Garland,2009-10-15 America s public universities educate 80% of our nation s college students But in the wake of rising demands on state treasuries changing demographics growing income inequality and legislative indifference many of these institutions have fallen into decline Tuition costs have skyrocketed class sizes have gone up the number of courses offered has gone down and the overall quality of education has decreased significantly Here James C Garland draws on more than thirty years of experience as a professor administrator and university president to argue that a new compact between state government and public universities is needed to make these schools more affordable and financially secure Saving Alma Mater challenges a change resistant culture in academia that places too low a premium on efficiency and productivity Seeing a crisis of campus leadership Garland takes state legislators to task for perpetuating the decay of their public university systems and calls for reforms in the way university presidents and governing boards are selected He concludes that the era is long past when state appropriations can enable public universities to keep their fees low and affordable Saving Alma Mater

thus calls for the partial deregulation of public universities and a phase out of their state appropriations Garland's plan would tie university revenues to their performance and exploit the competitive pressures of the academic marketplace to control costs rein in tuition and make schools more responsive to student needs A much needed blueprint for reform based on Garland's real life successes as the head of Miami University of Ohio Saving Alma Mater will be essential for anyone concerned with the costs and quality of higher education in America today
