that NASA select two new missions to be included in its New Frontiers program which explores the solar system with frequent mid size spacecraft missions If NASA cannot stay within budget for any of these proposed flagship projects it should focus on smaller less expensive missions first Vision and Voyages for Planetary Science in the Decade 2013 2022 suggests that the National Science Foundation expand its funding for existing laboratories and establish new facilities as needed It also recommends that the program enlist the participation of international partners This report is a vital resource for government agencies supporting space science the planetary science community and the public **Planetary Astronomy** National Research Council (U.S.). Panel on Planetary Astronomy,1688 Preventing the Forward Contamination of Mars National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Preventing the Forward Contamination of Mars,2006-04-22 Recent spacecraft and robotic probes to Mars have yielded data that are changing our understanding significantly about the possibility of existing or past life on that planet Coupled with advances in biology and life detection techniques these developments place increasing importance on the need to protect Mars from contamination by Earth borne organisms To help with this effort NASA requested that the NRC examine existing planetary protection measures for Mars and recommend changes and further research to improve such measures This report discusses policies requirements and techniques to protect Mars from organisms originating on Earth that could interfere with scientific investigations It provides recommendations on cleanliness and biological burden levels of Mars bound spacecraft methods to reach those levels and research to reduce uncertainties in preventing forward contamination of Mars *NASA Technical Memorandum* ,1992 *Planetary Cartography and GIS* Henrik Hargitai,2019-02-22 This book approaches geological geomorphological and topographical mapping from the point in the workflow at which science ready datasets are available Though there have been many individual projects on dynamic maps and online GISs in which coding and data processing are given precedence over cartographic principles cartography is more than just processing and displaying spatial data However there are currently no textbooks on this rapidly changing field and methods tend to be shared informally Addressing this gap in the literature the respective chapters outline many topics pertaining to cartography and mapping such as the role and definition of planetary cartography and vs Geographic Information Science theoretical background and practical methodologies in geological mapping science ready versus public ready products a goal procedure focused practical manual of the most commonly used software in planetary mapping which includes generic ArcGISand its extensions JMARS and specific tools HiView Cratertools etc extracting topographic information from images thematic mapping climate geophysics surface modeling change detection landing site selection shared maps dynamic maps on the web planetary GIS interfaces crowdsourcing crater counting techniques irregular bodies geological unit symbology mapping center activities and web services All chapters were prepared by authors who have actually produced geological maps or GISs for NASA the USGS DLR ESA or MIIGAIIK Taken together they offer an excellent resource for all planetary scientists whose research depends on

mapping and for students of astrogeology **New Perspectives in Basin Analysis** Karen L. Kleinspehn,Chris Paola,2012-12-06 In the extensive field of earth sciences with its many subdisciplines the transfer of knowledge is primarily established via personal communication during meetings by reading journal articles or by consulting books Because more information is available than can be assimilated it is necessary for the individual to search selectively Books take more time from the inception of an idea until publication than any of the other means of communication mentioned As a consequence their function is somewhat different Many good books are a compilation of up to date knowledge and serve as reference or instruction manuals Some books are a collection of previously published papers dealing with a certain topic while others may basically provide large sets of data or examples The Frontiers in Sedimentary Geology series was established both for students and practicing earth scientists who wish to either stay abreast of the most recent ideas or developments or to become familiar with an important topic in the field of sedimentary geology The series attempts to deal with subjects that are in the forefront of both scientific and economic interest The treatment of a subject in an individual volume should be a combination of topical regional and interdisciplinary approaches Although these three terms can be defined separately in reality they should flow into each other A topical treatment should relate to a major category of sedimentary geology *Technology and Management Assistance Programs of the Small Business Administration* United States. Congress. Senate. future behavior to the extent possible in order to effectively manage resources successfully respond to threats from natural and human induced environmental change and capitalize on the opportunities social economic security and more that such knowledge can bring By continuously monitoring and exploring Earth developing a deep understanding of its evolving behavior and characterizing the processes that shape and reshape the environment in which we live we not only advance knowledge and basic discovery about our planet but we further develop the foundation upon which benefits to society are built Thriving on Our Changing Planet presents prioritized science applications and observations along with related strategic and programmatic guidance to support the U S civil space Earth observation program over the coming decade
