Rainbow Fantasia:

The Armor of Light Meredith Parsons Lillich, 2023-12-22 This landmark study is the first to look closely at the stained glass produced between 1250 and 1325 in western France during the late Capetian era. Generously illustrated with a wealth of color and black and white images never before published, including many from French churches now closed to the public. Lillich greatly expands our knowledge of both the art and the society from which it emerged. The period Lillich chronicles begins with the region's new vitality following the knights' return from the crusades and ends with the onset of economic uncertainty and unrest that preceded the Hundred Years War. She reveals that the stained glass of this 75-year span is forceful and uninhibited, dramatic and dazzling, characteristic of what we now term expressionism. Lillich tracks and identifies painters, glazing shops, working methods, models, and sources to argue that the stained glass is a major style with its own developmental evolution and character, putting to rest the notion that this art is merely transitional and provincial. This landmark study is the first to look closely at the stained glass produced between 1250 and 1325 in western France during the late Capetian era. Generously illustrated with a wealth of color and black and white images never before published, including

Forry Deborah Painter, 2014-01-10 Forrest J Ackerman 1916-2008 was an author, archivist, agent, actor, promoter, and editor of the iconic fan magazine *Famous Monsters of Filmland*, a founder of science fiction fandom, and one of the world's foremost collectors of sci-fi horror and fantasy films, literature, and memorabilia. This biography begins with a foreword by Joe Moe Ackerman's caregiver and close friend since 1982. It documents Ackerman's lifelong dedication to his work in both literature and film, his interests, travels, relationships, and associations with famous personalities, and his lasting impact on popular culture. Primary research material includes letters given by Ackerman to the author during their long friendship and numerous reminiscences from Ackerman's friends, fans, and colleagues.

Rendezvous with Destiny Barbara McCaw, 2010-06 This is the dynamic story of dangerous obsession by a young woman, Joffy Murphy, who reads the autobiography of Nada Evangeline Tippet, Governess. In a wild ride of emotion, a kaleidoscope of confrontations, intrigue, and murder entwined with everyday life in insidious ways. Para-psychological events, time travel, and ominous signs are interwoven into the bizarre plot.

The Risen Adam Virginia Hyde, 2010-11 Showing Lawrence's familiarity with biblical typology from both written and visual sources, Virginia Hyde explores its many ironic and paradoxical versions in his works. She demonstrates his use of typological precursors of Christ, such as Adam and David, Moses and Aaron, and his development of a coherent cosmology centered on the cross and the Tree of Life. These features often take on radically revisionist meanings when informed by Lawrence's interests in theosophy and occult lore. Hyde fully recognized Lawrence's intensely dynamic style and examines the ways in which he works creatively with his models. Hyde sheds new light on Lawrence's leadership, views linking them to patriarchal assumptions inherent in biblical typology. She utilizes manuscripts and sketches as well as his traditional works to show that a complex form of biblical symbolism affects both his form and content in

unexpected ways His symbols are often traceable to iconographic models with typological significance The Risen Adam includes pioneering treatments of the first Quetzalcoatl the 1923 version of The Plumed Serpent so different in part from the final novel as to form a separate creative effort Hyde also offers provocative new readings of The Rainbow Women in Love Aaron s Rod The Border Line The Plumed Serpent David The Man Who Died Birds Beasts and Flowers and other works The book is illustrated with artwork by Lawrence and with examples of the medieval and other iconography he knew

Rainbows Daniel MacCannell,2018-04-15 The rainbow is a compelling spectacle in nature a rare evanescent and beautiful bridge between subjective experience and objective reality and no less remarkable as a cultural phenomenon A symbol of the Left since the German Peasants War of the 1520s it has been adopted by movements for gay rights the environment multiculturalism and peace around the globe and has inspired poets artists and writers including John Keats Caspar David Friedrich Edgar Allan Poe and Nathaniel Hawthorne In this book the first of its kind Daniel MacCannell offers an enlightening and instructive guide to the rainbow s multicolored relationship with humanity The scientific discovery of the rainbow is a remarkable tale taking in ancient Greece and Rome medieval Persia and Islamic Spain But even as we ve studied rainbows adopted their image and penned odes to them for millennia rainbows have also been regarded as ominous or even dangerous in myth and religion In the twentieth century the rainbow emerged as kitsch arcing from the musical film version of The Wizard of Oz to 1980s sitcoms and children s cartoons Illustrated throughout in prismatic color MacCannell s Rainbows explores the full spectrum of rainbows nature and meaning offering insight into what rainbows are and how they work how we arrived at our current scientific understanding of the phenomenon and how we have portrayed them in everything from myth to the arts politics and popular culture Historical Dictionary of Science Fiction Literature Brian Stableford,2004-04-19 This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day The major authors and publications of the genre and significant subgenres are covered Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation The list of acronyms and abbreviations the chronology covering the literature from the 1700s through the present the introductory essay and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation for understanding the realm of science fiction literature The extensive bibliography that includes books journals fanzines and websites demonstrates that science fiction literature commands a massive following **In Search of the Rainbow's End** Colin Caffell,2020-01-09 THE TRUE STORY BEHIND MAJOR ITV DRAMA WHITE HOUSE FARM NOW ON NETFLIX An extraordinary book both deeply moving and quietly inspiring FREDDIE FOX A beautiful very moving book CRESSIDA BONAS In 1985 the shocking murder of a family of five in a quiet country house in Essex rocked the nation The victims were Nevill and June Bamber their adopted daughter Sheila Caffell divorced from her husband Colin and Sheila and Colin s twin sons Nicholas and Daniel Only one

survivor remained the Bamber's other adopted child Jeremy Bamber. Following his lead, the police and later the press blamed the murders on Sheila, who so the story went, then committed suicide. Written by Sheila's ex-husband Colin and originally published in 1994, *In Search of the Rainbow's End* is the first and only book about the White House Farm murders to have been written by a family member. It is the inside story of two families into whose midst the most monstrous events erupted. When Jeremy Bamber is later convicted on all five counts of murder, Colin is left to pick up the pieces of his life after not only burying his ex-wife, two children, and parents-in-law, but also having to cope with memories of Sheila almost shattered by a predatory press hungry for stories of sex, drugs, and the high life. Colin's tale is not just a rare insider's picture of murder, but testimony to the strength and resilience of one man in search of healing after trauma; he describes his process of recovery, a process that led to his working in prisons, helping to rehabilitate among others convicted murderers. By turns emotive, terrifying, and inspiring, Colin Caffell's account of mass murder and its aftermath will not fail to move and astonish. *The Forrest J Ackerman Oeuvre* Christopher M. O'Brien, 2012-09-20. Although he is most remembered for his vast collection of science-fiction memorabilia, his influential magazine *Famous Monsters of Filmland* and his frequent sci-fi convention appearances, Forrest J. Ackerman (1916-2008) also left a sizeable body of work in print. An introductory biographical section traces Ackerman's early enthusiasm for pulp magazines and film productions of a fantastic nature, his rise to prominence in fandom, his acquisition of memorabilia, his work as a literary agent, the founding of his landmark magazine in 1958, and his friendship with a number of performers and personnel from genre films. The extensive bibliography includes listings of books published, letters, articles, fiction, verse, speeches, screenplays, comics, discography, liner notes, and periodicals edited and published by Ackerman. A thorough filmography, a selected listing of nationally televised appearances, and rare photographs of Ackerman throughout his lifetime complete this definitive catalog of one of science-fiction's most interesting personalities.

THE TRUTH ABOUT FREEMASONS, ILLUMINATI, AND NEW WORLD ORDER S.D.S.C.M.W., 2012-03. Two Books In One. The New World Order's Letter to Every Citizen of the World warning: Resistance is Futile. According to this letter addressed to everybody in America, it's useless to resist a one-world takeover as the program is in its final stages. The very word secrecy is repugnant in a free and open society, and we are as people inherently and historically opposed to secret societies, to secret oaths, and to secret proceedings. We decided long ago that the dangers of excessive and unwarranted concealment of pertinent facts far outweighed the dangers which are cited to justify it. If you have the privilege to know, you have the duty to act.

Automatic Timothy Wientzen,2021-08-31 A fascinating study of how behavioral science shaped twentieth century politics and the modernist literary period The advent of the twentieth century famously brought about new personal and political freedoms including radical changes in voting rights and expressions of gender and sexuality Yet writers and cultural critics shared a sense that modern life reduced citizens to automatons capable of interacting with the world in only the most reflexive ways In *Automatic* Timothy Wientzen asks why modernists were deeply anxious about the role of reflexive behaviors and the susceptibility of bodies to physical stimuli in the new political structures of the twentieth century Engaging with historical thinking about human behaviors that fundamentally changed the nature of political and literary practice Wientzen demonstrates the ways in which a politics of reflex came to shape the intellectual and cultural life of the modernist era Documenting some of the ways that modernist writers and their contemporaries mapped harnessed and intervened in a political sphere dominated by conditioned reflexes Wientzen reads writers like D H Lawrence Rebecca West Wyndham Lewis and Samuel Beckett in conversation with fields that include public relations physiology sociology and vitalism Ultimately he justifies a reckoning with some of the most enduring preoccupations of modernist studies *Automatic* further emphasizes the

role of politics and science in the aesthetic projects of modernist writers At a moment when political enfranchisement and the mass media promised new modes of freedom agency and choice Wientzen argues that the modernist era was beset by apprehension about the conscription of liberty through the conditioning force of everyday life Analyzing such thinking through a neglected archive about embodiment and reflex reveals modernists responding to the historically novel conditions of political life in the twentieth century conditions that have become entrenched in the politics of our own century

Novel Schooling Bridget T. Chalk, 2024-08-27 This book identifies and explores the consistent link between negative depictions of education in novels and claims for the educative effects of reading them The novel and education are both phenomena that rely fundamentally on development over time the former in plot and character and the latter in individual potential Despite this basic parallel these forms of development are at odds in many works of fiction that treat education as constrictive and even traumatic to the individual rather than healthy and formative Novel Schooling identifies a pervasive pattern in novels from the 19th to 21st centuries writers ranging from Charles Dickens and D H Lawrence to Zadie Smith reject conventional modes of education and propose their own models for shaping the sensibilities of their characters and readers These works critique institutional education as a point of departure to position reading fiction as a superior form of individual development Using the new ethics and reader response theory this work traces the treatment of education in and through the novel concluding with fresh assertions of the value of literature in a digital market driven world
