Notre Dame's John Zahm Ralph E. Weber, 1961-01-01 *Faith and Science at Notre Dame* John P. Slattery, 2019-08-31

The Reverend John Augustine Zahm CSC 1851-1921 was a Holy Cross priest an author a South American explorer and a science professor and vice president at the University of Notre Dame the latter at the age of twenty five Through his scientific writings Zahm argued that Roman Catholicism was fully compatible with an evolutionary view of biological systems Ultimately Zahm's ideas were not accepted in his lifetime and he was prohibited from discussing evolution and Catholicism although he remained an active priest for more than two decades after his censure In *Faith and Science at Notre Dame* John Zahm Evolution and the Catholic Church John Slattery charts the rise and fall of Zahm examining his ascension to international fame in bridging evolution and Catholicism and shedding new light on his ultimate downfall via censure by the Congregation of the Index of Prohibited Books Slattery presents previously unknown archival letters and reports that allow Zahm's censure to be fully understood in the light of broader scientific theological and philosophical movements within the Catholic Church and around the world *Faith and Science at Notre Dame* weaves together a vast array of threads to tell a compelling new story of the late nineteenth century The result is a complex and thrilling tale of Neo Scholasticism Notre Dame empirical science and the simple faith of an Indiana priest The book which includes a new translation of the 1864 Syllabus of Errors will appeal to those interested in Notre Dame and Catholic history scholars of science and religion and general readers seeking to understand the relationship between faith and science **Notre Dame's John Zahm** Ralph Edward Weber, 1961 **The University of Notre Dame** Thomas E. Blantz C.S.C., 2020-08-31

Thomas Blantz's monumental *The University of Notre Dame A History* tells the story of the renowned Catholic university's growth and development from a primitive grade school and high school founded in 1842 by the Congregation of Holy Cross in the wilds of northern Indiana to the acclaimed undergraduate and research institution it became by the early twenty first century Its growth was not always smooth slowed at times by wars financial challenges fires and illnesses It is the story both of a successful institution and of the men and women who made it so Father Edward Sorin the twenty eight year old French priest and visionary founder Father William Corby later two term Notre Dame president who gave absolution to the soldiers of the Irish Brigade at the Battle of Gettysburg the hundreds of Holy Cross brothers sisters and priests whose faithful service in classrooms student residence halls and across campus kept the university progressing through difficult years a dedicated lay faculty teaching too many classes for too few dollars to assure the university would survive Knute Rockne a successful chemistry teacher but an even more successful football coach elevating Notre Dame to national athletic prominence Father Theodore M Hesburgh president for thirty five years the 325 undergraduate young women who were the first to enroll at Notre Dame in 1972 and thousands of others Blantz captures the strong connections that exist between Notre Dame's founding and early life and today's university Alumni faculty students friends of the university and fans of the Fighting Irish will want to own this

Numbers, John Stenhouse, 1999-12-28 This innovative collection of original essays focuses on the ways in which geography gender race and religion influenced the reception of Darwinism in the English speaking world of the late nineteenth and early twentieth centuries The contributions to this volume collectively illustrate the importance of local social physical and religious arrangements while revealing that neither distance from Darwin's home at Down nor size of community greatly influenced how various regions responded to Darwinism Essays spanning the world from Great Britain and North America to Australia and New Zealand explore the various meanings for Darwinism in these widely separated locales while other chapters focus on the difference it made in the debates over evolution Evolution and Dogma John Zahm, 2017-12-06 In this book John Augustine Zahm C S C makes a concerted effort to reconcile the biological theory of evolution with the Catholic dogma of Creation Fr Zahm threads the findings of science into an interpretation of the works of St Gregory of Nyssa St Augustine of Hippo and St Thomas Aquinas all the while defending the indisputable existence of God the Creator of all things The twist Only the primordial matter was created out of nothing and from it through the laws with which God has endowed nature all creatures were created secondarily Fr Zahm acknowledges that the six day account of Creation in Genesis need not be read literally so as to accommodate the evidence from geology regarding the age of the earth and from paleontology of that of plants and animals He allows for a two origins theory of the creation of man as follows Man's body was subject to evolution but that at a certain point in its development God created and infused a soul into Adam the first man and into Eve his wife Adam and Eve are the ancestors common to all mankind And God created and will create a soul for every conception since the children of our first parents This book earned Fr Zahm harsh criticisms from many fronts including the Jesuits in Europe who delated it to the Sacred Congregation of the Index A decree of prohibition against it was

written but through the efforts of influential clergy it was never published. Thereafter a cloud hung over Catholic scholarship on evolution. It was only lifted in 1950 by the Encyclical *Humani generis* of Pope Pius XII. In it the Pontiff allowed Catholic scholars to treat and teach evolution as a hypothesis. In 1996 Pope St John Paul II indicated his acceptance of the two origins theory writing if the human body takes its origin from pre-existent living matter the spiritual soul is immediately created by God.

Notre Dame vs. The Klan Todd Tucker, 2018-08-15. In 1924 two uniquely American institutions clashed in northern Indiana: the University of Notre Dame and the Ku Klux Klan. Todd Tucker's book, published for the first time in paperback, *Notre Dame vs The Klan* tells the shocking story of the three-day confrontation in the streets of South Bend, Indiana, that would change both institutions forever. When the Ku Klux Klan announced plans to stage a parade and rally in South Bend, hoping to target college campuses for recruitment, starting with Notre Dame, a large group of students defied their leaders' pleas to ignore the Klan and remain on campus. Tucker dramatically recounts the events as only a proficient storyteller can. Readers will find themselves drawn into the fray of these tumultuous times. Tucker structures this compelling tale around three individuals: D.C. Stephenson, the leader of the KKK in Indiana, the state with the largest Klan membership in America; Fr. Matthew Walsh, the young and charismatic president of the University of Notre Dame; and a composite of a Notre Dame student at the time represented by Bill Foohey, who was an actual participant in the clash. This book will appeal not only to Notre Dame fans but to those interested in South Bend and Indiana history and the history of the Ku Klux Klan, including modern-day Klan violence.

[The Origins of Catholic Evolutionism, 1831-1950](#) Kenneth W. Kemp, 2025. The history of the Catholic Church's response to evolutionary biology has often been badly misrepresented as antagonistic. In fact, its response is better characterized as a long process of accommodation. This work is a comprehensive introduction to the work of the Catholic scientists and theologians who worked out the details of that accommodation. Few Catholics found the evolutionary origin of plant and animal species theologically objectionable. None thought that evolutionary processes provided a sufficient account of the origin of the first human beings. Catholics differed over whether those processes played a role in the origin of the first human body. Catholic evolutionism began with the work of four nineteenth-century scientists who might be called the pioneers of Catholic evolutionism: Belgian geologist Jean Baptiste d'Omalius de Halloy, English anatomist George Mivart, Italian anatomist Filippo De Filippi, and French paleontologist Albert Gaudry. The next generations of Catholic evolutionists, writing in the period from about 1890-1940, included scientists, Jesuit entomologists Erich Wasmann and Felix R. Schkamp, as well as priests who focused more exclusively on the question of compatibility: Dalmace Leroy, John Zahm, Henry de Dordot, and Ernest Messenger. Among the scientists might also be included French paleontologist Pierre Teilhard de Chardin, who made some contributions to the general idea of

the compatibility of evolutionary biology and Catholic theology but who eventually veered off in the direction of a comprehensive evolutionary theology of nature the details of which are beyond the scope of this book Catholic anti evolutionists made efforts to have the Church prohibit works of Catholic evolutionism that in their judgment gave evolutionary processes too great a role in the formation of the human body or that relied on problematic principles of hermeneutics Efforts on the former front were eventually blocked by Pope Pius XI The first magisterial statement on the question came however only in 1950 with Pope Pius XII's encyclical *Humani generis* which provisionally declared the orthodoxy of evolutionary accounts of the origin of the human body In addition to providing details about Catholic evolutionists and the magisterium the book also reviews the treatment of the new ideas in Catholic encyclopedias periodicals and textbooks Although written in the first instance as a work of scholarship the book was also written with attention to the needs of scientists priests and members of the general public who are interested in the question

anyone and everyone who worked in the aeronautical field He made a point of continuing to learn throughout his own life and strongly believed in sharing knowledge while fostering and mentoring all those who were willing to learn **Between Science and Religion** Phillip M. Thompson, 2009-08-15 In exploring the role of Catholic intellectuals in engaging science and technology in the twentieth century this book initially provides a background context for this evolution by examining the Modernism crisis in the first chapter In order to unpack the subsequent evolution Thompson then concentrates in separate chapters on the distinctive contributions of four specific Catholic intellectuals Jacques Maritain 1882 1973 Pierre Teilhard de Chardin 1881 1955 Bernard Lonergan 1904 1984 and Thomas Merton 1915 1968 All of these intellectuals experienced some degree of official restraint in their efforts but through their distinctive intellectual trajectories they contributed to a different engagement of the Church with science and technology In the final chapters the book first reviews the changes within the institutional Church in the twentieth century toward science and technology Finally it then applies some key ideals of the four intellectuals to anneal and extend John Paul II s approach of critical openness to suggest how the Church can now engage science and technology **"Church and Age Unite!"** R. Scott Appleby, 1992 Sullivan published his Letters to His Holiness Pope Pius X repudiating Roman authority
