Biopolitics in Central and Eastern Europe in the 20th Century Barbara

Klich-Kluczevska, Joachim von Puttkamer, Immo Rebitschek, 2022-10-21 The field of biopolitics encompasses issues from health and hygiene birth rates fertility and sexuality life expectancy and demography to eugenics and racial regimes This book is the first to provide a comprehensive view on these issues for Central and Eastern Europe in the twentieth century The cataclysms of imperial collapse World War I and the Holocaust but also the rise of state socialism after 1945 provided extraordinary and distinct conditions for the governing of life and death The volume collects the latest research and empirical studies from the region to showcase the diversity of biopolitical regimes in their regional and global context from hunger relief for Hungarian children after the First World War to abortion legislation in communist Poland It underlines the similarities as well demonstrating how biopolitical strategies in this area often revolved around the notion of an endangered nation and how ideological schemes and post imperial experiences in Eastern Europe further complicate a western understanding of democratic participatory and authoritarian repressive biopolitics The new geographical focus invites scholars and students of social and human sciences to reconsider established perspectives on the history of population management and the history of Europe

Coercion and Wage Labour Anamarija Batista, Viola Franziska Müller, Corinna Peres, 2023-12-07 Coercion and Wage Labour presents novel histories of people who experienced physical social political or cultural compulsion in the course of paid work Broad in scope the chapters examine diverse areas of work including textile production war industries civil service and domestic labour in contexts from the Middle Ages to the present day They demonstrate that wages have consistently shaped working people's experiences and failed to protect workers from coercion Instead wages emerge as versatile tools to bind control and exploit workers Remuneration mirrors the distribution of power in labour relations often separating employers physically and emotionally from their employees and disguising coercion The book makes historical narratives accessible for interdisciplinary audiences Most chapters are preceded by illustrations by artists invited to visually conceptualise the book's key messages and to emphasise the presence of the body and landscape in the realm of work In turn the chapter texts reflect back on the artworks creating an intense intermedial dialogue that offers mutually relational translations and narrations of labour coercion Other contributions written by art scholars discuss how coercion in

remunerated labour is constructed and reflected in artistic practice The collection serves as an innovative and creative tool for teaching and raises awareness that narrating history is always contingent on the medium chosen and its inherent constraints and possibilities Praise for Coercion and Wage Labour Coercion and Wage Labour is a pioneering volume It makes a well founded break with the widespread misconception that wage labour is by definition free from coercion The fourteen historical case studies lead to the conclusion that wage labourers too were subject to many forms of coercion and that usually their freedom was and is only relative But something else makes this book special throughout the text there are artistic illustrations that enter into a dialogue with the individual chapters which in turn reflect on the images This creates an inspiring interaction that complements the volume s interdisciplinary nature Marcel van der Linden International Institute of Social History Amsterdam
