Cultures of Darkness Bryan D. Palmer, 2019-02-15 Peasants religious heretics witches pirates runaway slaves prostitutes and pornographers frequenters of taverns and fraternal society lodge rooms revolutionaries blues and jazz musicians beats and contemporary youth gangs those who defied authority choosing to live outside the defining cultural dominions of early insurgent and later dominant capitalism are what Bryan D Palmer calls people of the night These lives of opposition or otherness were seen by the powerful as deviant rejecting authority and consequently threatening to the established order Constructing a rich historical tapestry of example and experience spanning eight centuries Palmer details lives of exclusion and challenge as the night travels of the transgressors clash repeatedly with the powerful conventions of their times Nights of liberation and exhilarating desire sexual and social are at the heart of this study But so too are the dangers of darkness as marginality is coerced into corners of pressured confinement or the night is used as a cover for brutalizing terror as was the case in Nazi Germany or the lynching of African Americans Making extensive

use of the interdisciplinary literature of marginality found in scholarly work in history sociology cultural studies literature anthropology and politics Palmer takes an unflinching look at the rise and transformation of capitalism as it was lived by the dispossessed and those stamped with the mark of otherness

Dynamic Modeling in the Health Sciences James L. Hargrove, 2012-12-06 The world consists of many complex systems ranging from our own bodies to ecosystems to economic systems Despite their diversity complex systems have many structural and functional features in common that can be effectively simulated using powerful user friendly software As a result virtually anyone can explore the nature of complex systems and their dynamical behavior under a range of assumptions and conditions This ability to model dynamic systems is already having a powerful influence on teaching and studying complexity The books in this series will promote this revolution in systems thinking by integrating skills of numeracy and techniques of dynamic modeling into a variety of disciplines The unifying theme across the series will be the power and Simplicity of the model building process and all books are designed to engage the reader in developing their own models for exploration of the dynamics of systems that are of interest to them Modeling Dynamic Systems does not endorse any particular modeling paradigm or software Rather the volumes in the series will emphasize simplicity of learning expressive power and the speed of execution as priorities that will facilitate deeper system understanding

Silliman,2022-08-23 A fundamental issue for twenty first century archaeologists is the need to better direct their efforts toward supporting rather than harming indigenous peoples Collaborative indigenous archaeology has already begun to stress the importance of cooperative community based research this book now offers an up to date assessment of how Native American and non native archaeologists have jointly undertaken research that is not only politically aware and historically minded but fundamentally better as well Eighteen contributors many with tribal ties cover the current state of collaborative indigenous archaeology in North America to show where the discipline is headed Continent wide cases from the Northeast to the Southwest demonstrate the situated nature of local practice alongside the global significance of further decolonizing archaeology And by probing issues of indigenous participation with an eye toward method theory and pedagogy many show how the archaeological field school can be retailored to address politics ethics and critical practice alongside traditional teaching and research methods These chapters reflect the strong link between politics and research showing what can be achieved when indigenous values perspectives and knowledge are placed at the center of the research process They not only draw on experiences at specific field schools but also examine advances in indigenous cultural resource management and in training Native American and non native students Theoretically informed and practically grounded **Collaborating at the Trowel s Edge** is a virtual guide for rethinking field schools and is an essential volume for anyone involved in North American archaeology professionals students tribal scholars or avocationalists as well as those working with indigenous peoples in other parts of the world It both reflects the rapidly changing landscape of archaeology and charts new directions to ensure the ongoing vitality of the discipline **Anthropological Lives** Virginia R Dominguez,Brigittine M. French,2020-05-15 **Anthropological Lives** introduces readers to what it is like to be a professional anthropologist It focuses on the work anthropologists do the passions they have the way that being an anthropologist affects the kind of life they lead The book draws heavily on the experiences of twenty anthropologists interviewed by Virginia R Dominguez and Brigittine M French as well as on the experiences of the two coauthors Many different kinds of anthropologists are represented and the book makes

a point of discussing their commonalities as well as their differences Some of the anthropologists included work in the academy some work outside the academy and some work in institutions like museums Included are cultural anthropologists linguistic anthropologists medical anthropologists biological anthropologists practicing anthropologists and anthropological archaeologists A fascinating look behind the curtain the stories in Anthropological Lives will inform anyone who has ever wondered what you do with a degree in anthropology Anthropologists profiled Leslie Aiello Lee Baker Jo o Biehl Tom Boellstorff Jacqueline Comito Shannon Dawdy Virginia R Dominguez T J Ferguson Brigitte French Agust n Fuentes Amy Goldenberg Mary Gray Sarah Green Monica Heller Douglas Hertzler Ed Liebow Mariano Perelman Jeremy Sabloff Carolyn Sargent Marilyn Strathern Nandini Sundar Alaka Wali **Manual of Curatorship** John M. Kidner, 2001-01-01 Underscores the limitations of traditional psychology to envision a more healthy ecological and psychological future **Human-Centered Built Environment Heritage Preservation** Jeremy C. Wells, Barry L. Stiefel, 2018-09-20 Human Centered Built Environment Heritage Preservation addresses the question of how a human centred conservation approach can and should change practice For the most part there are few answers to this question because professionals in the heritage conservation field do not use social science research methodologies to manage cultural landscapes assess historical significance and inform the treatment of building and landscape fabric With few exceptions only academic theorists have explored these topics while failing to offer specific usable guidance on how the social sciences can actually be used by heritage professionals In exploring the nature of a human centred heritage conservation practice we explicitly seek a middle ground between the academy and practice theory and application fabric and meanings conventional and civil experts and orthodox and heterodox ideas behind practice and research We do this by positioning this book in a transdisciplinary space between these dichotomies as a way to give voice and respect to multiple perspectives without losing sight of our goal that heritage conservation practice should fundamentally benefit all people We believe that this approach is essential for creating an emancipated built heritage conservation practice that must successfully engage very different ontological and epistemological perspectives
