Loss,2014-04-07 This book tracks the dramatic outcomes of the federal government s growing involvement in higher education between World War I and the 1970s and the conservative backlash against that involvement from the 1980s onward Using cutting edge analysis Christopher Loss recovers higher education s central importance to the larger social and political history of the United States in the twentieth

century and chronicles its transformation into a key mediating institution between citizens and the state. Framed around the three major federal higher education policies of the twentieth century—the 1944 GI Bill, the 1958 National Defense Education Act, and the 1965 Higher Education Act—the book charts the federal government's various efforts to deploy education to ready citizens for the national bureaucratized and increasingly global world in which they lived. Loss details the myriad ways in which academic leaders and students shaped and were shaped by the state's shifting political agenda as it moved from a preoccupation with economic security during the Great Depression to national security during World War II and the Cold War to securing the rights of African Americans, women, and other previously marginalized groups during the 1960s and 70s. Along the way, Loss reappraises the origins of higher education's current-day diversity regime, the growth of identity-group politics, and the privatization of citizenship at the close of the twentieth century. At a time when people's faith in government and higher education is being sorely tested, this book sheds new light on the close relations between American higher education and politics.

No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn, 2006. Education is intimately connected to many of the most important and contentious questions confronting American society: from race to jobs to taxes and the competitive pressures of the global economy, have only enhanced its significance. Elementary and secondary schooling has long been the province of state and local governments, but when George W. Bush signed into law the No Child Left Behind Act in 2002, it signaled an unprecedented expansion of the federal role in public education. This book provides the first balanced

in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform
