Political Ideals In Medieval Italian Art The Frescoes In The Palazzo Dei Priori Perugia 1297:

Political Ideals in Medieval Italian Art Jonathan B. Riess, 1981 Art and Political Thought in Medieval England, C. 1150-1350 Laura Slater (Lecturer in history of art), 2018 An exploration of how power and political society were imagined represented and reflected on in medieval English art Images and imagery played a major role in medieval political thought and culture but their influence has rarely been explored This book provides a full assessment of the subject Starting with an examination of the writings of late twelfth century courtier clerics and their new vision of English political life as a heightened religious drama it argues that visual images were key to the development and expression of medieval English political ideas and arguments It discusses the vivid pictorial metaphors used in contemporary political treatises and highlights their interaction with public decorative schemas in English great churches private devotional imagery seal iconography illustrations of English history and a range of other visual sources Meanwhile through an exploration of events such as the Thomas Becket conflict the making of Magna Carta the Barons War and the deposition of Edward II it provides new perspectives on the political role of art especially in reshaping basic assumptions and expectations about government and political society in medieval England LAURA SLATER is a Fulford Junior Research Fellow at Somerville College University of Oxford *The Creation of Eve and Renaissance Naturalism* Jack M. Greenstein, 2016-08-23 This book traces how four early Renaissance masters represented the Creation of Eve which showed woman rising weightlessly from Adam's side at God's command *Arts of Power* Randolph Starn, Loren W. Partridge, 1992-01-01 Jacob Burckhardt claimed that the state in Renaissance Italy became a work of art In this book the authors illuminate the corollary that art in Italy became a work of state They study centres of power under three distinctive governments a civic republic of the 14th century a princely court of the 15th and an absolutist state of the 16th The authors argue that no less than armies laws and taxes painted halls of state were strategic instruments tactical weapons and technical machines of government Religious Enthusiasm in the Medieval West Gary Dickson, 2024-10-28 Collective religious enthusiasm was a surprisingly many sided influential and widespread phenomenon in medieval Europe Amongst the forms it took were remarkable revivalist movements like the flagellants of 1260 popular crusades like the often mythologized children's crusade of 1212 and the shepherds crusade of 1251 as well as popular excitement involving living saints and their veneration 115 cults in Perugia This book focuses upon particular thirteenth century revivals and popular crusades but does so in order to illuminate the nature of medieval western religious enthusiasm by exploring such topics as crowds penitential self laceration charismatic leaders prophecy runaway youths popular crusading fervour dreams and sanctity male and female A previously unpublished essay introduces the book initiating a discussion of religious enthusiasm in the medieval West and the second conversion of Europe Dante's Comedy and the Ethics of Invective in Medieval Italy Nicolino Applauso, 2019-11-13 Dante's Comedy and the Ethics of Invective in Medieval Italy proposes a new approach to invective and comic poetry in Italy during the thirteenth and fourteenth centuries

and opens the way for an innovative understanding of Dante's masterpiece. The Middle Ages in Italy offer a wealth of vernacular poetic invectives, polemical verses aimed at blaming specific wrongdoings of an individual, group, city, or institution that are both understudied and rarely juxtaposed. No study has yet provided a scholarly examination of the connection between this medieval invective tradition and its elements of humor, derision, and reprehension in Dante's Comedy. This book argues that these comic texts are rooted in and actively engaged with the social, political, and religious conflicts of their time. Political invective has a dynamic ethical orientation that is mediated by a humor that disarms excessive hostility against its individual targets, providing an opening for dialogue. While exploring medieval comic poems by Rustico Filippi from Florence, Cecco Angiolieri from Siena, and Folgore da San Gimignano, this study unveils new biographical data about these poets retrieved from Italian state archives; most of these data are published here in English for the very first time and ultimately shows what the medieval invective tradition can add to our understanding of Dante's Comedy.

Humanism and Empire Alexander Lee (Historian), 2018. The first comprehensive synoptic study of humanistic ideas of Empire in the period c. 1250–1402. Humanism and Empire offers a radical new interpretation of fourteenth-century political thought and raises wide-ranging questions about the foundations of modern constitutional ideas and the origins of the concept of liberty.

The Italian City-State Philip Jones, 1997-05-22. Italy in the Middle Ages was unique among the countries of Europe in recreating in a changed environment the urban civilization of antiquity: the society, culture, and political formations of city-states. This book examines the origins and nature of this phenomenon from the fall of Rome to the eve of its consummation, the Italian Renaissance. The explanation is sought in Italy's singular double existence between two contrasted worlds: ancient and medieval. The ancient was characterised by the total predominance of the landed aristocracy in economy and society, enforced through a peculiar system of city-states embracing town and country. The new medieval influences were marked by the separation of town, country, and aristocracy by the identification of towns with trade and a mercantile bourgeoisie, and by commercial and proto-industrial revolution. Italy shared in both worlds. It remained a land of cities and of an urbanized ruling class, except in the Norman South, and re-established territorial city-states, but the states were very different from those of antiquity: the city leaders in the commercial revolution, and Italy itself seen as a nation of shopkeepers, birthplace of capitalism. In this fascinating and ground-breaking study, Philip Jones traces in detail the tension and interaction between the two traditions: civic and patrician, mercantile and bourgeois, through all phases of Italian life to their culmination in two rival regimes of communes and despots.

Bishops, Saints, and Historians Robert Brentano, edited by William L. North, 2023-06-14. Throughout his career, Robert Brentano attempted to understand the nature and style of ecclesiastical institutions in Italy and the British Isles: the specific qualities of saints and the communities that formed around them, and the ways in which seemingly cryptic archival remains of medieval administrative activity, as well as chronicles and lives, could reveal vital details about change and continuity in local and regional religious life, and even the color of men's souls. These

issues are explored in the essays assembled in Parts I Bishops and II Saints Part III Historians brings together articles that examine the writing of history by both medieval authors and modern historians and includes Brentano's reflections on his own practice as an historian The introduction by W L North offers a brief biography and introduction to reading Brentano's works followed by a complete bibliography of his publications *Imagining the Human Condition in Medieval Rome*

Kristin B. Aavitsland, 2017-07-05 The first monograph on the Vita Humana cycle at Tre Fontane this book includes an overview of the medieval history of the Roman Cistercian abbey and its architecture as well as a consideration of the political and cultural standing of the abbey both within Papal Rome and within the Cistercian order Furthermore it considers the commission of the fresco cycle the circumstances of its making and its position within the art historical context of the Roman Duecento Examining the unusual blend of images in the Vita Humana cycle this study offers a more nuanced picture of the iconographic repertoire of medieval art Since the discovery of the frescoes in the 1960s the iconographic programme of the cycle has remained mysterious and an adequate analysis of the Vita Humana cycle as a whole has so far been lacking Kristin B Aavitsland covers this gap in the scholarship on Roman art circa 1300 and also presents the first interpretative discussion of the frescoes that is up to date with the architectural investigations undertaken in the monastery around 2000 Aavitsland proposes a rationale behind the conception of the fresco cycle thereby providing a key for understanding its iconography and shedding new light on thirteenth century Cistercian culture Negotiating Secular and Sacred in Medieval Art Amanda Luyster, 2017-07-05 Offering original analysis of the convergence between sacred and secular in medieval works of art and architecture this collection explores both the usefulness and limitations of these terms for describing medieval attitudes The modern concepts of sacred and secular are shown to be effective as scholarly tools but also to risk imposing false dichotomies The authors consider medieval material culture from a broad perspective addressing works of art and architecture from England to Japan and from the seventh to the fifteenth century Although the essays take a variety of methodological approaches they are unified in their emphasis on the continuing and necessary dialectic between sacred and secular The contributors consciously frame their interpretations in terms and perspectives derived from the Middle Ages thereby demonstrating how the present art historical terminology and conceptual frameworks can obscure the complexity of medieval life and material culture The resonance among essays opens possibilities for productive cross cultural study of an issue that is relevant to a diversity of cultures and sub periods Introducing an innovative approach to the literature of the field this volume complicates and enriches our understanding of social realities across a broad spectrum of medieval worlds
