Poland Into The 1990s:

Poland Into the New Millennium Ryszard Rapacki, George Blazycha, 2001-01-01 It is a widely held belief that the Polish experience of system transformation following the final collapse of socialism in 1989 is one of the best This text surveys Poland's post communist transformation as it prepares for the new century Output Decline in Hungary and Poland in 1990-91 Simon Commander, Fabrizio Coricelli, 1992 Two different paths to reform appears to have led to two different outcomes in economic performance What are the lessons **Poland in the Single Market** Anna Visvizi, Anna Matysek-Jędrych, Katarzyna Mroczek-Dąbrowska, 2020-10-21 By all accounts the case of Poland and its segue to market economy and democracy is a success story 30 years of uninterrupted growth and development infrastructure expansion and modernization of the economy and society Epochal changes have unfolded in a timespan of merely three decades Change has taken place so fast that children born in late 1980s and onwards cannot remember what life in Poland under communism was like and cannot relate to it Also many elderly people easy victims of romanticizing their own youth tend to forget As a result the uniqueness of Polish transition and transformation the boldness and efficiency of reforms and the success that Polish society mastered together tend to be undermined today both domestically and internationally Poland has now been a member of the EU for more than 15 years During that time Poland's image on the EU scene evolved from newcomer through model child champion of growth to in some respects a maverick This volume's objective is to remind society old and young researchers scholars and practitioners that Poland's success is an outcome of well thought out and bold structural reforms implemented in a swift and timely manner of society's support for these reforms and of third actors benign assistance Looking back on the 30 years since the collapse of communism and at the over 15 years of EU membership this book offers an interdisciplinary comprehensive and critical insight into factors and processes that have led to today's Poland **OECD Environmental Performance Reviews: Poland 2003** OECD, 2003-06-17 This review of Poland's environmental conditions and policies evaluates progress in reducing the pollution burden improving natural resource management integrating environmental and economic policies and strengthening international co operation Change and Continuity in Poland's Environmental Policy Andersson, 2013-03-14 **Poland in the Geographical Centre of Europe** Mirosława Czerny, 2006 Poland lies at the very centre of the European continent From the early 1990s on it was possible to discern certain phenomena that were an outcome of either earlier decisions taken by the communist authorities or else part of what the communists had inherited from earlier times This book looks into these areas Minerals Yearbook, 1991 **France and the German Question, 1945-1990** Frédéric Bozo, Christian Wenkel, 2019-07-12 In the immediate aftermath of World War Two the victors were unable to agree on Germany's fate and the separation of the country the result of the nascent Cold War emerged as a de facto if provisional settlement Yet East and West Germany would exist apart for half a century making the German question a central foreign policy issue and given the war torn history between the two countries this was felt no

more keenly than in France Drawing on the most recent historiography and previously untapped archival sources this volume shows how France's approach to the German question was for the duration of the Cold War both more constructive and consequential than has been previously acknowledged

Competitiveness and Economic Development in Europe
Sławomir I. Bukowski, Alina Hyz, Marzanna B. Lament, 2021-04-11 The success of an economy to adapt quickly flexibly and effectively to the demands of the changing international economic environment can only be investigated using the achievements of other national economies or regions as a benchmark This book analyzes the fundamental factors of competitiveness which will in turn facilitate economic development and growth in the new post crisis environment In the economic social legal and technological environment that has emerged in recent years as well as in the period after the recent financial crisis it is critical to define assess and implement new pathways to competitiveness and economic development The book covers all aspects of competitiveness and economic growth from financial intermediaries to tourism and the digital economy and from regulation and corporate governance to exchange rate dynamics and monetary policy issues It uses empirical findings from a variety of different countries with divergent economic structures and policies It examines the new system of production and the technological commercial financial and institutional environment with the aim of recommending a proportional division of benefits and costs of economic growth It offers a fresh holistic and flexible concept to underscore the new relationship between competitiveness and economic growth Such an approach is needed whereby competitiveness is no longer a zero sum game between countries but is achievable for all countries The book recommends future directions and offers policy solutions and as such will appeal to students researchers and policymakers as well as those interested in the role of competitiveness in the operation of markets productivity and economic development and how it might foster innovation and growth

Problems of Communism, 1991-05 **Migration, Refugee Policy, and State Building in Postcommunist Europe**
Oxana Shevel, 2011-10-24 Why do similar postcommunist states respond differently to refugees Why do some states privilege certain refugee groups while other states do not This book presents a theory to account for this puzzle and it centers on the role of the politics of nation building and of the office of the UN High Commissioner for Refugees UNHCR A key finding of the book is that when the boundaries of a nation are contested and thus there is no consensus on which group should receive preferential treatment in state policies a political space for a receptive and nondiscriminatory refugee policy opens up The book speaks to the broader questions of how nationalism matters after communism and under what conditions and through what mechanisms international actors can influence domestic policies The analysis is based on extensive primary research the author conducted in four languages in the Czech Republic Poland Russia and Ukraine
