The Political Economy of City Branding Ari-Veikko Anttiroiko, 2014-02-24 Globalization affects urban communities in many ways One of its manifestations is increased intercity competition which compels cities to increase their attractiveness in terms of capital entrepreneurship information expertise and consumption This competition takes place in an asymmetric field with cities trying to find the best possible ways of using their natural and created assets the latter including a naturally evolving reputation or consciously developed competitive identity or brand The Political Economy of City Branding discusses this phenomenon from the perspective of numerous post industrial cities in North America Europe East Asia and Australasia Special attention is given to local economic development policy and industrial profiling and global city rankings are used to provide empirical evidence for cities characteristics and positions in the global urban hierarchy On top of this social and urban challenges such as creative class struggle are also discussed The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results This book will be of interest to scholars and practitioners working in the areas of local economic development urban planning public management and branding

Taylor,Ben Derudder,2004-06-02 With the advent of multinational corporations the traditional urban service function has gone global In order to provide services to globalizing corporate clients the offices of major financial and business service firms across the world have formed a network It is the myriad of flows between office towers in different metropolitan centres that has produced a world city network Through an analysis of the intra company flows of 100 leading global service firms across 315 cities this book assesses cities in terms of their overall network connectivity their connectivity by service sector and their connectivity by world region Peter Taylor s unique and illuminating book provides the first comprehensive and systematic description and analysis of the world city network as the skeleton upon which contemporary globalization has been built His analyses challenge the traditional view of the world as a mosaic map of political boundaries Written by one of the foremost authorities on the subject this book provides a much needed mapping of the connecting relationships between world cities and will be an enlightening book for students of urban studies geography sociology and planning **The Street Surface Railway Franchises of New York City** Harry James Carman,1919 [Reconstructing City Politics](#) David L. Imbroscio,1997-02-03 Almost two decades of research in U S city politics has produced a compelling empirical account of the nature of urban governance revolving around the alliance of business interests and local public officials In *Reconstructing City Politics* author David L Imbroscio urges that urban political economy must now move forward beyond the question of what is to a consideration of what might be He systematically poses the possibilities for reconstructing the nature of contemporary city politics while integrating a wealth of innovative urban analysis To bring about this reconstruction Imbroscio explores three comprehensive alternative urban economic development strategies entrepreneurial mercantilism community based economic

development and municipal enterprise He considers whether these three strategies are likely to be effective for bringing about urban economic vitality and whether it is feasible for cities to pursue these efforts in the current political economic context By addressing these questions Imbroscio is able to reach conclusions about the possibilities for a successful and sustainable reconstruction of U S city politics This important volume will be vital for professionals and and researchers in urban planning urban studies urban and regional economics as well as urban politics Annual Register ... with Announcements for ... University of Chicago,1896 *The Caribbean City* Rivke Jaffe,2008 Caribbean cities are a unique yet underexposed phenomenon Their distinctiveness results from a combination of interrelated factors including a history of slavery development under the hemispheric hegemony of the United States and spatial limitations imposed by the settings of most Caribbean urban areas This innovative volume presents a detailed introduction to the spatial socio cultural and economic characteristics of the Caribbean city followed by case studies of selected cities in the Dutch Hispanophone Francophone and Anglophone Caribbean It discusses a broad range of disciplinary approaches in examining the urban Caribbean incorporating perspectives from anthropology sociology history political science geography and literary and cultural criticism BOOK JACKET Broken City Patrick M. Condon,2024-05-15 How can urban housing and the land underneath now account for half of all global wealth According to Patrick Condon the simple answer is that land has become an asset rather than a utility If the rich only indulged themselves with gold jewels and art we wouldn t have a global housing crisis But once global capital markets realized land was a good speculative investment runaway housing costs ensued In just one city Vancouver land prices increased by 600 percent between 2008 and 2016 How much wealth have investors extracted from urban land In this engaging readable and clearly reasoned treatise Patrick Condon explains how we have let land our most durable resource shift away from the common good and proposes bold strategies that cities in North America could use to shift it back **Annual Report of the Board of Education of the City of St. Louis, Mo., for the Year Ending ...** Saint Louis (Mo.).
