It attempts to elucidate what it means to be a European by focusing on fears for a collective future and on proposals to improve it. It demonstrates that a European-wide consensus is emerging that needs to be fully absorbed by the institutional structures that attempt to direct security matters on the Continent.

The first part covers international law, war, human rights, and humanitarianism. The second part looks at the new human rights regime, the responsibility to protect, the ethics of war, and global justice. Each chapter includes annotated reading lists highlighting directions you can take to further your reading. *International Society, Global Polity* is perfect for students taking courses on International Political Theory, International Theory, Global Ethics, and Global Justice.

The Human Right to Development in a Globalized World Daniel Aguirre, 2021-12-16. Offering a comprehensive analysis of the human right to development and its realistic application in an era of economic globalization, Daniel Aguirre provides a multidisciplinary overview of economic globalization and examines its challenges to the realization of human development. He takes this further by engaging with these challenges and highlighting the human rights opportunities presented by economic globalization and the international investment system. The volume proposes a triadic system of responsibility for human rights in development to include mapping the overlapping human rights responsibilities of corporations at the micro level, of states at the macro level, and of the international community at the meso level. The scope of the book is broad, and the approach to the subject is new. It will generate interest across many disciplines, including political science, international law, and economics. Activists, academics, and development practitioners in many fields should also read this book.
