Night Riders Defending Community In The Black Patch 1890 1915:

Night Riders Christopher Waldrep, 1993 In the late nineteenth century industrialization was making its way into rural America In an agricultural region of Kentucky and Tennessee called the Black Patch for the dark tobacco grown there big business arrived with a vengeance eliminating competition manipulating prices and undermining local control The farmers fought back Night Riders tells the story of the struggle that followed and reveals the ambiguities and complexities of a drama that convulsed this community for over two decades Christopher Waldrep shows that contrary to many accounts these wealthy tobacco planters did not resist these new forces simply because of a nostalgia for a bygone time Instead many sought to become modern capitalists themselves but on their own terms The South's rural elite found their ability to hire and control black labor the established racial practice of the community threatened by the low prices offered by big companies for their raw materials In response farmers organized and demanded better prices for their tobacco The tobacco companies then attempted to divide the farmers by offering higher prices to those willing to break with the others When some cultivators succumbed their betrayal awakened a deeply rooted vigilante tradition that called for the protection of community at all costs Waldrep analyzes the spasm of violence that ensued in which horsemen riding at night destroyed tobacco barns and the warehouses where the companies stored their tobacco But despite this fierce upheaval the Black Patch community endured The most thorough treatment ever given to the Black Patch war Night Riders illuminates a moment in history in which the traditional and the modern the rural and the industrial fought for the future and past of a community

traditional and the modern the rural and the industrial fought for the future and past of a community **A New History of Kentucky** Lowell H. Harrison, James C. Klotter, 1997-03-27 The first comprehensive history of the state since the publication of Thomas D Clark s landmark History of Kentucky over sixty years ago A New History of Kentucky brings the Commonwealth to life from Pikeville to the Purchase from Covington to Corbin this account reveals Kentucky s many faces and deep traditions Lowell Harrison professor emeritus of history at Western Kentucky University is the author of many books including George Rogers Clark and the War in the West The Civil War in Kentucky Kentucky s Road to Statehood Lincoln of Kentucky and Kentucky s Governors *Violence in the Black Patch of Kentucky and Tennessee* Suzanne Marshall, 1994 From its settlement in the late 1700s the Black Patch an agricultural region of western Kentucky and Middle Tennessee has been known for its dark fired heavy leafed tobacco so green that it is called black But as the settlers of this region sowed the seeds of tobacco they also sowed the seeds of violence In Violence in the Black Patch of Kentucky and Tennessee Suzanne Marshall provides a thorough engrossing depiction of the role played by violence in the development of the Black Patch culture Violence was a key element in the white settlement of this frontier wilderness After forcibly removing Native Americans from the region white settlers established a tradition of violence that maintained order and morality White male dominance over family members and black slaves was also sustained by violence A man s mean reputation defined his identity and place within the community instilling respect and fear among outsiders The Civil War and the industrial revolution also helped perpetuate violence in the Black Patch With markedly divided sympathies during the Civil War the Black Patch inspired guerrilla warfare against citizens and slaves by renegade bands of former soldiers from both sides Marshall s study culminates with a discussion of the Night Riders vigilante activity during Black Patch wars that originated with this country s shift from an agricultural society to an industrial one By focusing on the violence in this culture Marshall provides a key to understanding both the cultural components that were unique to the area and those that were shared with other isolated rural communities She draws extensively from oral history and ethnographic methodology as well as court records church records diaries and newspapers Anecdotes depicting folk beliefs and heroes old time religion the economics of farm life race relations and gender roles serve to enliven this study and enrich our understanding of a fascinating and distinctive region Race, Labor, and Violence in the Delta Michael Pierce, Calvin White, 2022-05-11 This essay collection grew out of a conference marking the hundredth anniversary of one of the nation s deadliest labor conflicts the 1919 Elaine Massacre during which white mobs ruthlessly slaughtered over two hundred African Americans across Phillips County Arkansas in response to a meeting of unionized Black sharecroppers The essays here demonstrate that the brutality that unfolded in Phillips County was characteristic of the culture of race and labor based violence that prevailed in the century after the Civil War Buried in the Bitter Waters Elliot Jaspis, 2008-05-06 A Pulitzer Prize winning journalist exposes the secret history of racial cleansing in America *Captives and Cousins* James F. Brooks, 2009-09-14 This sweeping richly

evocative study examines the origins and legacies of a flourishing captive exchange economy within and among native American and Euramerican communities throughout the Southwest Borderlands from the Spanish colonial era to the end of the nineteenth century Indigenous and colonial traditions of capture servitude and kinship met and meshed in the borderlands forming a slave system in which victims symbolized social wealth performed services for their masters and produced material goods under the threat of violence Slave and livestock raiding and trading among Apaches Comanches Kiowas Navajos Utes and Spaniards provided labor resources redistributed wealth and fostered kin connections that integrated disparate and antagonistic groups even as these practices renewed cycles of violence and warfare Always attentive to the corrosive effects of the slave trade on Indian and colonial societies the book also explores slavery's centrality in intercultural trade alliances and communities of interest among groups often antagonistic to Spanish Mexican and American modernizing strategies The extension of the moral and military campaigns of the American Civil War to the Southwest in a regional war against slavery brought differing forms of social stability but cost local communities much of their economic vitality and cultural flexibility

Lethal Punishment Margaret Vandiver, 2005-12-22 Why did some offenses in the South end in mob lynchings while similar crimes led to legal executions Why did still other cases have nonlethal outcomes In this well researched and timely book Margaret Vandiver explores the complex relationship between these two forms of lethal punishment challenging the assumption that executions consistently grew out of and replaced lynchings Vandiver begins by examining the incidence of these practices in three culturally and geographically distinct southern regions In rural northwest Tennessee lynchings outnumbered legal executions by eleven to one and many African Americans were lynched for racial caste offenses rather than for actual crimes In contrast in Shelby County which included the growing city of Memphis more men were legally executed than lynched Marion County Florida demonstrated a firmly entrenched tradition of lynching for sexual assault that ended in the early 1930s with three legal death sentences in quick succession With a critical eye to issues of location circumstance history and race Vandiver considers the ways that legal and extralegal processes imitated influenced and differed from each other A series of case studies demonstrates a parallel between mock trials that were held by lynch mobs and legal trials that were rushed through the courts and followed by quick executions Tying her research to contemporary debates over the death penalty Vandiver argues that modern death sentences like lynchings of the past continue to be influenced by factors of race and place and sentencing is comparably erratic

worldviews of Indiana's southern hill country residents during much of the 19th century. Focusing on local institutions, political, economic, and religious, it gives voice to the plain farmers of the region and reveals the world as they saw it. For them, faith in local institutions reflected a distrust of distant markets and politicians. Localism saw its expression in the Democratic Party's anti-federalist strain in economic practices such as safety first farming, which focused on taking care of the family first and in non-perfectionist Christianity. Localism was both a means of resisting changes and the basis of a worldview that helped Hoosiers of the hill country negotiate these changes.
