corporations in shaping the manufacturing and service sectors respectively Vietnam as one of Southeast Asia's quintessential latecomer economies with little prior experience of dealing with transnational corporations has nevertheless been quite successful in maintaining some control over the impact of foreign direct investment Yet the learning outcomes remain highly uneven In addition Lim argues that Vietnamese advancement in both industries mirrors only partially the more generalized patterns of state led development in East Asia's earlier batch of latecomer economies Vietnam's case thus presents practical lessons on how to succeed in crafting and utilizing policy instruments to achieve domestic economic and technological upgrading This book will be of great interest to scholars of political economy and industrial policy in East Asia as well as to scholars and policy professionals analyzing approaches to development strategy more broadly

**Leadership: Political-economic, Regional Business And Socio-community Contexts** Tai Wei Lim, 2020-03-20 Political leadership styles in East Asian states are shaped and influenced by a number of domestic factors These factors include the type of political system that an East Asian state adopted from their days of independence and decolonization There is a diverse array of political systems in the region ranging from Western style liberal democracies like Japan and South Korea to autocratic one party states like North Korea Most other East Asian countries adopt systems somewhere in between these two polar ends This volume begins with a macro political perspective of leadership It then looks

at case studies of political leadership and the factors that influence the shape and outcome of leadership styles in the region. The book also examines the concept of community leadership and its impact on community well being. Several specific case studies are examined in depth. While examining political leadership from a macro theoretical and empirical perspective, the book also adopts historical anthropological perspectives to analyse case studies. The case studies also examine policy formulation and implementation to look at the role of government in handling community level issues. Finally, the book focuses on economic leadership in international political economy and global business.

*Business in Indonesia* M. Chatib Basri, 2003-08-01. This book examines Indonesia's business environment since reformasi began in 1985, what stayed the same, what changed, and what could change. Economic recovery has been hesitant. Regime change and political reform have created uncertainties that have deepened reluctance to invest. A raft of government instigated changes have left their imprint: decentralization, privatization, new company legislation, anti corruption efforts, nationalization of debt ridden banks and firms being forced into receivership. More cautious lending practices by remaining financial institutions have imposed a credit crunch. Increased worker militancy and minimum wage rises have led some international firms to reconsider their presence in Indonesia. Changes in the business environment have caused a redefinition of private enterprise government relations, inducing firms to re-examine their organization and management. The book includes insights of distinguished and stimulating speakers from business, independent research organizations and academic institutions in Indonesia, Australia and elsewhere.

**State of Authority** Gerry Van Klinken, Joshua Barker, 2018-05-31. A major realignment is taking place in the way we understand the state in Indonesia. New studies on local politics, ethnicity, the democratic transition, corruption, Islam, popular culture and other areas hint at novel concepts of the state, though often without fully articulating them. This book captures several dimensions of this shift. One reason for the new thinking is a fresh wind that has altered state studies generally. People are posing new kinds of questions about the state and developing new methodologies to answer them. Another reason for this shift is that Indonesia itself has changed, probably more than most people recognize. It looks more democratic but also more chaotic and corrupt than it did during the militaristic New Order of 1966-1998. *State of Authority* offers a range of detailed case studies based on fieldwork in many different settings around the archipelago. The studies bring to life figures of authority who have sought to carve out positions of power for themselves using legal and illegal means. These figures include village heads, informal slum leaders, district heads, parliamentarians and others. These individuals negotiate in settings where the state is evident and where it is discussed: coffee houses, hotel lounges, fishing waters and street side stalls. These case studies and the broader trend in scholarship of which they are a part allow for a new theorization of the state in Indonesia that more adequately addresses the complexity of political life in this vast archipelago nation. *State of Authority* demonstrates that the state of Indonesia is not monolithic but is constituted from the ground up by a host of local negotiations and symbolic practices.

*Business, Politics and Public Policy* J. Marques, P. Utting, 2010-05-13. This is the second volume on the changing

nature of state business relations This book examines how the dynamics of business have influenced public policy in the context of economic liberalization and democratization It identifies the circumstances under which business might support progressive policies in developing countries

**Competitive Authoritarianism** Steven Levitsky, Lucan A. Way, 2010-08-16 Based on a detailed study of 35 cases in Africa Asia Latin America and post communist Eurasia this book explores the fate of competitive authoritarian regimes between 1990 and 2008 It finds that where social economic and technocratic ties to the West were extensive as in Eastern Europe and the Americas the external cost of abuse led incumbents to cede power rather than crack down which led to democratization Where ties to the West were limited external democratizing pressure was weaker and countries rarely democratized In these cases regime outcomes hinged on the character of state and ruling party organizations Where incumbents possessed developed and cohesive coercive party structures they could thwart opposition challenges and competitive authoritarian regimes survived where incumbents lacked such organizational tools regimes were unstable but rarely democratized

Business and Development Studies Peter Lund-Thomsen, Michael Wendelboe Hansen, Adam Lindgreen, 2019-10-16 *Business and Development Studies Issues and Perspectives* provides a comprehensive collection of cutting edge theoretical and empirical contributions to the emerging field of business and

development studies Compared to more traditional business school accounts of business in developing countries which focus on the challenges and opportunities of doing business in developing countries this anthology explores whether how and under what conditions business contributes to the achievement of economic social and environmental goals in developing countries The book consolidates the current status of academic work on business and development identifies state of the art in relation to this academic field and establishes a future research agenda for business and development studies as an emerging academic discipline within the social sciences The book will be of interest to researchers and students including economists geographers sociologists political scientists corporate social responsibility specialists and development scholars who are seeking an in depth overview of current debates about the role of business as a development agent in the Global South The book is also of relevance to practitioners that are engaged in work with the private sector seeking to enhance the positive effects and minimize the negative economic social and environmental consequences of business activity in the Global South

**The Political Economy of Automotive Industrialization in East Asia** Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021-04-21 East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations The Political Economy of

Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth
