**Rehabilitation and Treatment of Head and Neck Cancer** Eugene N. Myers, Ivan Barofsky, Jerome William Yates, 1986 This monograph is the result of a workshop entitled Head and Neck Cancer Integration of Treatment and Rehabilitation which was held in January 1984 and sponsored by the National Cancer Institute The purpose of the workshop was to review past research directions focused on head and neck cancer and set new goals where appropriate As discussed at the meeting the goal of integrating treatment and rehabilitation is to prevent or minimize the physical cosmetic or functional disability and the emotional sequelae commonly associated with head and neck cancer and its treatment The meeting afforded an opportunity for a diverse group of professionals to exchange ideas and information on effective and desirable methods of treatment and rehabilitation for head and neck cancer patients Papers were presented and discussions were held with the aim of identifying and resolving some of the problems faced by those who make treatment decisions and provide care for these patients This workshop highlighted the need for an integration of multi disciplinary rehabilitation planning at the time of initial treatment for head and neck cancer It also demonstrated major deficiencies in objective outcome measures used to assess physiological and social function over and above the usual measures of patient survival Centers which provide multidisciplinary patient management programs and follow adequate patient populations thus assuring management proficiency provide the best means of avoiding many of the pitfalls that threaten patients who are managed by a single physician and exposed sequentially to other disciplines only when problems develop Few other cancers demonstrate the need for anticipatory treatment and rehabilitation to the magnitude required in the management of head and neck cancer

**Path-Breaking Work in Plastic and Reconstructive Microsurgery** Doina

Dumitrescu-Ionescu,2020-02-25 Path Breaking Work in Plastic and Reconstructive Microsurgery by Dr Doina Dumitrescu Ionescu was reviewed by David Soutar for The Royal College of Surgeons of England This is a refreshingly original and unusual text It is a testament to the life work of the author and her struggle to develop clinical microsurgery in Rumania It takes the reader on a journey starting with learning the basic techniques of microsurgery laboratory and experimental research teaching and training It then progresses to the building of an infrastructure for development and clinical practice the maintenance of meticulous records and the evaluation of results As such the book is a very personal account written in an informal style so that the reader can follow the author s own development and experience The format is unusual beginning with the author s philosophy for developing reconstructive microsurgery It then covers personal techniques developed for peripheral techniques developed for peripheral nerve repairs and microvascular anastomosis It is clear from early on in this book that the author s main interest lies in the management of peripheral nerves particularly in the limbs There is a section on reconstructive microsurgery of the brachial plexus following trauma and a section on limb replantation Says the author The reconstructive microsurgery experience helped me to modernize reparative plastic surgery in Romania in reconstructive plastic surgery and reconstructive microsurgery by radically changing the surgical approach This allowed also for new procedures in Dupuytren s Disease Volkmann and post burn contractures approach revolutionizing everything that was repair surgery of any extremity cephalic superior inferior but also the extension of reconstructions in the large defects of suprascheletal soft parts
