Volatility and friction in the age of disintermediation Tim Sweijs, Stephan De Spiegeleire , Sijbren de Jong, Willem Oosterveld , Hannes Roos, Frank Bekkers , Artur Usanov, Robert de Rave, Karlijn Jans , 2017-02-20 Events unfolded once again at a swirling pace in 2016 Terrorists hit Europe s capital in March The British population voted for Brexit in June Turkish armed forces failed to topple Erdo an in July A resurgent Russia flexed its military muscles again in the Middle East and actively interfered in American elections in which the American population elected Trump in November We are worried but certainly not surprised by the volatility of contemporary international relations In previous editions of our contribution to the Dutch government s Strategic Monitor we

already observed a surge in assertive behavior noted a dangerous uptick in crises and warned for the contagiousness of political violence The current volatility is not a coincidence but rather the result of fundamental disturbances of the global order that are greatly amplified by rapid technological developments Most mainstream explanations of recent turbulence focus on power transitions the decline of the West and the rise of the rest the concomitant return to more aggressive forms of power politics and a backlash against globalization What strikes us is that many of the explanations ignore what we consider one of the most striking mega trends that is reshaping the dynamics of power the ongoing process of disintermediation The StratMon 2016 2017 analyzes global trends in confrontation cooperation and conflict based on different datasets This year the report also contains case studies on Turkey Moldova and The rise and fall of ISIS Chapters analyzing the many faces of political violence and the other side of the security coin are also included **Weak Links** Stewart Patrick,2011-05-23

Conventional wisdom holds that weak and failing states are the source of the world s most pressing security threats However our assumptions are based on anecdotal arguments not on a systematic analysis Analyzing terrorism transnational crime WMDs pandemic diseases and energy insecurity Stewart Patrick shows that while some global threats do emerge in failed states most of their weaknesses create misery only for their own citizenry Moreover many threats originate farther up the chain in wealthier and more stable countries like Russia and Venezuela Weak Links will force policymakers to rethink what they assume about state failure and transnational insecurity *Global Proliferation of Weapons of Mass Destruction* United
