publication *Veto Bargaining* Charles M. Cameron, 2000-06-19 Combining game theory with unprecedented data this book analyzes how divided party Presidents use threats and vetoes to wrest policy concessions from a hostile congress **China's Civil Service Reform** Wang Xiaoqi, 2012-05-04 A market economy and a more liberal society have brought great challenges to China's outdated governance structure and personnel management To improve decision making in government and reshape the management system in face of a more complex economy post Mao authorities have implemented a number of administrative reforms including civil service reform which emphasized on selecting and promoting public officials based on their capability and work performance Thousands of positions have been filled since the civil service system was implemented nationwide in 1993 The Chinese civil service reform is of far reaching significance because it had the potential to be a departure from the established structure of cadre personnel management system developed in the 1950s However after several years of policy development scholars observe that the new reforms have done little to undermine the old cadre system Is this true Or does this conclusion oversimplify the complicated implementation of the reforms This book examines the implementation and performance of the on going civil service reforms in China Using the principal agent framework the author draws upon key case studies showing how the reforms affect civil servants incentives and behavior in the local context and the Chinese leadership's control over the bureaucracy China's reform experience speaks directly to many Asian countries facing urgent need to improve state capacity as the global financial crisis unfolds Rediscovering the Democratic Purposes of Education Lorraine McDonnell, P. Michael Timpane, Roger W. Benjamin, 2000 Why do America's public schools seem unable to meet today's social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today's education system seems more concerned with producing good employees than good citizens Meanwhile our country's diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today's leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political

science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America's future

Economic Analysis of Property Rights Yoram Barzel, Douglas W. Allen, 2023-08-31 The standard neoclassical model of economics is incapable of explaining why one form of organization arises over another It is a model where transaction costs are implicitly assumed to not exist however transaction costs are here defined as the costs of strengthening a given distribution of economic property rights and they always exist Economic Analysis of Property Rights is a study of how individuals organise resources to maximise the value of their economic rights over these resources It offers a unified theoretical structure to deal with exchange rights formation and organisation that traditional economic theory often ignores It explains how transaction costs can be reduced through reorganization and in the end how the distribution of property rights that exists is the one that maximizes wealth net of these transaction costs This necessary hypothesis explains much of the puzzling organizations and institutions that exist now and have existed in the past

International Public Financial Management Reform James Guthrie, Christopher Humphrey, Lawrence R. Jones, Olov Olson, 2005-05-01 This book is intended to give readers detailed information and perspectives on the reform of financial management reform practices in a variety of national settings around the world The chapters explore the reform agenda in each nation and factors that stimulated change Each chapter addresses the extent of the influence of New Public Management concepts and practices on reform implementation The nations whose experience is represented in this book are among the most often cited examples of progressive change to be examined and perhaps emulated by governments in other nations In the introductory chapter the editors address the question whether and to what extent the financial management reforms detailed in the book reveal real progress or a progression of questions and dilemmas faced but not solved over the past several decades

Paths between Peace and Public Service Jürgen René Blum, Marcos Ferreiro-Rodríguez, Vivek Srivastava, 2018-12-28 Building a capable public service is fundamental to postconflict state building Yet in postconflict settings short term pressures often conflict with this longer term objective To ensure peace and stabilize fragile coalitions the imperative for political elites to hand out public jobs and better pay to constituents dominates merit Donor financed projects that rely on technical assistants and parallel structures rather than on government systems are often the primary vehicle for meeting pressing service delivery needs What then is a workable approach to rebuilding public services postconflict Paths between Peace and Public Service seeks to answer this question by comparing public service reform trajectories in five countries Afghanistan Liberia Sierra Leone South Sudan and Timor Leste in the aftermath of conflict The study seeks to explain these countries different trajectories through process tracing and structured focused methods of comparative analysis To reconstruct reform trajectories the report draws on more than 200 interviews conducted with government officials and other stakeholders as well as administrative data The study analyzes how reform trajectories are influenced by elite bargains and highlights their path dependency shaped by preconflict legacies and the specifics of the conflict period As the first systematic study on

postconflict public service reforms it identifies lessons for the future engagement of development partners in building public services Rebuilding the bureaucracy is possibly the most underappreciated policy and research question in fragile states today This is one of the most politically astute and thoughtful books I've read on postconflict policy making of any kind Christopher Blattman Ramalee E Pearson Professor of Global Conflict Studies Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago Rebuilding states after conflict is the greatest challenge in development today And yet we know precious little about the actual experience of countries that have tried to rebuild their civil service and restore public services This is a monumental study based on extensive empirical data and field based research across multiple cases that actually opens up the black box of state building in conflict affected countries It should be required reading for anyone who takes on this extraordinary challenge Joel S Hellman Dean Edmund A Walsh School of Foreign Service Georgetown University There isn't a more pressing problem in international development than formulating practical strategies for building institutions in fragile states This book is a remarkable distillation of the frontline experiences of the World Bank in tackling this task Finally we have the basis for an empirically grounded assessment of what works and why Unputdownable James Robinson Reverend Dr Richard L Pearson Professor of Global Conflict and University Professor Institute Director Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago

Globalization, Politics, and Financial Turmoil Shanker Satyanath, 2005-12-22 In a world where capital moves freely across national borders developing countries have increasingly been subjected to devastating financial crises caused by the sudden

withdrawal of foreign capital How do such crises come about This book focuses on a novel causal path that of miscommunication By examining the determinants of Asia's financial crisis of 1997-8 it demonstrates why developing democracies are exceptionally vulnerable to breakdowns in communication between financial officials and the chief executive and outlines the disastrous consequences of such breakdowns The book offers a framework for predicting where chief executives are most likely to be ill informed about critical economic variables It also considers those situations in which politicians are dependent on financial officials whom they cannot completely trust or in which multiple veto players damage the flow of information
