the author refers to as the near epidemic levels of suicide and homicide suicide among law enforcement officers and ultimately to offer recommendations and best practices with which to better address the problem. The book begins by discussing suicide in some depth for one has to know suicide unequivocally to understand a suicidal or homicidal suicidal officer. Suicide and homicide suicide are complex multi-determined events the result of an interplay of individual, relational, social, cultural, and environmental factors. The complexity of causation necessitates a parallel complexity of knowledge. There are at least two avenues to understanding the nomothetic general approach which deals with generalizations using empirical, statistical, and demographic methods or techniques and the idiographic specific approach which typically involves the intense study of individuals. This book explores both. Attempting to be mindful of the needs of the office on the street, the mental health provider, the administrator, the forensic specialist, and the survivors of these needless tragedies, the belief is that by amalgamating the concerns of a diverse audience we can meet the challenge of identifying at-risk individuals and situations and saving lives.

**From Difficult to Disturbed** Laurence Miller, 2008. Nationally syndicated career columnist Joyce Lain Kennedy's ten best career books for 2007. How does an already busy manager deal with people whose personalities are difficult or even seriously disturbed? The answer lies in using practical psychology to understand just what it is that makes them tick, whether it's something as common as being introverted or extroverted or something much more serious. *From Difficult to Disturbed* helps readers become better managers by providing insight into both big and small people problems that can seriously disrupt the workplace if they're not handled correctly. The book contains down-to-earth solutions for dealing with Personality Types including avoidant, dependent, histrionic, narcissistic, or antisocial workers. Common People Problems such as unproductive, angry, uncooperative, or chronic problem employees. Mental Disorders such as depression, bipolar disorder, schizophrenia, anxiety, and panic disorders, as well as alcohol and substance abuse. Every workplace is filled with a wide range of personalities. This book gives managers the insight, understanding, and tools they need to get the best from those who present the toughest problems.

**Measuring Police Subcultural Perceptions** Zheng Chen, 2015-11-21. Using survey data collected from 382 Chinese police officers training in a Chinese police university, this research is the first empirical study to describe Chinese police perceptions of subcultural topics including the role of crime fighting and community service, cynicism, isolation, solidarity, receptivity to change, and traditionalism. This book describes the research method adopted in this study and the findings together with comparisons with Western police cultural studies. In addition, it covers an extensive review of Chinese policing history and evolution of policing strategies and a review of police subcultural themes and their potential determinants on the basis of Western studies, making it both beneficial and of interest for researchers and practitioners who would like to know more about contemporary policing in China. This book provides readers with insights into a little investigated area of policing: the perceptions of Chinese frontline police. It also makes it easy to compare the similarities and differences between police perceptions in China and the West.
