Shaheen, 1978 This first book length critical examination of nuclear war motion pictures feature films documentaries and educational short films in addition to recognizing a new film genre reflects an important era of modern film history Taken as a whole the 25 contributions by 21 film specialists brought together here provide a comprehensive view of 32 feature films documentaries and educational short films comprising a representative selection of the new genre all produced between 1946 and 1975 by American French British and Japanese film makers In addition to discussions of such well known films as *On the Beach* *Hiroshima Mon Amour* and *Dr Strangelove* the collection analyzes and comments on a number of less well known but important films such as *A Thousand Cranes* *Countdown to Zero* and *To Die To Live* documentaries and educational short films that hitherto have been inadequately presented in cinema literature Marshall Flaum one of the outstanding figures in the field of television documentaries has provided an unusually interesting Foreword and Jack Shaheen the editor of the volume has added a perceptive Preface and has appended a list of distributors and credits A major contribution to the serious study of the nuclear war film genre the book thus provides an analytic text with apparatus and notes and will be of interest to general readers as well as students of the film and film makers *Film and the Nuclear Age* Toni A. Perrine, 2019-01-22 Just as we generally pay scant attention to the potential dangers of nuclear power and nuclear war until quite recently scholars have made limited critical attempts to understand the cultural manifestations of the nuclear status quo Films that feature nuclear issues most often simplify and trivialize the subject They also convey a sense of the ambivalence and anxiety that pervades cultural responses to our nuclear capability The production of popular narrative films with nuclear topics largely conforms to periods of heightened nuclear awareness or fear such as the fear of fallout from nuclear testing manifested in the atomic creatures in science fiction movies of the late 1950s By their very numbers and through a set of recurring stylistic and narrative conventions nuclear films reflect a deep seated cultural anxiety This study includes detailed textual analysis of films that depict nuclear issues including the development and use of the first atomic bombs nuclear testing and the fear of fallout nuclear power the Cold War arms race loose nukes and future nuclear war and its aftermath Includes bibliographic references index filmography chronology Illustrated **The Films of the Eighties** William J. Palmer, 1995 In this remarkable sequel to his *Films of the Seventies A Social History* William J Palmer examines more than three hundred films as texts that represent revise parody comment upon and generate discussion about major events issues and social trends of the eighties Palmer defines the dialectic between film art and social history taking as his theoretical model the holograph of history that originated from the New Historicist theories of Hayden White and Dominick LaCapra Combining the interests and methodologies of social history and film criticism Palmer contends that film is a socially conscious interpreter and commentator upon the issues of contemporary social history In the eighties such issues included the war in Vietnam the preservation of the American farm terrorism nuclear holocaust changes in Soviet American

relations neoconservative feminism and yuppies Among the films Palmer examines are Platoon The Killing Fields The River Out of Africa Little Drummer Girl Kiss of the Spiderwoman Silkwood The Day After Red Dawn Moscow on the Hudson Troop Beverly Hills and Fatal Attraction Utilizing the principles of New Historicism Palmer demonstrates that film can analyze and critique history as well as present it

Deconstructing Dr. Strangelove Sean M. Maloney, 2020-07-01 King of the Cold War crisis film Dr Strangelove became a cultural touchstone from the moment of its release in 1964 The duck and cover generation saw it as a satire on nuclear issues and Cold War thinking Subsequent generations removed from the film's historical moment came to view it as a quasi documentary about an unfathomable secret world Sean M Maloney uses Dr Strangelove and other genre classics like Fail Safe and The Bedford Incident to investigate a curious pop cultural contradiction Nuclear crisis films repeatedly portrayed the failures of the Cold War's deterrent system Yet the system worked What does this inconsistency tell us about the genre What does it tell us about the deterrent system for that matter Blending film analysis with Cold War history Maloney looks at how the celluloid crises stack up against reality or at least as much of reality as we can reconstruct from these films with confidence The result is a daring intellectual foray that casts new light on Dr Strangelove one of the Cold War era's defining films

The Child in Post-Apocalyptic Cinema Debbie Olson, 2015-03-06 The child in many post apocalyptic films occupies a unique space within the narrative a space that oscillates between death and destruction faith and hope The Child in Post Apocalyptic Cinema interrogates notions of the child as a symbol of futurity and also loss By exploring the ways children function discursively within a dystopian framework we may better understand how and why traditional notions of childhood are repeatedly tethered to sites of adult conflict and disaster a connection that often functions to reaffirm the rightness of past systems of social order This collection features critical articles that explore the role of the child character in post apocalyptic cinema including classic recent and international films approached from a variety of theoretical methodological and cultural perspectives

Speculative fiction both science fiction and fantasy reflects among other things the fears of the culture that created it contributing perhaps unconsciously to our efforts to prevent our fears from coming true While the names and media change over time the themes of speculative fiction have a long history Nineteenth century works such as Frankenstein and The Invisible Man contain many of the same messages as the more modern tales of Terminator Jurassic Park and even Buffy the Vampire Slayer although almost a century separates their creation This critical study discusses the ways in which speculative fiction reflects societal fears and analyzes how such cautionary tales contribute to society's efforts to avoid the realization of these fears Beginning with a discussion of the nature of speculative fiction it takes a look at the characteristics of the cautionary tale The core of the book however is the concept of the Nightmares Model which examines and categorizes the repetition of specific themes within the genre The dangers of science and technology the perils of power and the threat of the unknown are discussed as recurrent themes within a variety of works in prose film and television Works analyzed range from Twenty Thousand Leagues Under the Sea to 2001 A Space Odyssey to The Blair Witch Project Sources include the author's own observations as a member of the genre's fandom a variety of published commentaries and the perspectives of contemporary professionals gained through personal interviews and panel discussions **Children's Films** Ian Wojcik-Andrews, 2002-09-09 This study examines children's films from various critical perspectives including those provided by classical and current film theory *Scientific Controversies* H. Tristram Engelhardt, Jr., Arthur L. Caplan, 1987-04-24 This collection of essays examines the ways in which disputes and controversies about the application of scientific knowledge are resolved Four concrete examples of public controversy are considered in detail the efficacy of Laetrile the classification of homosexuality as a disease the setting of safety standards in the workplace and the utility of nuclear energy as a source of power The essays in this volume show that debates about these cases are not confined to matters of empirical fact Rather as is seen with most scientific and technical controversies they focus on and are structured by complex ethical economic and political interests Drs Engelhardt and Caplan have brought together a distinguished group of scholars from the sciences and humanities who sketch a theory of scientific controversy and attempt to provide recommendations about the ways in which both scientists and the public ought to seek more informed resolutions of highly contentious issues in science and technology *Scientific Controversies* is offered as a contribution to the better understanding of the roles of both science and nonscientific interests in disputes and controversies pertaining to science and technology *World Politics on Screen* Mark A.

Sachleben, 2014-03-04 Increasingly resistant to lessons on international politics society often turns to television and film to engage the subject Numerous movies made in the twentieth and twenty first centuries reflect political themes that were of concern within the popular cultures of their times For example Norman Jewison's *The Russians Are Coming The Russians Are Coming* 1966 portrays the culture of suspicion between the United States and the Soviet Union during the Cold War while several of Alfred Hitchcock's movies as well as the John Wayne film *Big Jim McLain* 1952 and John Milius's *Red Dawn* 1984 helped to raise and sustain skepticism about the Soviet Union World Politics on Screen Understanding International Relations through Popular Culture uses films and television shows like these as well as contemporary including 24 *The Simpsons* *South Park* and *The Daily Show* to guide readers to a deeper understanding of enduring issues in international politics In this unique and insightful volume author Mark Sachleben demonstrates that popular culture reflects societal beliefs about the world and that the messages captured on television and film transcend time and place Using films such as *Secret Ballot* 2001 *Under the Bombs* 2007 and *Wall E* 2008 he addresses topics such as international relations and diplomacy the study of war nuclear weapons poverty immigration and emigration human rights and genocide An engaging read for students and for anyone with a general interest in politics and popular culture World Politics on Screen succeeds in its argument by illuminating unexplored assumptions about international policy *Historical Dictionary of Science Fiction Cinema* M. Keith Booker, 2020-06-15 In the years since Georges Méliès's *Le voyage dans la lune* *A Trip to the Moon* was released in 1902 more than 1000 science fiction films have been made by filmmakers around the world The versatility of science fiction cinema has allowed it to expand into a variety of different markets appealing to age groups from small children to adults The technical advances in filmmaking technology have enabled a new sophistication in visual effects This second edition of *Historical Dictionary of Science Fiction Cinema* contains a chronology an introduction and an extensive bibliography The dictionary section has over 400 cross referenced entries on important personalities films companies techniques themes and subgenres This book is an excellent resource for students researchers and anyone wanting to know more about science fiction cinema **The Hollywood War Film** Robert Eberwein, 2009-08-25 The Hollywood War Film offers readers a lively introduction to the theory history stars and major films constituting this vital genre from Hollywood's earliest days to the current moment Combines broad historical and theoretical coverage of the genre with in depth analysis of specific films Includes chapters on *All Quiet on the Western Front* World War II combat films *Platoon* and *Full Metal Jacket* Eastwood's *Iwo Jima* films and Iraq war films An ideal text for perennially popular courses on the war film genre [Focus On: 100 Most Popular Films Based on British Novels](#) Wikipedia contributors,
