**Governance and Public Administration in China** Toby S. James, Wei Liu, Caixia Man, 2022-12-26 China has traditionally been held up around the world as the archetype of centralised governance and a top down system of public administration But to what extent does this remain true of modern China This book provides an updated perspective on modern China through a series of cutting edge original studies focusing on public administration in China The book opens with an overview of the key political institutions and the evolution of public administration research in China followed by two distinct sections Part I contains studies focusing on power governance and administration Part II focuses on what works in solving wicked problems in Chinese society The volume shows that China has seen some localisation and decentralisation alongside experiments with collaboration and networked based policy making However the

system of governance and public administration remains innately top down and centralised with the centre holding strong policy levers and control over society As the pandemic revealed this statist approach provided both governing opportunities and disadvantages The chapters in this book were originally published as a special issue of Policy Studies *China's Approach to Energy Security* Shaofeng Chen, 2023-07-15 This book aims to analyze how and why China takes a state managed marketization approach SMMA to energy security against the backdrop of global efforts of decarbonization and intensified strategic competition between China and the United States How and why does China's SMMA work Taking an evolving historical perspective this book explores China's perception of energy security the policy process institutional restructuring in China's petroleum industry China's foreign energy quest and the ramifications of the Chinese approach on the international energy market and on world decarbonization To demonstrate to what extent China's SMMA differs from other countries it also makes a comparative analyses of the approaches by China the US and India This book will keenly interest scholars of the Chinese political economy climate change and geopolitics **Internationalising China's Financial**

**Governance in China** Carlos Wing-Hung Lo, Shui-Yan Tang, 2013-08-15 During the past three decades of rapid industrial growth China has suffered from devastating environmental degradation Most scholarly and popular publications have painted a rather pessimistic picture about the worrisome trend Yet a somewhat more optimistic view has emerged in the past decade given the Chinese government's increased commitment to fighting industrial pollution the public's increased concerns regarding the adverse effects of pollution and domestic and international civil society's increased involvement in promoting environmental protection in China Drawing on the authors' extensive research on Guangdong Province and a few large cities in other provinces this book provides an in depth study on China's environmental governance and regulatory enforcement in the past two decades Section 1 examines various institutional constraints for environmental regulation enforcement at the local level and how governance reform efforts in the past decade have contributed to the lessening of those constraints Section 2 draws on data derived from surveys and interviews conducted in multiple cities and times it examines the dominant regulatory enforcement styles of local environmental protection bureaus and how these styles vary across different regions and over time Section 3 examines how various stakeholders the general public environmental groups government entities and corporations affect the environmental governance process Overall the book presents a cautiously optimistic view on the evolution of environmental governance in China While highlighting many political institutional social and economic constraints it also documents many changes that have taken place including reform efforts from within the government administrative system increasingly societal concerns and actions and changing attitudes among corporate executives potentially paving the way for more effective environmental governance in the future

reforms     Navigating Choppy Waters Matthew P. Goodman, David A. Parker, 2015-04-02 China faces increasing economic headwinds that call into question not only its near term growth outlook but the longer term sustainability of its economic success At a time of leadership transition in Beijing global markets and policymakers alike are casting an anxious eye on China's economic decisionmakers and wondering whether they have the plans skills and fortitude to cope with these challenges There is a rising premium on understanding how Chinese economic policy decisions are made whether the emerging cadre of policymakers has the wherewithal to navigate the more turbulent waters ahead and what the implications are for U S foreign and economic policy     *China* John King Fairbank, Merle Goldman, 2006-04-30 John King Fairbank was the West's doyen on China and this book is the full and final expression of his lifelong engagement with this vast ancient civilization The distinguished historian Merle Goldman brings the book up to date and provides an epilogue discussing the changes in contemporary China that will shape the nation in the years to come     Wind and Solar Energy Transition in China Marius Korsnes, 2019-09-25 This book explores the mobilisation of China's wind and solar industries and examines the implications of this development to energy generation and distribution innovation and governance Unlike other publications that focus mainly on the formal policy landscape and statistics of industry development this book delves deeper into the ways in which the wind and solar industries have evolved through negotiations made by the involved stakeholders and how these industries play into larger Chinese development and policymaking interests Overall it sheds new light on the strategic development of China's renewable energy industry the flexible governance methods employed and the internal struggles which Chinese local regional and central policymakers and state owned and private enterprises have faced This book will be of great relevance to students and scholars of renewable energy technologies energy policy and sustainability transitions as well as policymakers with a specific interest in China     *The New Kings of Crude* Luke Patey, 2014-10-15 In the past decade the need for oil in Asia's new industrial powers China and India has grown dramatically The New Kings of Crude takes the reader from the dusty streets of an African capital to Asia's glistening corporate towers to provide a first look at how the world's rising economies established new international oil empires in Sudan amid one of Africa's longest running and deadliest civil wars For over a decade Sudan fuelled the international rise of Chinese and Indian national oil companies But the political turmoil surrounding the historic division of Africa's largest country with the birth of South Sudan challenged Asia's oil giants to chart a new course Luke Patey weaves together the stories of hardened oilmen powerful politicians rebel fighters and human rights activists to show how the lure of oil brought China and India into Sudan only later to ensnare both in the messy politics of a divided country His book also introduces the reader to the Chinese and Indian oilmen and politicians who were willing to become entangled in an African civil war in the pursuit of the world's most coveted resource It offers a portrait of the challenges China and India are increasingly facing as emerging powers in the world     **Comparative Law and Regulation** Francesca Bignami, David Zaring, 2016-09-30 Governance by regulation rules propounded and enforced

by bureaucracies is taking a growing share of the sum total of governance Once thought to be an American phenomenon it is now a central form of state action in every part of the world including Europe Latin America and Asia and it is at the core of much international lawmaking In Comparative Law and Regulation original contributions by leading scholars in the field focus both on the legal dimension of regulation and on how this dimension operates in those places that have turned to regulation to meet their obligations **Chinese Politics as Fragmented Authoritarianism** Kjeld Erik

Brødsgaard,2016-10-04 This book explores how far the concept of fragmented authoritarianism remains valid as the key concept for understanding how the Chinese political process works It contrasts fragmented authoritarianism which places bureaucratic bargaining at the centre of policy making arguing that the goals and interests of the implementing agencies have to be incorporated into a policy if implementation is to be secured with other characterisations of China s political process Individual chapters consider fragmented authoritarianism at work in a range of key policy areas including energy issues climate change and environmental management financial reform and civil military relations The book also explores policy making at the national provincial city and local levels debates how far the model of fragmented authoritarianism is valid in its current form or whether modifications are needed and discusses whether the system of policy making and implementation is overcomplicated unwieldy and ineffective or whether it is constructive in enabling widespread consultation and scope for imagination flexibility and variation *Taiwanese Business or Chinese Security Asset* Chun-Yi Lee,2011-10-20

This book investigates how China has used Taiwanese investment and treated Taiwanese investors to pursue political reunification The book s main supposition is that both Chinese central and local governments have strategic considerations with respect to Taiwanese businesses Consequently through detailed case studies of three cities Tianjin Kunshan and Dongguan the author explores the changing interaction between Taiwanese businesses and the Chinese government and seeks to provide an explanation of this changing pattern of interaction in the cross strait political economy Through her unique empirical research Lee shows how Chinese local governments although being driven by short term goals also contribute to the goal of achieving political reunification and argues that central and local governments complement each other as a consequence By stressing the importance of long term political goals and the state s policy interests and preferences this research intends to address the various political implications attached to Taiwanese investment in China This timely and important study presents some of the first systematic empirical research published in English or any other Western language focusing on Taiwan s entrepreneurs taishang on the Chinese mainland The book will be of interest to students and scholars of Taiwan Studies Chinese Politics Political Economy Chinese Business and economics *Titans of the Climate* Kelly Sims Gallagher,Xiaowei Xuan,2019-01-29 How the planet s two largest greenhouse gas emitters navigate climate policy The United States and China together account for a disproportionate 45 percent of global carbon dioxide emissions In 2014 then President Obama and Chinese President Xi Jinping announced complementary efforts to limit

emissions paving the way for the Paris Agreement And yet with President Trump s planned withdrawal from the Paris accords and Xi s consolidation of power as well as mutual mistrust fueled by misunderstanding the climate future is uncertain In *Titans of the Climate* Kelly Sims Gallagher and Xiaowei Xuan examine how the planet s two largest greenhouse gas emitters develop and implement climate policy Through dispassionate analysis the authors aim to help readers understand the challenges constraints and opportunities in each country Gallagher a former U S climate policymaker and Xuan a member of a Chinese policy think tank describe the specific drivers political economic and social of climate policies in both countries and map the differences between policy outcomes They characterize the U S approach as deliberative incrementalism the Chinese meanwhile engage in strategic pragmatism Comparing the policy processes of the two countries Gallagher and Xuan make the case that if each country understands more about the other s goals and constraints climate policy cooperation is more likely to succeed

**Chinese Assertiveness, Ideational Mobilization, and the Rise of Xi Jinping** Friso M.S. Stevens, 2025-05-06 This book examines the historical domestic and leadership drivers behind the repositioning of China toward center stage after 2008 In the years of global turmoil that followed the 2008 global financial crisis China s foreign policy of the late Hu Jintao years came to be viewed in Western discourse as increasingly assertive Displaying a certain cognitive dissonance China however vehemently rejects this viewpoint Especially after Xi Jinping rose to power in 2012 it is clear that China has abandoned its long held foreign policy doctrine of keeping a low profile Analyzing how language has been produced and reproduced over time this book explains the shift to a more assertive China by examining the intervening ideas about China s desired place in East Asia s regional order The Chinese Communist Party propaganda offers compelling evidence that there is much greater continuity between the Hu and Xi eras than is exhibited in the current literature Moreover the book traces the deeper ideational sources of Chinese assertiveness back to the New Left movement and the Patriotic Education Campaign of the 1990s Agency for the turn in the late 2000s and the selection of the compromise candidate Xi is attributed to the choices past leaders made with some Party elders ruling from behind the curtain This book will be of much interest to students of Chinese politics and foreign policy East Asian International Relations and Security Studies

**Dams, Migration and Authoritarianism in China** Sabrina Habich, 2015-12-22 Past studies on the Chinese state point towards the inherent adaptability effectiveness and overall stability of authoritarian rule in China The key question addressed here is how this adaptive capacity plays out at the local level in China clarifying the extent to which local state actors are able to shape local processes of policy implementation This book studies the evolution of dam induced resettlement policy in China based on extensive fieldwork conducted in Yunnan province It shows that local governments at the lowest administrative levels are caught in a double bind facing strong top down pressures in the important policy field of hydropower development while simultaneously having to handle growing social pressure from local communities affected by resettlement policies In doing so the book questions the widespread assumption that the observed longevity and resilience of

China's authoritarian regime is to a large extent due to the high degree of flexibility that has been granted to local governments in the course of the reform period. The research extends beyond previous analyses of policy implementation by focusing on the state-society and the ways in which they interact as well as by examining what happens when policy implementation is interrupted. Analysing the application of resettlement policies in contemporary China with a focus on the multiple constraints that Chinese local states face, this book will be of interest to students and scholars of Political Science, Chinese Studies and Sociology.
