The first edition was published in 1990, the second in 1997. It has been described as one of the critical reference sources in journalism today and it is a key bibliographic guide to the literature. *Choice* magazine called it a benchmark publication for which there are no comparable sources. The format is similar to the second edition. What makes this edition significantly different is the separation of Commercial Databases and Internet Resources. The new chapter on Internet sources features Web-based resources not included in the commercial databases chapter as well as portals, other online files, listservs, newsgroups, and Web logs, blogs. All chapters have been revised and there are significant revisions in Directories, Yearbooks, and Collections, Miscellaneous Sources, Core Periodicals, Societies and Associations, and Research Centers and Archives. The second edition has 789 entries. The third edition contains almost 1,000 entries. James Carey of Columbia University, who provided the foreword for the first two editions, has updated his foreword for this edition. *Encyclopedia of Political Communication* Lynda Lee Kaid, Christina Holtz-Bacha, 2008. Political communication began with the earliest studies of democratic discourse by Aristotle and Plato. However, modern political communication relies on an interdisciplinary base which draws on concepts from communication, political science, journalism, sociology, psychology, history, rhetoric, and others. This two-volume resource considers political communication from a broad interdisciplinary perspective encompassing the many different roles that communication plays in political processes in the United States and around the world. The *Encyclopedia of Political Communication* discusses the major theoretical approaches to the field including direct and limited effects theories, agenda setting theories, sociological theories, framing and priming theories, and other past and present conceptualizations. With nearly 600 entries, this resource pays considerable attention to important political messages such as political speeches, televised political advertising, political posters, and print advertising, televised political debates, and Internet sites. The audiences for political communications are also central, necessitating concentration on citizen reactions to political messages, how the general public and voters in democratic systems respond to political messages, and the effects of all types of media and message types. Key Features: Encompasses several channels of political communication including interpersonal and public communication, radio, television, newspapers, and the World Wide Web. Provides news media coverage and journalistic analysis of politics, political issues, political figures, and political institutions. Concentrates on the field of political communication since the middle of the 20th century. Emphasizes political communication from the point of view of the United States, but there is substantial and important research and scholarship on political communication in international contexts.

Television and Politics in Evolving European Democracies Lynda Lee Kaid, 1999

Throughout the world, television has become an important part of the way in which political candidates and parties present their messages to voters during election campaigns. This is particularly true in campaigns at the national level where voters have little personal contact with candidates and must rely on experiencing candidates through the media. Despite the importance of the media for voter-government interaction, however, many new reform governments in the post-communist era in Eastern European countries failed to appreciate the demands of creating workable new media systems.
