Armed with Expertise Joy Rohde, 2013-08-09 During the height of the wars in Iraq and Afghanistan the Pentagon launched a controversial counterinsurgency program called the Human Terrain System The program embedded social scientists within military units to provide commanders with information about the cultures and grievances of local populations Yet the controversy it inspired was not new Decades earlier similar national security concerns brought the Department of Defense and American social scientists together in the search for intellectual weapons that could combat the spread of communism during the Cold War In Armed with Expertise Joy Rohde traces the optimistic rise anguished fall and surprising rebirth of Cold War era military sponsored social research Seeking expert knowledge that would enable the United States to contain communism the Pentagon turned to social scientists Beginning in the 1950s political scientists social psychologists and anthropologists optimistically applied their expertise to military problems convinced that their work would enhance democracy around the world As Rohde shows by the late 1960s a growing number of scholars and activists condemned Pentagon funded social scientists as handmaidens of a technocratic warfare state and sought to eliminate military sponsored research from American intellectual life But the Pentagon s social research projects had remarkable institutional momentum and intellectual flexibility Instead of severing their ties to the military the Pentagon s experts relocated to a burgeoning network of private consulting agencies and for profit research offices Now shielded from public scrutiny they continued to influence national security affairs They also diversified their portfolios to include the study of domestic problems including urban violence and racial conflict In examining the controversies over Cold War social science Rohde reveals the persistent militarization of American political and intellectual life a phenomenon that continues to raise grave questions about the relationship between expert knowledge and American democracy

Cold Breezes and Idiot Winds Valerie Scatamburlo d'Annibale, 2011-11-19 After 9 11 rightists capitalized on an atmosphere of fear and confusion to resuscitate the culture wars of the 1990s and once again targeted the academy Using tactics reminiscent of the McCarthy era religious firebrands militant neoconservatives and free

market fundamentalists engaged in a concerted effort to silence voices critical of the war on terror and liken legitimate dissent to treason Brandishing a discourse of patriotic correctness PC that was informed by American exceptionalism Christian nationalism anti intellectualism and virulent anti liberalism this coalition portrayed the professoriate as a dangerous cabal seeking the demise of Western civilization In Cold Breezes and Idiot Winds Scatamburlo D Annibale explains why the most recent assault on academe must be understood in relation to the right s broader offensive against liberalism For decades conservatives have worked diligently to construct a network of foundations think tanks and campus organizations dedicated to demonizing progressive thought the legacy of the New Deal era and the democratic social reforms of the 1960s The author provides a detailed examination of this ideological infrastructure and how it advanced the agenda of PC post 9 11 She explores how the campaign for PC was aided and abetted by a right wing media apparatus how it continues to threaten academic freedom on campuses and how it is currently infecting the larger body politic and contributing to the increased toxicity of the nation s public dialogue While purveyors of PC often invoke culture war rhetoric Scatamburlo D Annibale adroitly reveals that their ultimate aim is to protect corporate power from any form of democratic accountability

The State and Social Investigation in Britain and the United States Michael J. Lacey, Mary O. Furner, 1993-06-25 The State and Social Investigation in Britain and the United States addresses the historical development of the knowledge base upon which the public policies of the democratic state depend This comparative study stretches from the Enlightenment origins of the impulse to base legislation on scientific knowledge to the twentieth century development of specialised institutions and professions engaged in social investigation and public policy making It probes investigators biases and omissions as well as their strengths as factors shaping social learning It illuminates the vital link between social empiricism and the late nineteenth century emergence of the New Liberalism in both Britain and the United States And it ponders the impact on social investigation and social policy today of relativism antistatism devolution and privatisation as these currents have developed in both societies since the 1970s

No Direction Home Natasha Zaretsky, 2010-01-27 Between 1968 and 1980 fears about family deterioration and national decline were ubiquitous in American political culture In No Direction Home Natasha Zaretsky shows that these perceptions of decline profoundly shaped one another Throughout the 1970s anxieties about the future of the nuclear family collided with anxieties about the direction of the United States in the wake of military defeat in Vietnam and in the midst of economic recession Zaretsky explains By exploring such themes as the controversy surrounding prisoners of war in Southeast Asia the OPEC oil embargo of 1973 74 and debates about cultural narcissism Zaretsky reveals that the 1970s marked a significant turning point in the history of American nationalism After Vietnam a wounded national identity rooted in a collective sense of injury and fueled by images of family peril exploded to the surface and helped set the stage for the Reagan Revolution With an innovative analysis that integrates cultural intellectual and political history No Direction Home explores the fears that not only shaped an earlier era but also have reverberated into
