Politics Planning And The Public Interest:

Politics, Planning, and the Public Interest Martin Meyerson, Edward C. Banfield, 1955 **Politics, Planning, and the Public Interest** Edward Christie Banfield, 1972 **The Promised Land** Nicholas Lemann, 2011-08-24 A New York Times bestseller the groundbreaking authoritative history of the migration of African Americans from the rural South to the urban North A definitive book on American history The Promised Land is also essential reading for educators and policymakers at both national and local levels **American Political Scientists** Glenn H. Utter, Charles Lockhart, 2002-10-30 This dictionary offers the only comprehensive collection of profiles of American political scientists each of whom contributed significantly to the intellectual development of American political science from its beginnings in the late 19th century to the present This second edition includes 22 new and 110 revised entries reflecting new scholarship that emerged during the 1990s Numerous experts helped the editors develop this consensus group of the 193 political scientists who have made the most important theoretical contributions over the years with attention to varied approaches and the different subfields Alphabetically arranged entries focus on the main ideas and major works by each scholar listing list the most important publications by and about the individual There are numerous cross references to show how the work of one scholar has influenced another in the discipline Appendices list the political scientists by degree granting institutions and by major fields A short bibliography points to important general readings about the profession A general index makes this major reference easily accessible for broad interdisciplinary research **The Oxford Handbook of Urban Planning** Randall Crane, Rachel Weber, 2012-05-24 Why plan How and what do we plan Who plans for whom These three questions are then applied across three major topics in planning States Markets and the Provision of Social Goods The Methods and Substance of Planning and Agency Implementation and Decision Making **Politics, Planning and Housing Supply in Australia, England and Hong Kong** Nicole Gurran, Nick Gallent, Rebecca L.H. Chiu, 2016-07-15 In recent years many nations have asked why not enough housing is being built or when it is built why it isn't of the highest quality or in the best most sustainable locations Politics Planning and Housing Supply in Australia England and Hong Kong examines the politics and planning of new homes in three very different settings but with shared political traditions in Australia in England and in Hong Kong It investigates the power relationships and politics that underpin the allocation of land for large scale residential schemes and the processes and politics that lead to particular development outcomes Using a comparative framework it asks how different systems of urban governance and planning mediate the supply of land for housing whether and how these system differences influence the location quantity and price of residential land and the implications for housing outcomes what can be learned from these different systems for allocating land building consensus between different stakeholders and delivering a steady supply of high quality and well located homes accessible to and appropriate for diverse housing needs This book frames each case study in a comprehensive examination of national and territorial frameworks before dissecting

key local cases These local cases urban renewal and greenfield growth centres in Australia new towns and strategic sites in England and major development schemes in Hong Kong explore how broader urban planning and housing policy goals play out at the local level While the book highlights a number of potential strategies for improving planning and housing delivery processes the real challenge is to give voice to a broader array of interests reconstituting the political process surrounding planning and housing development to prioritise homes in well planned places for the many rather than simply facilitating investment opportunities for the few

Politics, Planning and Homes in a World City Duncan Bowie, 2010-02-25 This is an insightful study of spatial planning and housing strategy in London focusing on the period 2000 2008 and the Mayoralty of Ken Livingstone Duncan Bowie presents a detailed analysis of the development of Livingstone s policies and their consequences Examining the theory and practice of spatial planning at a metropolitan level Bowie examines the relationships between planning the residential development market and affordable housing environmental economic and equity objectives national regional and local planning agencies and their policies It places Livingstone s Mayoralty within its historical context and looks forward to the different challenges faced by Livingstone s successors in a radically changed political and economic climate Clear and engaging this critical analysis provides a valuable resource for academics and their students as well as planning housing and development professionals It is essential reading for anyone interested in politics and social change in a leading world city and provides a base for parallel studies of other major metropolitan regions

The Birth of City Planning in the United States, 1840-1917 Jon A. Peterson, 2003-09-10 Publisher Description

Blueprint for Disaster D. Bradford Hunt, 2009-08-01 Now considered a dysfunctional mess Chicago s public housing projects once had long waiting lists of would be residents hoping to leave the slums behind So what went wrong To answer this complicated question D Bradford Hunt traces public housing s history in Chicago from its New Deal roots through current mayor Richard M Daley s Plan for Transformation In the process he chronicles the Chicago Housing Authority s own transformation from the city s most progressive government agency to its largest slumlord Challenging explanations that attribute the projects decline primarily to racial discrimination and real estate interests Hunt argues that well intentioned but misguided policy decisions ranging from design choices to maintenance contracts also paved the road to failure Moreover administrators who fully understood the potential drawbacks did not try to halt such deeply flawed projects as Cabrini Green and the Robert Taylor Homes These massive high rise complexes housed unprecedented numbers of children but relatively few adults engendering disorder that pushed out the working class and consequently the rents needed to maintain the buildings The resulting combination of fiscal crisis managerial incompetence and social unrest plunged the CHA into a quagmire from which it is still struggling to emerge Blueprint for Disaster then is an urgent reminder of the havoc poorly conceived policy can wreak on our most vulnerable citizens

The Political Culture of Planning J Barry Cullingworth, J. Barry Cullingworth, 2002-09-26 The Political Culture of Planning is written for two quite distinct readerships The main body of the book synthesizes a mass of

information to provide an overview of a complex and amorphous field This material is designed to meet the needs of students who require a succinct account of the American system of land use planning These readers can ignore the notes For those who are embarking upon a much wider and deeper study of land use planning in the US the notes are crucial they provide the guideposts to an immensely rich literature The first four parts of the text present the main issues of land use planning in the US Part 1 assesses the US zoning system The introductory chapter discusses the meaning of zoning and its difference from planning the primacy of local governments the constitutional framework and the role of the courts Chapter two provides the historical background to zoning and an outline of the classic Euclid case Chapter three discusses the objectives and nature of zoning and the use which local governments have made of its inherently inflexible character Chapter four acts as a corrective to this view describing how lawyers and planners have shown remarkable ingenuity in adapting zoning to the demands of a changing society Part 2 deals with the perennial issues of discrimination financing infrastructure for new development and the process for negotiating zoning matters Part 3 presents a discussion of two overlapping issues of increasing significance aesthetics and historic preservation Part 4 focusses on the main issue facing land use planners attempting to channel the forces of development into spatial forms held to be socially desirable Part 5 consists of a series of broad ranging essays which discuss land use planning in the US its institutional and cultural framework and the reasons for its particular character Part 6 discusses the limited possibilities for land use reform in the US drawing on the author s considerable experience in both Britain and Canada in order to interpret the limitations and potentialities of land use planning in the US

Making the Second Ghetto Arnold R. Hirsch, 2021-04-06 First published in 1983 and praised by the likes of Ta Nehisi Coates and Thomas Sugrue Arnold R Hirsch s Making the Second Ghetto is the rare book that has only become more piercingly prescient over the years Hirsch s classic and groundbreaking work of urban history is a revelatory look at Chicago in the decades after the Great Depression a period when the city dealt with its rapidly growing Black population not by working to abolish its stark segregation but by expanding and solidifying it Even as the civil rights movement rose to prominence Chicago exploited a variety of methods of segregation including riots redevelopment and a host of new legal frameworks that provided a national playbook for the emergence of a new kind of entrenched inequality Hirsch s chronicle of the strategies employed by ethnic political and business interests in reaction to the Great Migration of Southern Blacks in the mid twentieth century makes startlingly clear how the violent reactions of an emergent white population found common ground with policy makers to segregate first a city and then the nation This enlarged edition of Making the Second Ghetto features a visionary afterword by historian N D B Connolly explaining why Hirsch s book still crackles with blistering relevance for contemporary readers

An Institutional Framework for Policymaking Matt Evans, 2008-01-01 Dr Matt Evans utilizes previous characterizations of institutions to analyze the framework affecting policymaking and the tools used for policy implementation In examining the effect of institutional change on public policy this

book compares the implementation of population dispersal policy in Israel over two fifteen year periods **Cities of the Mind** Lloyd Rodwin, Robert M. Hollister, 2013-06-29 Curious about the images of the city that have been evolving in the different social sciences we did what academics often do in such a situation we set up a seminar on Images of the City in the Social Sciences From the start we counted on the help of specialists in other fields to pursue their interests Of the persons who agreed to participate all but two came from the United States and their analyses in the main reflect the experience of Western countries and the United States In our formal instructions to our collaborators we took for granted that a variety of images of the city could be found or inferred in their fields of expertise We asked them to identify these images and their functions to explain how and why they have changed over time and to relate these images to the distinct intellectual traditions and techniques analytical or otherwise in their respective fields The definition of image was left to the judgment of the participants **The Handbook of Community Practice** Marie Weil, Michael S. Reisch, Mary L. Ohmer, 2013 Written by some of the most influential scholars in the field this Handbook covers community development organizing planning and social change as well as key issues fields of practice and global approaches Issues in Housing Discrimination, 1986 *Building Cities That Work* Edmund P. Fowler, 1990-07-01 Using Jane Jacobs critique of postwar city building as a starting point Fowler shows that recent North American urban development has been characterized by development projects on a massive scale an indiscriminate use of vast areas of land and an increasingly evident homogeneity These are characteristics Fowler argues of a perverse and unnatural way of building that is wrecking the planet and enfeebling our social and political networks In exploring how the built environment contributes to social problems Fowler used Toronto as a case study conducting extensive field work in nineteen areas of the city He shows not only that postwar building was the result of conscious public policy but goes further arguing that our cities reflect deep seated insecurities and cultural malaise in surprisingly direct ways Hearings, Reports and Prints of the Senate Committee on Government Operations United States. Congress. Senate. Committee on Government Operations, 1967 **Transcending Capitalism** Howard Brick, 2015-09-25 Transcending Capitalism explains why many influential midcentury American social theorists came to believe it was no longer meaningful to describe modern Western society as capitalist but instead preferred alternative terms such as postcapitalist postindustrial or technological Considering the discussion today of capitalism and its global triumph it is important to understand why a prior generation of social theorists imagined the future of advanced societies not in a fixed capitalist form but in some course of development leading beyond capitalism Howard Brick locates this postcapitalist vision within a long history of social theory and ideology He challenges the common view that American thought and culture utterly succumbed in the 1940s to a conservative cold war consensus that put aside the reform ideology and social theory of the early twentieth century Rather expectations of the shift to a new social economy persisted and cannot be disregarded as one of the elements contributing to the revival of dissenting thought and practice in the 1960s

Rooted in a politics of social liberalism this vision held influence for roughly a half century from its interwar origins until the right turn in American political culture during the 1970s and 1980s In offering a historically based understanding of American postcapitalist thought Brick also presents some current possibilities for reinvigorating critical social thought that explores transitional developments beyond capitalism

The Political Economy of Special-Purpose Government

Kathryn A. Foster,1997-03-01 In recent decades local governments across America have increasingly turned specialized functions over to autonomous agencies ranging in scope from subdivision sized water districts to multi state transit authorities This book is the first comprehensive examination of the causes and consequences of special purpose governments in more than 300 metropolitan areas in the United States It presents new evidence on the economic political and social implications of relying on these special districts while offering important findings about their use and significance
