On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their

stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support. The students pursued one of four pathways or momentum trajectories: linear, upward, detoured, deferred, or taking a break. The preexisting and lasting disparities in their access to education and financial resources, their experiences with teaching and advising, and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer. As this book makes painfully clear, the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes. As Xueli Wang argues, to cultivate an equitable STEM transfer pathway, culturally relevant and responsive supports that are accessible, welcoming, and validating must be put in place at the institutional level and appeal to the talent, motivation, and unique needs of historically marginalized students. In doing so, postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor's degrees and beyond.

Mixed Methods Research Outside the Box Joseph A. Maxwell, 2024-11-22 In *Mixed Methods Research Outside the Box*, Joseph A. Maxwell shows readers how to carry out unconventional yet effective mixed methods research. Providing a new way to think about and combine qualitative and quantitative research, this readable text takes a broad view of mixed methods, revealing the largely unrecognized early history of mixed methods research and its current diversity across disciplines. Maxwell brings together work on combining qualitative and quantitative methods from a variety of disciplines and puts them in conversation with one another. He identifies mixed methods philosophical bases, presenting an interactive model of design that more closely integrates qualitative and quantitative elements and emphasizes the complementarity of qualitative and quantitative methods for understanding causation and generalization. Drawing from recent works on causation, integration, and philosophy of science, this text promotes innovations in mixed methods, such as process tracing in political science and design-based research in education. This groundbreaking book provides readers with a new way of thinking about developing and conducting mixed methods research.

Human Geopolitics Alan Gamlen, 2019-05-02 Human geopolitics, the competition for population rather than territory, is an essential but weakly understood dimension of world politics today. Such competition has preceded violent conflict throughout history but has been muted since the Treaties of Westphalia laid the territorial foundations of the modern international system in the mid-seventeenth century. Today, however, human geopolitics is being resurrected in unanticipated ways as governments are enabled and encouraged to engage their emigrant diasporas. How and why is this happening? Until now, these questions have been difficult to answer. The majority of research attention has focused on questions of immigration policy in a handful of wealthy migrant destination countries, largely ignoring the emigration policies that preoccupy the world's many migrant origin states. This book addresses that research imbalance by focusing on the overlooked sending side of migration policy. Drawing on data covering all UN members across the post-WWII period and fieldwork with high-level policy makers across 60 states and a dozen international organizations, the book charts the re-emergence of human geopolitics through the global spread of diaspora institutions, government ministries, and offices.

dedicated to emigrants and their descendants It calls for the development of stronger guiding principles and evaluation frameworks to govern these new state diaspora relations in an era of unprecedented global interdependence *The Oxford Handbook of Multimethod and Mixed Methods Research Inquiry* Sharlene Nagy Hesse-Biber, Burke Johnson, 2015 Offering a variety of innovative methods and tools The Oxford Handbook of Multimethod and Mixed Methods Research Inquiry provides the most comprehensive and up to date presentation on multi and mixed methods research available Written in clear and concise language by leading scholars in the field it enhances and disrupts traditional ways of asking and addressing complex research questions Topics include an overview of theory paradigms and scientific inquiry a guide to conducting a multi and mixed methods research study from start to finish current uses of multi and mixed methods research across academic disciplines and research fields the latest technologies and how they can be incorporated into study design and a presentation of multiple perspectives on the key remaining debates Each chapter in the volume is structured to include state of the art research examples that cross a range of disciplines and interdisciplinary research settings In addition the Handbook offers multiple quantitative and qualitative theoretical and interdisciplinary visions and praxis Researchers faculty graduate students and policy makers will appreciate the exceptional timely and critical coverage in this Handbook which deftly addresses the interdisciplinary and complex questions that a diverse set of research communities are facing today

Strategies of Qualitative Inquiry Norman K. Denzin, Yvonna S. Lincoln, 2012-10-24 This book is the second of three paperback volumes taken from The SAGE Handbook of Qualitative Research Fourth Edition This volume isolates the major strategies historically the research methods that researchers can use in conducting concrete qualitative studies The question of methods begins with questions of design and the matters of money and funding These questions always begin with the researcher who moves from a research question to a paradigm or perspective and then to the empirical world The history and uses of these strategies are

explored extensively in this volume The chapters move from forms and problems with mixed methods inquiry to case study performance and narrative ethnography to constructionist analytics to grounded theory strategies testimonies participatory action research and clinical research *Contrasts and Effect Sizes in Behavioral Research* Robert Rosenthal, Ralph L. Rosnow, Donald B. Rubin, 2000 Contrasts are statistical procedures for asking focused questions of data Compared to diffuse or omnibus questions focused questions are characterized by greater conceptual clarity and greater statistical power when examining those focused questions If an effect truly exists we are more likely to discover it and to believe it to be real when asking focused questions rather than omnibus ones Researchers teachers of research methods and graduate students will be familiar with the principles and procedures of contrast analysis but will also be introduced to a series of newly developed concepts measures and indices that permit a wider and more useful application of contrast analysis This volume takes on this new approach by introducing a family of correlational effect size estimates
