Policing Contingencies Peter K. Manning,2010-02-15 Despite constant calls for reform policing in the United States and Britain has changed little over the past thirty years In Policing Contingencies Peter K Manning draws on decades of fieldwork to investigate how law enforcement works on the ground and in the symbolic realm and why most efforts to reform the way police work have failed so far Manning begins by developing a model of policing as drama a way of communicating various messages to the public in an effort to enforce moral boundaries Unexpected outcomes or contingencies continually rewrite the plot of this drama requiring officers to adjust accordingly New information technologies media scrutiny and representations and community policing also play important roles and Manning studies these influences in detail He concludes that their impacts have been quite limited because the basic structure of policing officer assessments based on encounters during routine patrols has remained unchanged For policing to really change Manning argues its focus will need

to shift to prevention Written with precision and judiciously argued Policing Contingencies will be of value to scholars of sociology criminology information technology and cultural theory

**Boots on the ground: Troop Density in Contingency Operations** John J. McGrath, 2006 This paper clearly shows the immediate relevancy of historical study to current events One of the most common criticisms of the U S plan to invade Iraq in 2003 is that too few troops were used The argument often fails to satisfy anyone for there is no standard against which to judge A figure of 20 troops per 1000 of the local population is often mentioned as the standard but as McGrath shows that figure was arrived at with some questionable assumptions By analyzing seven military operations from the last 100 years he arrives at an average number of military forces per 1000 of the population that have been employed in what would generally be considered successful military campaigns He also points out a variety of important factors affecting those numbers from geography to local forces employed to supplement soldiers on the battlefield to the use of contractors among others
