articles are concerned with semantic phenomena theories and problems which are specific for a particular class of linguistic expressions These are arranged according to parts of speech nouns functional categories verbs adjectives and so on This division does not reflect a theoretical position by itself however it allows one to recognize problems connected with one another Some more general questions are discussed in more than one article in different perspective and vicinity The Handbook is complemented by a service article on formal methods in semantics followed by a comprehensive bibliography including about 1700 entries and both a subject and a name index This handbook is indispensable for all research in linguistics and neighboring disciplines philosophy of language cognitive sciences Some of the articles can serve as basic literature for classes of advanced students
