Planning The Use Of The Earth's Surface:

Planning the Use of the Earth's Surface Antonio Cendrero, Gerd Lüttig, Fredrik C. Wolff, 2006-04-11 The purpose of this book is to analyse and discuss a series of topics related with environmental conservation land use planning and management and impact prevention as seen from the perspective of the Earth Sciences but with an integrated interdisciplinary approach The contributions included in the book intend to give an overview of existing problems and trends and to point out certain lines along which work and or actions will be particularly needed in the near future In short they intend to show where we stand now with regard to those problems and in what direction we should move Readers will find particularly useful the brief presentation of a variety of important environmental earth science topics the description of the present state of the art and the suggestions for methodological approaches to solve different problems as well as the guidelines for action presented throughout the book

Advancing Earth Surface Representation via Enhanced Use of Earth Observations in Monitoring and Forecasting Applications Gianpaolo Balsamo, Fatima Karbou, Vanessa M. Escobar, Benjamin Ruston, Susanne Mecklenburg, Matthias Drusch, Isabel F. Trigo, 2019-08-23 The representation of the Earth's surface in global monitoring and forecasting applications is moving towards capturing more of the relevant processes while maintaining elevated computational efficiency and therefore a moderate complexity These schemes are developed and continuously improved thanks to well instrumented field sites that can observe coupled processes occurring at the surface atmosphere interface e.g. forest grassland cropland areas and diverse climate zones Approaching global kilometer scale resolutions in situ observations alone cannot fulfil the modelling needs and the use of satellite observation becomes essential to guide modelling innovation and to calibrate and validate new parameterization schemes that can support data assimilation applications In this book we review some of the recent contributions highlighting how satellite data are used to inform Earth surface model development vegetation state and
