Lawrence Harvey Schiffman, 2008 Already before its publication it was clear that the Temple Scroll represented a major contribution to the history of Jewish law in Late Antiquity The present volume brings together the author's studies on this important scroll He has sought to uncover the hermeneutics of the Zadokite Sadducean legal system and to compare and contrast it with other texts of its own type as well as with those in rabbinic literature preserving the Pharisaic rabbinic approach

Negotiating the North Sarah Semple, Alexandra Sanmark, Frode Iversen, Natascha Mehler, 2020-06-11 This book brings together the cumulative results of a three year project focused on the assemblies and administrative systems of Scandinavia Britain and the North Atlantic islands in the 1st and 2nd millennia AD In this volume we integrate a wide range of historical cartographic archaeological field based and onomastic data pertaining to early medieval and medieval administrative practices geographies and places of assembly in Norway Sweden Denmark Iceland the Faroe Islands Scotland and eastern England This transnational perspective has enabled a new understanding of the development of power structures in early medieval northern Europe and the maturation of these systems in later centuries under royal control In a series of richly illustrated chapters we explore the emergence and development of mechanisms for consensus We begin with a historiographical exploration of assembly research that sets the intellectual agenda for the chapters that follow We then examine the emergence and development of the thing in Scandinavia and its export to the lands colonised by the Norse We consider more broadly how assembly practices may have developed at a local level yet played a significant role in the consolidation and at times regulation of elite power structures Presenting a fresh perspective on the agency and power of the thing and cognate types of local and regional assembly this interdisciplinary volume provides an invaluable in depth insight into the people places laws and consensual structures that shaped the early medieval and medieval kingdoms of northern Europe

**The Courtyard Houses** Jørn Utzon,2004 By looking at how people lived I quickly discovered that all the small gardens were filled with tool sheds and hobby sheds and old cars stood there and pleasure craft etc And so I designed a town plan and a house type that accepted that within their own area people could do as they pleased in their leisure time without upsetting their neighbours and without having any special easements such a house and such a town plan that respected this or assumed the individual right to enjoy private life but at the same time the resulting part of the town was then to have a common character as seen from outside so that it became a small community

**The Halle Orphanage as Scientific Community** Kelly Joan Whitmer,2015-05-12 Founded around 1700 by a group of German Lutherans known as Pietists the Halle Orphanage became the institutional headquarters of a universal seminar that still stands largely intact today It was the base of an educational charitable and scientific community and consisted of an elite school for the sons of noblemen Yet its reputation as a Pietist enclave inhabited largely by young people has prevented the organisation from being taken seriously as a kind of scientific academy even though Kelly Joan Whitmer shows this is precisely what it was This book calls into question a long standing tendency to view German Pietists as anti science and anti Enlightenment arguing that these tendencies have drawn attention away from what was actually going on inside the orphanage

*Peasant and Empire in Christian North Africa* Leslie Dossey,2010 This remarkable history foregrounds the most marginal sector of the Roman population the provincial peasantry to paint a fascinating new picture of peasant society Making use of detailed archaeological and textual evidence Leslie Dossey examines the peasantry in relation to the upper classes in Christian North Africa tracing that region s social and cultural history from the Punic times to the eve of the Islamic conquest She demonstrates that during the period when Christianity was spreading to both city and countryside in North Africa a convergence of economic interests narrowed the gap between the rustici and the urbani creating a consumer revolution of sorts among the peasants This book s postcolonial perspective points to the empowerment of the North African peasants and gives voice to lower social classes across the Roman world

*Building Jewish in the Roman East* Peter Richardson,2004 Archaeology has unearthed the glories of ancient Jewish buildings throughout the Mediterranean but what has remained shrouded is what these buildings meant Building Jewish first surveys the architecture of small rural villages in the Galilee in the early Roman period before examining the development of synagogues as Jewish associations Finally Building Jewish explores Jerusalem s flurry of building activity under Herod the Great in the first century BCE Richardson s careful work not only documents the culture that forms the background to any study of Second Temple Judaism and early Christianity but also succeeds in demonstrating how architecture itself like a text conveys meaning and thus directly illuminates daily life and religious thought and practice in the ancient world
