Americans lagged behind their European contemporaries in military aviation in the late 1930s and it took the Battle of Britain to awaken America to the necessity of having aircraft that could defend targets against night time attack by bomber aircraft. This book examines the numerous aircraft types that were used by the US in this role beginning with the early stop gap conversions like the TBM Avenger Lockheed Ventura and the A 20 Havoc P 70. It goes on to detail the combat history of the newer radar equipped Hellcats Corsairs and Black Widows that were designed to seek out enemy aircraft and which registered most of the kills made by the Navy Marine Corps and USAAF in 1944-45. With full colour profiles and rare photographs this is an absorbing account of an underestimated flying force the American Nightfighters. The Last Night of a Nation Robert Boodey Caverly, 1884

Warhead Nicholas Wright, 2025-10-07

From Dr Nicholas Wright leading neuroscientist and adviser to the Pentagon discover the new science behind warfare. Why did France lose to the Nazis despite its defenders having more tanks troops and guns? How did we bring peace to Germany after World War Two? How do you know if you can trust an ally? How can we make clearer decisions under pressure? In *Warhead* Nicholas Wright takes us on a fascinating journey through the brain to show us how it shapes our behaviour in conflict and war. Drawing on his work as a neuroscientist and over a decade advising the Pentagon and the UK Government Wright reveals that whether we like it or not the brain is wired for conflict in the office or on the battlefield. With a unique framework that helps explain today's rising tensions and how to defuse them *Warhead* brings cutting edge research to life through battle stories from history. What was it like for a foot soldier at the Battle of Waterloo in 1815 or in China's Red Army as it fought to survive and triumph throughout the 1930s and 40s? How could leaders such as World War Two tank

commanders Shaka Zulu or Winston Churchill see through the fog of conflict make better decisions and communicate with those who must carry those decisions out How will human conflict shape our future technologies In an increasingly dangerous world that threatens our values and success Warhead is an essential read to understand why we fight lose and win wars Because self knowledge is power **Journal of the British Archaeological Association** British Archaeological Association,1878
