Clientelism and Democratic Representation in Comparative Perspective Saskia Ruth-Lovell, Maria Spirova, 2019-10-15 Since the Third Wave of democratization research on clientelism has experienced a revival The puzzling persistence of clientelism in new and old democracies inspired researchers to investigate the micro foundations and causes of this phenomenon Though the decline of clientelistic practices such as vote buying and patronage in democratic contexts has often been predicted they have proven to be highly adaptive strategies of electoral mobilization and party building This volume seeks to contribute to this new line of research and develops a theoretical framework to study the consequences of clientelism for democratic governance Under governance we understand

all processes of governing whether undertaken by a government market or network whether over a family tribe formal or informal organization or territory and whether through laws norms power or language **Democratic Elections in**

Women's Rights in Democratizing States Denise M. Walsh, 2010-11-15 This study offers an explanation for why advances in women s rights rarely occur in democratizing states Drawing on deliberative theory Denise Walsh argues that the leading institutions in the public sphere are highly gendered meaning women s ability to shape the content of public debate and put pressure on the state to advance their rights is limited She tests this claim by measuring the openness and inclusiveness of debate conditions in the public sphere during select time periods in Poland Chile and South Africa Through a series of structured focused comparisons the book confirms the importance of just debate for securing gender justice The comparisons also reveal that counter publics in the leading institutions in the public sphere are crucial for expanding debate conditions The book concludes with an analysis of counter publics and suggests an active role for the state in the public sphere

ethnic data Studies on Latvia and Romania cover some of these issues The road leading to an efficient legally and socially acceptable ethnic monitoring system is examined on the example of Britain The book presents the norms and practices connected to the collection of ethnic data and their relation to data protection concerns This volume is a strong and well founded statement about the compatibility of the collection of ethnic data for purposes of minority protection on the one hand and the principles of data protection and informational self determination on the other *Presidents with Prime Ministers* Margit Tavits, 2009 This book is about presidents in parliamentary systems One commonly recurring political debate within parliamentary systems is over whether or not the public should directly elect the head of state Despite the importance of this topic in practical politics political scientists have offered little empirical evidence yet made bold assumptions about the consequences of popular elections for heads of state A common argument is that direct elections enhance presidents legitimacy thereby increasing their activism and encouraging authoritarian tendencies Another popular assumption is that direct presidential elections are more heavily contested and partisan polarizing and dividing political elites and the electorate Proponents of direct elections argue that such elections will help decrease voter alienation and apathy This book challenges the conventional wisdom Using both quantitative and qualitative empirical evidence from democratic systems across the world this book demonstrates that compared to indirect selection methods direct elections do not yield more active and contentious presidents do not polarize political elites or society and do not remedy political apathy Rather presidential activism in both semi presidential and pure parliamentary systems is shaped by political opportunity framework the institutional strength and partisan composition of both parliament and government Further because holding the presidency provides parties with an electoral asset direct and indirect presidential elections can be equally contentious and polarizing Last but not least rather than decreasing apathy direct election is associated with increased voter fatigue and decreased turnout in parliamentary elections by about seven percentage points
