Planned Migration William Petersen, 1955 **Mennonites, Politics, and Peoplehood** James Urry, 2011-07-15
Mennonites and their forebears are usually thought to be a people with little interest or involvement in politics Mennonites Politics and Peoplehood reveals that since their early history Mennonites have in fact been active participants in worldly politics From western to eastern Europe and through different migrations to North America James Urry's meticulous research traces Mennonite links with kingdoms empires republics and democratic nations in the context of peace war and revolution Urry stresses a degree of Mennonite involvement in politics not previously discussed in literature including Mennonite participation in constitutional reform and party politics and shows the polarization of their political views from conservatism to liberalism and even revolutionary activities Urry looks at the Mennonite reaction to politics and political events from the Reformation onwards and focuses particularly on those people who settled in Russia and their descendants who came to Manitoba Using a wide variety of sources Mennonites Politics and Peoplehood combines an interdisciplinary approach to reveal that Mennonites far from being the Quiet in the Land have deep roots in politics **Ethnicity Counts** William Petersen, 2012-01-01 Official statistics about ethnicity in advanced societies are no better than those in less developed countries An open industrial society is inherently fluid and it is as hard to interpret social class and ethnic groups there as in a nearly static community In consequence the collection and interpretation of ethnic statistics is frequently a battleground where the groups being counted contest each element of every enumeration William Petersen describes how ethnic identity is determined and how ethnic or racial units are counted by official statistical agencies in the United States and elsewhere The chapters in this book cover such topics as Identification of Americans of European Descent Differentiation among Blacks Ethnic Relations in the Netherlands Two Case Studies Japan and Switzerland and Who is a Jew Petersen argues that the general public is overly impressed by assertions about ethnicity particularly if they are supported by numbers and graphs The flood of American writings about race and ethnicity gives no sign of abatement Ethnicity Counts offers an indispensable background to meaningful interpretation of statistics on ethnicity and will be important to sociologists historians policymakers and government officials *Pilgrims in Lotus Land* Robert K. Burkinshaw, 1995-05-05 Burkinshaw traces the growth of conservative Protestantism in British Columbia from its clashes with liberal Protestants in the early

twentieth century through the post World War II years when a bewildering variety of smaller groups including Baptist and Pentecostal denominations as well as Mennonite Reformed and Evangelical Free churches became important to the 1970s when the majority of worshipping Protestants belonged to evangelical groups He examines the factors that made evangelicalism more adaptable to changes in the geographic ethnic and social distribution of the province's population and argues that while the evangelical movement in BC was influenced by American fundamentalism it was not simply an extension of the American campaign He also examines the impact of evangelicals on provincial politics most particularly their role in the rise of the Social Credit Party Burkinshaw provides a wealth of new information on the phenomenon of twentieth century evangelicalism and challenges us to rethink the nature of religious conservatism *Against the Stream* William Petersen, 2017-07-05 With the insight and clarity that mark all of Petersen's writings *Against the Stream* brings together reflections of an unconventional demographer Thirteen essays on various topics become a cohesive unit by virtue of the author's unique point of view and the understanding of contemporary events he has gathered in his long mastery of demography is evident in this volume In a brief introduction the author points out that the viewpoints he expresses in the volume are unorthodox He covers a variety of topics Chapter 1 examines utopian thought which Petersen notes usually gets good press that in his view is undeserved Chapter 2 discusses planned communities and suburbanization beginning with two famous utopias presented in books by Edward Bellamy and Ebenezer Howard which had significant influence on American and British societies Chapter 3 analyzes the perennial topic of how the balance between people and their sustenance will evolve Chapter 4 critically explores Durkheim's analysis of suicide Chapters 5 and 6 analyze the culture language and geographical positions of the individual countries of Belgium and Canada providing a fresh outlook on these routine topics Chapters 7 and 8 evaluate rebellious Berkeley students and adolescent student rebels in general as the juvenile delinquents that they often are Chapter 9 discusses the anti urban bias of the mainline American Churches Chapter 10 traces the historical roots of Christian holidays pointing out their significant links with prior religions Chapter 11 critically examines the history of the English language as a guide to current usage Chapters 12 and 13 survey two widely misunderstood demographic topics the cause of death and obesity and provide some stimulating new ideas This latest work by a distinguished demographer is a tightly knit compact volume a compendium of thought written in a nontechnical manner and about various subjects that will both interest the general

Equity, Social Determinants and Public Health Programmes World Health Organization, 2010 Description of WHO's major health programmes with particular reference to patterns of inequity and the identification of social determinants Identifies promising interventions and ways of reducing obstacles to better health both within countries and between countries *The World in a City* Paul Anisef, C. Michael Lanphier, 2003-01-01 Toronto is perhaps the most multicultural city in the world The process of settlement and integration in modern day Toronto is however more difficult for recent immigrants than it was for those newcomers arriving in previous

decades Many challenges face newly settled immigrants top among them access to healthcare education employment housing and other economic and community services The concept of social exclusion opens up promising ways to analyze the various challenges facing newcomers and The World in a City explores Toronto s ability to sustain a civic society This collection of essays highlights why the need to pay more attention to certain at risk groups and the importance of adapting policy to fit the changing settlement and clustering patterns of newcomers is of crucial importance The authors findings demonstrate that there are many obstacles to providing opportunity for immigrants low resource bases in particular Toronto they suggest does not provide a level playing field for its newly arrived inhabitants and in failing to recognize the particular needs of new communities fails to ensure a growth that would be of immense benefit to the city as a whole Dutch Calvinism in Modern America James D. Bratt,2002-12-30 In this scholarly yet entertaining book James D Bratt takes a look at the Dutch in America from the late 19th century to the present A comprehensive study of an ethnic subculture the book is in large part a study of the group s religious history as well since as Bratt points out the contours of the Dutch presence in America have been overwhelmingly shaped by the church and its subsidiary organizations Although the book is extensively and scrupulously documented Bratt has infused his scholarship with a considerable amount of anecdote that is by turns poignant and tragic and hilarious In Bratt s analysis of the fitful progress of Americanization that this close knit religious community has undergone we are treated to the sharp insights of a bemused and sometimes disaffected insider Included is a chapter on novelists Arnold Mulder David Cornel DeJong Frederick Manfred and Peter DeVries four sons of the Dutch who fled the subculture only to reflect upon it almost obsessively from the outside Well written scholarly and highly readable Dutch Calvinism In Modern America will have wide appeal among both academic and general readers Canadian Society: Sociological Perspectives NA NA,2015-12-29 **An Economic and Social History of the Netherlands, 1800-1920** Michael Wintle,2000-09-21 An Economic and Social History of the Netherlands 1800 1920 provides a comprehensive account of Dutch history from the late eighteenth to the early twentieth century examining population and health the economy and socio political history The Dutch experience in this period is fascinating and instructive the country saw extremely rapid population growth awesome death rates staggering fertility some of the fastest economic growth in the world a uniquely large and efficient service sector a vast and profitable overseas empire characteristic pillarization and relative tolerance Michael Wintle also examines the lives of ordinary people what they ate how much they earned what they thought about public affairs and how they wooed and wed This book will be of central importance to Dutch specialists as well as European historians more generally Creating Mixed Communities through Housing Policies Anna Maria Santiago,Iris Levin,Kathy Arthurson,2024-02-08 This book focuses on socially mixed e g by income tenure ethnicity or any other characteristic communities developed through housing renewal and critically examines the policies and practices in view of the growing urban inequality The volume expands the discussion to the second phase of social mix social mix version 2 0 and offers

constructive reflections on how social mix can be better conceived and delivered with fewer negative side effects. The chapters in this book cover diverse national contexts and policy backgrounds and represent the perspectives of many key stakeholders including national and local governments, services and NGOs, developers and most importantly residents. Chapters present diverse case studies from Europe, the Middle East, Africa, India, Australia and the United States and discuss projects that range in scale from small housing initiatives to neighborhoods and to whole districts. They focus on diverse experiences of social mix between university students and young professionals and low income social housing tenants between older low income residents and younger middle class residents between diverse ethnic and social class groups sharing a neighborhood and between private and public housing residents. Chapters also vary on the tools used to create social mix from local non for profit initiatives, a national policy intervention and urban policies that aim to enhance social mix. Lastly, the book shows the range of analytical tools researchers have used to understand the diverse appearances of social mix, its underlying goals and its consequent outcomes. These include comparative analyses of social mix in diverse national and political settings including the Global East, an evaluation of social mix from the perspective of social justice, a historical analysis of the development of an urban district and a design analysis of urban renewal projects. The chapters in this book were originally published as a special issue of *Journal of Urban Affairs*.

Readings in the Sociology of Migration Clifford J. Jansen, 2016-04-20. *Readings in the Sociology of Migration* deals with migration as a sociological problem with greater emphasis on internal migrations than on international migrations. Some of the problems covered by sociological inquiry in the study of migration are discussed along with theories of migration such as the push pull theory, differential migration and motivation for migration. This book is comprised of 16 chapters and opens by outlining types of migration according to the professional and social composition of migrants: mass migration, economic migration from an underdeveloped country, economic emigration from an industrial country and immigration into an industrial nation. A general typology of migration is then presented before the problem of migration in various countries such as Britain, France, Italy, Spain, Sweden and the United States is considered. The final chapter presents preliminary findings from a demographic and socioeconomic sample survey of the population of the metropolitan area of San Salvador, El Salvador. This monograph will be a useful resource for sociologists and policymakers concerned with migration.
