of the case records of the present report It has become more and more apparent that the successful use of radium in cancer requires careful consideration of each particular type of the disease in each organ as separate problems in which different methods must be devised and different results expected Hence the various forms of cancer are separately considered and the indications methods complications and results are given briefly for each In our experience the use of radium emanation has greatly increased the efficiency of radium therapy as compared to the use of the metal itself For a satisfactory understanding of these advantages as well as the principles of application and filtration an acquaintance with the physics of radium is indispensable It has therefore been deemed advisable to include in this report an introduction explaining in detail the physical considerations relative to the therapeutic application of radium The author desires to express his indebtedness to Dr Samuel Brown to whose efficient services in making and changing the applicators and in following the patients much of the success of this work is due About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
