Planning Matters The Impact Of Development Planning In Primary Schools:

Planning Matters Barbara MacGilchrist, Peter Mortimore, Jane Savage, Charles Beresford, 1995-09-28 Informative reading for those governors who may wish to gain insight in to this area of school planning Teacher Development Development plans have become a feature of almost every school in the UK and most policy makers and practitioners assume that by having such a plan a school will become more effective But do they really make a difference What impact does a development plan have on the management and organisation of the school on the professional development of teachers and most importantly on pupils learning in the classroom Can the development planning process be used as a school improvement strategy or would schools be better investing their time and energy in other ways Strategic Direction and Development of the School

Improvement David Hopkins, 2008-05-13 ANDY HARGREAVES Department of Teacher Education Curriculum and Instruction Lynch School of Education Boston College MA U S A ANN LIEBERMAN Carnegie Foundation for the Advancement of Teaching Stanford CA U S A MICHAEL FULLAN Ontario Institute for Studies in Education University of Toronto Canada DAVID HOPKINS Department for Education and Skills London U K This set of four volumes on Educational Change brings together evidence and insights on educational change issues from leading writers and researchers in the field from across the world Many of these writers whose chapters have been specially written for these books have been investigating helping initiate and implementing educational change for most or all of their lengthy careers Others are working on the cutting edge of theory and practice in educational change taking the field in new or even more challenging directions And some are more skeptical about the literature of educational change and the assumptions on which it rests They help us to approach projects of understanding or initiating educational change more deeply reflectively and realistically Educational change and reform have rarely had so much prominence within public policy in so many different places Educational change is ubiquitous It figures large in Presidential and Prime Ministerial speeches It is at or near the top of many National policy agendas Everywhere educational change is not only a policy priority but also major public news Yet action to bring about educational change usually exceeds people s understanding of how to do so effectively **Senior**

District Leadership Matters Bruce Sheppard, Jean Brown, David Dibbon, 2009-03-08 School District Leadership Matters challenges policy makers administrators and academics in the field of educational leadership to reassess their traditional approaches to learning working and planning The authors believe that government restructuring standards based reforms and centrally imposed strategic planning have been painfully ineffective As a consequence student learning has become increasingly superficial and inauthentic This book bridges the traditional divide between the generalizations of social science theory on the one hand and the world of educational practice on the other It argues that a more promising approach to education reform is through effective school district leadership Sheppard Brown and Dibbon draw on their collective experience both as educational leaders and researchers of leadership having spent five years researching and working in one school district Here they show how a district superintendent can successfully navigate the paradoxes and challenges of facilitating collaborative leadership in a school district with a traditionally hierarchical organizational structure As a conclusion to their work the authors highlight what they call five recognitions that deepen readers understanding of school district leadership They illuminate too ways that senior level practitioners can apply theory to practice in order to break down the traditional hierarchical bureaucracies that inhibit learning and create professional learning communities School District Leadership Matters urges researchers graduate students practitioners and policymakers to focus on improving authentic learning for all students and argues that the best hope rests with effective school district leadership This empirically based yet practical book provides new insights and questions for academic researchers and will inspire policy makers and practitioners to imagine what could be and to work towards it **Leading Primary School Improvement**

out to advance our understanding of strategy and school leadership in managerialist times Despite maintain a primarily scholarly focus as such a focus is exceedingly important for the advancement of any domain of inquiry it is also recognised that many of the ideas discussed have profound practical significance for schools and those who lead and manage them The arguments in this book particularly those in the latter chapters seek to expand the horizons of scholarship and understanding on the topic of strategy and school leadership Although this should not be interpreted as a prescriptive call for how further inquiry should be undertaken it is but one voice in the conversation The reviews studies analysis and proposed research programme of this book argue that the strategies of school leaders are of considerable theoretical and practical importance to schools the governance of schooling and the behaviour and performance of schools While this book offers a blueprint for further inquiry it remains for the reader to accept the challenge Doing so will enable important new insights into strategy and school leadership
