Political Conjecture In Military Plannin:

Political Conjecture in Military Planning Klaus Knorr, Oskar Morgenstern, 1968 **Military Planning in the Twentieth Century** Mary Ann Robinson, 1984 The essays commentaries and speeches which form this volume were presented at the Eleventh Military History Symposium held at the United States Air Force Academy on 10-12 October 1984. This conference is a biennial event sponsored jointly by the Department of History and the Association of Graduates of the United States Air Force Academy. Begun in 1967 the series seeks to address problems in military history which have received limited attention and to provide a forum in which scholars may present the results of their research. In this manner we hope to stimulate and encourage interest in military history among civilian and military scholars, members of the armed forces and the cadets of the United States Air Force Academy. Military planning in the twentieth century, *Defence Planning and Uncertainty* Stephan Frühling, 2014-04-24 How can countries decide what kind of military forces they need if threats are uncertain and history is full of strategic surprises? This is a question that is more pertinent than ever as countries across the Asia Pacific are faced with the military and economic rise of China. Uncertainty is inherent in defence planning but different types of uncertainty mean that countries need to approach decisions about military force structure in different ways. This book examines four different basic frameworks for defence planning and demonstrates how states can make decisions coherently about the structure and posture of their defence forces despite strategic uncertainty. It draws on case studies from the United States, Australian and New Zealand, each of which developed key concepts for their particular circumstances and risk perception in Asia. Success as well as failure in developing coherent defence planning frameworks holds lessons for the United States and other countries as they consider how best to structure their military forces for the uncertain challenges of the future. **Defense Policy Formation** Clark A. Murdock, 1974-01-01 When Robert McNamara became U.S. Secretary of Defense he introduced a new mode of making policy decisions: systems analysis. In *Defense Policy Formation* Clark Murdock examines what effects this systems analysis had on policy making process both in theory and the actual practice of military innovation. Military Law Review, 1979 War, Strategy and Intelligence Michael I. Handel, 2012-11-12 Investigating the logic, conduct and nature of war on the highest political and strategic levels, these essays put less emphasis on operational and tactical aspects. They look at the impact of technology on warfare, the political nature of war and the limits of rational analysis in studying war. **Law, Force and Diplomacy at Sea (Routledge Revivals)** Ken Booth, 2014-06-27 *Law, Force and Diplomacy at Sea* first published in 1985 is one of the few comprehensive treatments on the subject from a strategic perspective. It offers a detailed strategic analysis of the background and outcome of the Third UN Conference on the Law of the Sea and its naval implications. The interplay between the interest of the naval powers in freedom of navigation and the interest of coastal states in control provides the setting for the strategic problems. The sea is taking on more properties of the land; it is becoming territorialised and this is presenting fresh challenges and opportunities to which navies and their national

governments have to respond This study is designed for students of naval strategy for international lawyers and for students of international affairs who wish to think about the important security questions in the maritime environment *NATO Review*, 1971 *The Study of the Future*, 1977 **National Security and International Relations (Routledge Revivals)** Peter Mangold, 2013-10-14 First published in 1990 National Security and International Relations provides a concise analysis of the problem of national security in the twentieth century It examines the criteria by which states decide what level of security they want to seek in an uncertain and essentially Hobbesian world and why some states tend to underinsure while obsessively insecure states overinsure frequently making others more insecure in the process In the wake of two world wars and the threat of nuclear destruction Peter Mangold argues that war was becoming as much a source of insecurity as the intentions of other states It then explores the different approaches attempted during the twentieth century to ameliorate or ideally escape from the security dilemma These range from international regimes to the restructuring of the international politics of Western Europe so as to substitute cooperation for conflict and U S and Soviet attempts to render nuclear competition safer through arms control and confidence building measures Of special value to students of International Relations and Strategic Studies this book will also interest those keen to understand the challenges embodied in Gorbachev's new thinking in foreign policy **Theory and Policy in International Relations** Raymond Tanter, Richard H. Ullman, 2015-03-08 A group of leading political scientists assess the relevance and usefulness of international relations theory for policymaking The editors introduction reviews the state of the art the importance and liabilities of theory for the policymaker and the problems of organizing knowledge to meet the needs of the policy community Originally published in 1972 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Papers Available** Foreign Affairs Research Documentation Center, 1969 Diplomacy, War, and Technology Since 1830 Maurice Pearton, 1984 No other book combines so much of modern military history with so rich an exploration of related factors in industry finance education and technology as well as statecraft Combining strands of history from all these areas Pearton makes an unusually complete and cogent case for the breakdown of traditional distinctions between the civil and the military and even between war and peace This is an excellent work of military and economic history Russell F Weigley author of *The American Way of War* Pearton's historical approach adds needed depth and perspective to many contemporary discussions of the arms problem This is an illuminating and incisive inquiry into a phenomenon of unquestioned importance International Affairs **Mathematical Economics and Game Theory** R. Henn, O. Moeschlin, 2012-12-06 *Strategy and Ethnocentrism (Routledge Revivals)* Ken Booth, 2014-06-27 Ken

Booth's study first published in 1979 investigates the way in which cultural distortions have affected the theory and execution of strategy. Its aim is to illustrate the importance of ethnocentrism in all areas of the subject to follow through its implications and to suggest approaches to the different problems it poses. Insights are offered into the character of a number of important issues in Cold War international politics including the superpower arms race, the Middle Eastern crisis, the Soviet arms build up and the SALT talks. In light of the cost of modern warfare it is all the more important to avoid strategic failures in the future. *Strategy and Ethnocentrism* aims to alert students of military and strategic studies to some ways of minimising the risks of failure in an age when war is increasingly characterised by racial, cultural and religious conflict.
