Planting The Grassroots Structuring Citizen Participation:

Planting the Grassroots Steven H. Haeberle, 1989 The reasons for the success or failure of neighborhood organizing efforts have been a persistent concern of policymakers and political analysts for decades However most studies of the subject have been limited in their ability to offer generalizations beyond their target area due to the constraints of local conditions or idiosyncratic group histories This volume employs a case study of Birmingham Alabama s successful citizen participation program to examine the dynamics of grassroots political activity and the techniques that are effective in promoting such activity As Haeberle demonstrates the Birmingham neighborhood associations have the same rules structure and reliance on outside assistance and are numerous enough to facilitate statistical analysis thus offering an unusual opportunity to separate some of the long term issues of organizational development from those that are more ephemeral **Planting the Grassroots** relies on interviews with neighborhood presidents and with city decisionmakers involved in creating the Program archival data collected on participation in neighborhood elections and census data Beginning with an overview of the origins of Birmingham neighborhood activity Haeberle goes on to address the determinants of neighborhood activity and the effects of neighborhood participation He examines why the programs were especially successful in certain neighborhoods how the city structured neighborhood groups to achieve maximum participation and the associations abilities to stimulate activity beyond their own volunteer groups The final section of the book looks at neighborhood organizations in the large context of city politics and especially at the role of the local neighborhood association in dealing with urban race relations

The Most Segregated City in America Charles E. Connerly, 2013-07-04 One of Planetizen s Top Ten Books of 2006 But for Birmingham Fred Shuttleworth recalled President John F Kennedy saying in June 1963 when he invited black leaders to meet with him we would not be here today Birmingham is well known for its civil rights history particularly for the violent white on black bombings that occurred there in the 1960s resulting in the city s nickname Bombingham What is less well known about Birmingham s racial history however is the extent to which early city planning decisions influenced and prompted the city s civil rights protests The first book length work to analyze this connection **The Most Segregated City in America** City Planning and Civil Rights in Birmingham 1920 1980 uncovers the impact of Birmingham s urban planning decisions on its black communities and reveals how these decisions led directly to the civil rights movement Spanning over sixty years Charles E Connerly s study begins in the 1920s when Birmingham used urban planning as an excuse to implement racial zoning laws pointedly sidestepping the 1917 U S Supreme Court *Buchanan v Warley* decision that had struck down racial zoning The result of this obstruction was the South s longest standing racial zoning law which lasted from 1926 to 1951 when it was redeclared unconstitutional by the U S Supreme Court Despite the fact that African Americans constituted at least 38 percent of Birmingham s residents they faced drastic limitations to their freedom to choose where to live When in the 1940s they rebelled by attempting to purchase homes in off limit areas their efforts were labeled as a challenge to city planning resulting

in government and court interventions that became violent More than fifty bombings ensued between 1947 and 1966 becoming nationally publicized only in 1963 when four black girls were killed in the bombing of the Sixteenth Street Baptist Church Connerly effectively uses Birmingham s history as an example to argue the importance of recognizing the link that exists between city planning and civil rights His demonstration of how Birmingham s race based planning legacy led to the confrontations that culminated in the city s struggle for civil rights provides a fresh lens on the history and future of urban planning and its relation to race

Berry, 2002-09-13 In an era when government seems remote and difficult to approach participatory democracy may seem a hopelessly romantic notion Yet nothing is more crucial to the future of American democracy than to develop some way of spurring greater citizen participation In this important book Jeffrey Berry Ken Portney and Ken Thompson examine cities that have created systems of neighborhood government and incorporated citizens in public policymaking Through careful research and analysis the authors find that neighborhood based participation is the key to revitalizing American democracy The Rebirth of Urban Democracy provides a thorough examination of five cities with strong citizen participation programs Birmingham Dayton Portland St Paul and San Antonio In each city the authors explore whether neighborhood associations encourage more people to participate whether these associations are able to promote policy responsiveness on the art of local governments and whether participation in these associations increases the capacity of people to take part in government Finally the authors outline the steps that can be taken to increase political participation in urban America Berry Portney and Thomson show that citizens in participatory programs are able to get their issues on the public agenda and develop a stronger sense of community greater trust in government officials and more confidence in the political system From a rigorous evaluation of surveys and interviews with thousands of citizens and policymakers the authors also find that central governments in these cities are highly responsive to their neighborhoods and that less conflict exists among citizens and policymakers The authors assert that these programs can provide a blueprint for major reform in cities across the country They outline the components for successful participation programs and offer recommendations for those who want to get involved They demonstrate that participatio

Crowley, 2005-11-04 In urban America large scale redevelopment is a frequent news item Many proposals for such redevelopment are challenged sometimes successfully and other times to no avail *The Politics of Place* considers the reasons for these outcomes by examining five cases of contentious redevelopment in Pittsburgh Pennsylvania between 1949 and 2000 In four of these cases the challengers to redevelopment failed to create the conditions necessary for strong democratic participation In the fifth case the proposed reconstruction of Pittsburgh's downtown retail district 1997-2000 challengers succeeded and Crowley describes the crucial role of independent nonprofit organizations in bringing about this result At the heart of Crowley's discussion are questions central to any urban redevelopment debate Who participates in urban redevelopment what motivates them to do so and what structures in the political process open or close a democratic dialogue among the stakeholders Through his astute analysis Crowley answers these questions and posits a framework through which to view future contention in urban redevelopment *Race Rebels* Robin D. Culture Wars and Local Politics Elaine B. Sharp, 1999 This collection offers alternative explanations of local actions with a focus on conflict It features examples of experiences selected from various cities It examines how the responses of local governments to specific issues are influenced by such factors as political culture and institutions Politics and Welfare in Birmingham, 1900-1975 Edward Shannon LaMonte, 2015-09-15 This well written volume explores the relationships between politics and welfare programs for low income residents in Birmingham during four periods in the twentieth century 1900 1917 the formative period of city building when welfare was predominantly a responsibility of the private sector 1928 1941 when the Great Depression devastated the local economy and federal intervention became the principal means of meeting human need the mid 1950s when the lasting impacts of the New Deal could be assessed and when matters of race relations became increasingly significant 1962 1975 when an intense period of local government reform the Civil Rights movement federal intervention in the form of the War on Poverty and increasing demands for citizen participation all reinforced one another From the time of its founding in 1871 Birmingham has had a biracial population so the theme of race relations runs naturally throughout the narrative LaMonte pays particular attention to those efforts to achieve a more harmonious biracial community including the failed effort to establish an Urban League in the 1940s the progressive activities of the Community Chest's Interracial Division in the 1950s which were abruptly terminated and the dramatic events of the Civil Rights Movement in the 1960s when local events were elevated to international significance **Boston University Journal of Science & Technology Law** Boston University.
