Policy, Practice, and Politics in Teacher Education Marilyn Cochran-Smith, 2006-01-13 Marilyn Cochran Smith's keen insights about the politics and substance of teacher education reform focus like a laser on the central issues of educational equity and quality in our time. Anyone who wants to understand what's happening to teaching in this country and what's at stake should read this book. Linda Darling Hammond, Charles E. Ducommun, Professor of Education, Stanford University. Marilyn Cochran Smith is one of the strongest voices in teacher education today. By weighing the evidence, challenging orthodoxy, and analyzing the policies, she has given teacher education a firm footing in the scholarly canon. Her leadership is vital to the field's viability. Gloria Ladson Billings, Kellner Family Chair in Urban Education, University of Wisconsin-Madison. Access the insight and wisdom of one of today's leading educational scholars in one concise volume. When it comes to determining the best approach to teacher preparation, today's teachers, teacher educators, and school leaders face an overwhelmingly contentious environment. Through her influential essays in the *Journal of Teacher Education*, however, Marilyn Cochran Smith has consistently provided educators with a distinguished voice of reason, advocacy, inspiration, and social justice. This powerful text organizes all of her editorials for the first time into one concise volume, making this an essential guide to teacher preparation at its best.

Policy and Politics in Teacher Education John Furlong, Marilyn Cochran-Smith, Marie Brennan, 2013-09-13 During the last 20 years, governments around the world have paid increasing attention to the recruitment, preparation, and retention of teachers. Teacher supply and teacher quality have become significant policy issues taken up by policy makers at the highest levels. This is because teachers are now seen by many governments as the lynch pin of educational, economic, and social reform. This volume grew out of a recognition by the Editors of the growing significance of teacher education policy and a curiosity about international trends and differences. The book brings together nine papers from leading academics around the world from the UK, England, and Scotland, the USA, Australia, Singapore, and Belgium, plus a joint paper comparing Namibia and the USA. Taken together, the papers reveal the complexities and contradictions of international trends. On the one hand, they demonstrate that there is indeed a common direction of travel along the lines encouraged by international bodies such as the OECD. At the same time, however, the papers also reveal important differences among countries in terms of how they are addressing common aspirations, as well as some apparent contradictions within the policies of individual nations. This book was based on the special issue of *Teachers and Teaching*.

Fraser, Lauren Lefty, 2018-10-01 Teacher education in America has changed dramatically in the past thirty years with major implications for how our kids are taught As recently as 1990 if a person wanted to become a public school teacher in the United States he or she needed to attend an accredited university education program Less than three decades later the variety of routes into teaching is staggering In *Teaching Teachers* education historians James W Fraser and Lauren Lefty look at these alternative programs through the lens of the past Fraser and Lefty explain how beginning in 1986 an extraordinary range of new teaching programs emerged most of which moved teacher education out of universities In some school districts and charter schools superintendents started their own teacher preparation programs sometimes in conjunction with universities sometimes not Other teacher educators designed blended programs creating collaboration between university teacher education programs and other parts of the university linking with school districts and independent providers and creating a range of novel options Fraser and Lefty argue that three factors help explain this dramatic shift in how teachers are trained an ethos that market forces were the solution to social problems long term dissatisfaction with the inadequacies of university based teacher education and the frustration of school superintendents with teachers themselves who can seem both underprepared and too quick to challenge established policy Surveying which programs are effective and which are not this book also examines the impact of for profit teacher training in the classroom Casting light on the historical and social forces that led to the sea change in the ways American teachers are prepared *Teaching Teachers* is a substantial and unbiased history of a controversial topic

Critical Voices in Teacher Education Barry Down,John Smyth,2012-04-28 We live in dangerous times when educational policies and practices are debated largely in terms of how

they fit with the needs of the free market This volume is a collection of writing by teacher educators that draws on their unique biographies experiences and perspectives to denounce these misguided norms It explores what it means practically and intellectually to teach for social justice in conservative times In a globalised world where the power of capital holds sway the purposes of social institutions such as universities and schools is being refashioned in ways that are markedly instrumental and technicist in nature The consequence is that teachers work is increasingly constrained by regimes of control such as standardised testing accountability transparency and national curricula In the meantime large numbers of students and teachers are disengaging physically emotionally and intellectually from learning The contributors to this edited volume present both a powerful critique of these developments and a counter hegemonic vision of teacher education founded on the principles and values of social justice democracy and critical inquiry Teacher education they argue involves a commitment to critical intellectual work that subjects some deeply entrenched assumptions beliefs habits routines and practices to closer scrutiny The contributing authors expose how ideology and power operate in seemingly blameless rational ways to perpetuate social hierarchies based on class gender sexuality race and culture

Teacher Education and the Political Matthew Clarke, Anne Phelan, 2017-01-12 Teacher Education and the Political is a striking book which addresses the nature and purpose of teacher education in a global context characterised by economic and political anxieties around declining productivity and social inclusion These anxieties are manifested in recent policy developments such as the promotion of professional standards the deregulation and marketisation of teacher education and the imposition of performance related regimes that tie teachers pay to outcomes in high stakes testing The book assesses the implications of such policies for the work of teachers as well as for teacher educators and those undertaking initial teacher training It is argued that these policy moves can be read as a depoliticising and de intellectualising of teacher education In this context they illustrate how contemporary theory can provide a language for critiquing recent developments and imagining new trajectories for policy and practice in teacher education Drawing on the work of theorists from Derrida and Mouffe to Agamben and Lacan this book argues for the need to maintain a space for intellectual autonomy as a critical dimension of the ethico political work of teachers Together these ideas and analyses provide examples of the power of negative thinking illustrating its capacity to unsettle comfortable truths and foreground the political nature of teacher education Current teachers teacher educators and school leaders will be particularly interested readers alongside those concerned with policy in the wider educational landscape
