China's National Minority Education Gerard A. Postiglione,2013-10-15 This volume focuses on policies and practices in the education of China's national minorities with the purpose of assessing the goals and impact of state sponsored education for China's non Han people's. The essays in the four sections of this book examine cultural challenges to state schooling, the extent of educational provision in minority areas, the perspectives of Tibetan and Uyghur minorities toward state education along with providing case studies of four national minorities. The book makes the point that despite the authoritarian character of China's state schooling, diversity reigns. *Rising Inequality in China* Shi Li, Hiroshi Sato, Terry Sicular,2013-10-31 This book a sequel to *Inequality and Public Policy in China* 2008 examines the evolution of inequality in China from 2002 to 2007, a period when the new harmonious society development strategy was adopted under Hu Jintao and Wen Jiabao. It fills a gap in knowledge about the outcomes of this development strategy for equity and inequality. Drawing on original information collected from the recent two waves of nationwide household surveys conducted by the China Household Income Project, this book provides a detailed overview of recent trends in income inequality and cutting edge analysis of key factors underlying such trends. Topics covered include inequality in education, changes in homeownership and the distribution of housing wealth, the evolution of the migrant labor market, disparities between public and non public sectors, patterns of work and non work, gender, ethnicity and the impacts of public policies such as reforms in taxation and social welfare programs. **Modernising Education in Britain and China** Patricia Potts,2003-12-08 Based upon Patricia Potts' teaching experience and research in Britain, China and Hong Kong, this book provides an original, stimulating and insightful perspective on inclusive educational reform in two different cultures. **Beyond the Century of the Child** Willem Koops, Michael Zuckerman,2012-10-30 In 1900 Ellen Key wrote the international bestseller *The Century of the Child*. In this enormously influential book she proposed that the world's children should be the central work of society during the twentieth century. Although she never thought that her century of the child would become a reality, in fact it had much more resonance than she could have imagined. The idea of the child as a product of a protective and coddling society has given rise to major theories and arguments since Key's time. For the past half century the study of the child has been dominated by two towering figures, the psychologist Jean Piaget and the historian Philippe Ariès. Interest in the subject has been driven in large measure by Ariès's argument that adults failed even to have a concept of childhood before the thirteenth century and that from the thirteenth century to the seventeenth there was an increasing childishness in the representations of children and an increasing separation between the adult world and that of the child. Piaget proposed that children's logic and modes of thinking are entirely different from those of adults. In the twentieth century this distance between the spheres of children and

adults made possible the distinctive study of child development and also specific legislation to protect children from exploitation abuse and neglect Recent students of childhood have challenged the ideas those titans promoted they ask whether the distancing process has gone too far and has begun to reverse itself In a series of essays Beyond the Century of the Child considers the history of childhood from the Middle Ages to modern times from America and Europe to China and Japan bringing together leading psychologists and historians to question whether we unnecessarily infantilized children and unwittingly created a detrimental wall between the worlds of children and adults Together these scholars address the question whether a hundred years after Ellen Key wrote her international sensation the century of the child has in fact come to an end 曹幸平,2000

Higher Education, Meritocracy and Inequality in China Ye Liu,2016-10-08 This book investigates the changing opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought The second part then explores higher education reforms in China the part played by supposedly meritocratic forms of selection and the implications of these for social mobility Based on original empirical data Ye Liu sheds light on the socio economic gender and geographical inequalities behind the meritocratic facade of the Gaokao Liu argues that the Chinese philosophical belief in education based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education When the Gaokao broke the promise of status improvement for rural students they turned to the Chinese Communist Party and sought political connections by actively applying for its membership This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China Written in an accessible style it offers a valuable resource for researchers and non specialist readers alike 曹幸平,2000

Education in China's Social Transition Peggy A. Kong, Emily Hannum, Gerard A. Postiglione, 2020-12-17 In the first decade of the twenty first century the People's Republic of China experienced dramatic growth and expansion that altered the educational environment of children. Rapid economic development increased prosperity and educational opportunities for children expanded in a wealthier society. Yet a by product of rising wealth was rising inequality. While the children of the emerging urban middle and elite classes enjoyed new prosperity, the children of the persistently poor in rural communities continued to experience challenges such as food insecurity, illness, hardships of family separation and migrant life on the margins of the cities. This time period saw a large resource gap emerge between the home conditions of poor rural children compared with those of their wealthier urban counterparts. This book highlights the complexities China has experienced in seeking to extend full educational access to rural children including rural to urban migrant and ethnic minority children during a momentous period in China. Chapters delve into the experiences, perceptions, strategies and difficulties of rural origin children and their families in the school system and lay bare the challenges of policy initiatives designed to support rural education. We hope the experiences detailed here will be of interest to students and scholars of rural educational policy and practice in China and worldwide.

Global Perspectives on Spirituality and Education Jacqueline Watson, Marian de Souza, Ann Trousdale, 2013-12-04 In recent decades and around the world much attention has been given to the role of spirituality in the education of children and young people. While educationalists share many common goals and values in nurturing the spiritual lives of children and young people, national and regional cultures, religions and politics have impacted on the approaches scholars and practitioners have adopted in their investigations and practices. The different contexts across nations and regions mean that educators face quite distinct conditions in which to frame their approaches to spiritual education and research and the nature and impact of these differences is not yet understood. This book brings together thinkers from around the globe and sets them the task of explaining how their research on children's spirituality and education has been shaped by the historical, cultural, religious and political contexts of the geographic region in which they work. The book presents contributions in three sections: Europe and Israel, Australasia and The Americas and concludes with a chapter highlighting what is common and what is contextually unique about global approaches to spirituality and education.
