Political Economy Of Urban Poverty:

The Political Economy of Urban Poverty Charles Sackrey, 1973 Charles Sackrey analyzes the problem of urban poverty pointing out the severe limitations of all existing data He explains the different theories of the principal causes of urban poverty in particular the poverty among urban blacks Considerable attention is devoted to different methods of studying poverty and the important role each plays in determining the solutions finally offered for public consideration There have been two basic kinds of antipoverty solutions over the past four decades liberal reform and revolutionary change Having been at different times strongly sympathetic to both camps Professor Sackrey has particular insights into the strengths and weaknesses of each In the final chapters of his book he contrasts the past performance of each camp and evaluates what they have to offer for the future Amazon

The Political Economy of Urban Poverty in Developing Countries Raj M. Desai, 2010 The implications of urban development for overall economic prosperity are well known Employment housing policing infrastructure and social policies in cities have been shaped and institutionalized through a complex set of interactions between various urban interests public officials and institutions In advanced industrial countries for example the rise of influential coalitions with the urban working class at the center was responsible for the proliferation of social protection in the 19th and 20th centuries Consequently a great deal is known about the dynamics of urban political mobilization and behavior in richer countries and of participation among the urban poor In the cities of the developing world however there is far less information available regarding these issues I survey some theoretical foundations for understanding the political economy of urban poverty before examining several pathologies of political life for the urban poor in the developing world I focus on some aspects of the city dweller s political agency or the lack thereof that limit the ability of the urban poor to engage in collective action to participate in decisionmaking to form effective organizations and to resist predatory behavior by officialdom I then examine some areas where further research is needed including the political economic bases for mobilization the prospects for pro poor urban social policy conditions determining the effectiveness of delegation and of membership organizations for the urban poor Abstract p 1

The Political Economy of the Urban Ghetto Daniel Roland Fusfeld, Timothy Mason Bates, 1984 The income of blacks in most northern industrial states today is lower relative to the income of whites than in 1949 Fusfeld and Bates examine the forces that have led to this state of affairs and find that these economic relationships are the product of a complex pattern of historical development and change in which black white economic relationships play a major part along with patterns of industrial agricultural and technological change and urban development They argue that today s urban racial ghettos are the result of the same forces that created modern America and that one of the by products of American affluence is a ghettoized racial underclass These two themes they state are essential for an understanding of the problem and for the formulation of policy Poverty is not simply the result of poor education skills and work habits but one outcome of the structure and functioning of the economy Solutions require more

than policies that seek to change people they await a recognition that basic economic relationships must be changed *The Political Economy of Urban Poverty and Environmental Management in Asia* Mike Douglass, Program on Environment (East-West Center), 1992

Urban Poverty, Political Participation, and the State Henry Dietz, 2010-11-23 Urban Poverty Political Participation and the State offers an unparalleled longitudinal view of how the urban poor saw themselves and their neighborhoods and how they behaved and organized to provide their neighborhoods with basic goods and services Grounding research on theoretical notions from Albert Hirschman and an analytical framework from Verba and Nie Dietz produces findings that hold great interest for comparativists and students of political behavior in general

The Political Economy of Poverty, Equity and Growth: A Comparative Study Deepak Lal, H. Myint, 1998-10-08 This wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty equity and growth It is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject The authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World Three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have

influenced policy Since growth is found to be the major means of alleviating mass structural poverty much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth Lal and Mynt also consider the available evidence on the role of direct transfers public and private in alleviating destitution and conjunctural poverty The Political Economy of Poverty Equity and Growth develops a novel framework for the comparative analysis of different growth outcomes This framework distinguishes between the different relative factor endowments of land labour and capital and between the different organizational structures of peasant versus plantation and mining economies It also differentiates between the polities of autonomous and factional states in the countries studied breaking the analysis down into further typological subdivisions and providing important new insights into the differing behaviour of economies that are rich in natural resources and those with abundant labour These insights constitute a richer explanation for the divergent developmental outcomes in East Asia compared with Latin America and Africa The evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies are likely to be adopted and lead to cycles of interventionism and liberalism The evidence is also used to provide an explanation for the surprising current worldwide Age of Reform
