Machine Translation Theoretical And Methodological Issues:

Machine Translation Sergei Nirenburg,1986   **Machine Translation** Bonnie Jean Dorr,1993 This book describes a novel cross linguistic approach to machine translation that solves certain classes of syntactic and lexical divergences by means of a lexical conceptual structure that can be composed and decomposed in language specific ways This approach allows the translator to operate uniformly across many languages while still accounting for knowledge that is specific to each language   *Theoretical and Methodological Issues in Machine Translation of Natural Language, Proc. of 3rd Int Conf. Held Austin 11-13 June 1990* Linguistic Research Center,1990   Advances in Computers ,1999-09-14 Since its first volume in 1960 Advances in Computers has presented detailed coverage of innovations in hardware and software and in computer theory design and applications It has also provided contributors with a medium in which they can examine their subjects in greater depth and breadth than that allowed by standard journal articles As a result many articles have become standard references that continue to be of significant lasting value despite the rapid growth taking place in the field   *Current Issues in Computational Linguistics: In Honour of Don Walker* Antonio Zampolli,Nicoletta Calzolari,Martha Palmer,1994-06-30 With this volume in honour of Don Walker Linguistica Computazionale con tinues the series of special issues dedicated to outstanding personalities who have made a significant contribution to the progress of our discipline and maintained a special collaborative relationship with our Institute in Pisa I take the liberty of quoting in this preface some of the initiatives Pisa and Don Walker have jointly promoted and developed during our collaboration because I think that they might serve to illustrate some outstanding features of Don s personality in particular his capacity for identifying areas of potential convergence among the different scientific communities within our field and establishing concrete forms of coop eration These initiatives also testify to his continuous and untiring work dedi cated to putting people into contact and opening up communication between them collecting and disseminating information knowledge and resources and creating shareable basic infrastructures needed for progress in our field Our collaboration began within the Linguistics in Documentation group of the FID and continued in the framework of the CCL International Committee for Computational Linguistics In 1982 this collaboration was strengthened when at CO LING in Prague I was invited by Don to join him in the organization of a series of workshops with participants of the various communities interested in the study development and use of computational lexica
