

Population Growth and its Affect on the Environment and Humans

Alejandro Bonet ENSCI 99

Why does it Matters?

Too many people living on one planet is detrimental to that planet's future. Too many resources will be used, there will be no space. Humans need somewhere to live, and as more and more enter this planet they're slowly destroying it.

Background Knowledge

Since the end of World War II, the population of Earth has grown at an alarming rate, a rate no one has ever seen before. Thanks to advancements in technology, rapid globalization, and generally more peace since that era, it has led to an increase in population. For a long time it seemed fine, or even beneficial. But as time goes on it has proven to possibly be fatal to the planet's future.

Population Growth

As of 2019 there is a total population of over 7.7 billion people on Earth. By 2050 it is expected to skyrocket up to over 9.7 billion people. As the population increases, the demand for natural resources will also increase.

Potential Risks

As population increases, less and less resources will be available. Humans will begin to use more and more resources, eventually depleting them. Humans will enter environments destroying them (ex: deforestation) to find more resources. As more and more humans enter the world, so will pollution. More people means more littering, or more garbage entering the ocean. More people driving, means more gasoline being used in transportation.

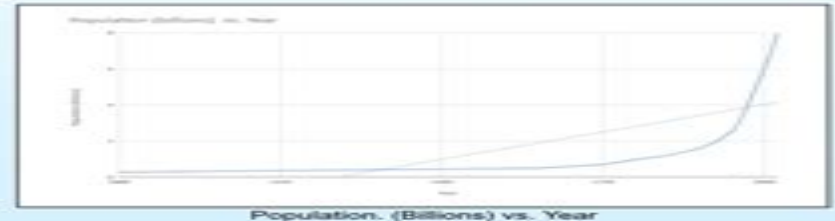

Risks for Humans

Humans would face many risks as well. There would be major food and water shortages. There would be gas shortages. Unemployment would increase greatly as well considering the amount of competition for employment, thus there would be an increase in poverty.

Recent Findings

Many scientists have linked many problems the Earth is facing mostly to population growth. These include:

- Soil Erosion
- Air Pollution
- Africa's Climate Change
- Antarctic Environmental Change

Past Solutions

For many years now scientists have been hard at work to find a solution. Some governments have tried to counteract this problem, for example:

-China: The government put in act the "One Child Policy", so citizens could legally only have one child.

-Brazil: They would broadcast commercials advertising safe sex and the risks of having so many children.

None of these have had a significant impact on the problem and have generally not been considered the most morally correct solution.

Current Solutions

Many governments and private corporations are currently trying to figure out a solution. For example:

-Some organizations in the UK believe government subsidies should be limited to a families first two children unless they're in poverty.

-Many private corporations, such as SpaceX, are looking at alternatives to this problem. They see moving to Mars as a solution, moving a significant part of the population to Mars or possibly all of it depending on Earth's future.

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
