Modern Political Institutions Simeon Eben Baldwin, 1908

The Oxford Handbook of Modern British Political

History, 1800-2000 David Brown, Robert Crawford, Gordon Pentland, 2018 The two centuries after 1800 witnessed a series of sweeping changes in the way in which Britain was governed the duties of the state and its role in the wider world Powerful processes from the development of democracy the changing nature of the social contract war and economic dislocation have challenged and at times threatened to overwhelm both governors and governed Such shifts have also presented challenges to the historians who have researched and written about Britain s past politics This Handbook shows the ways in which political historians have responded to these challenges providing a snapshot of a field which has long been at the forefront of conceptual and methodological innovation within historical studies It comprises thirty three thematic essays by leading and emerging scholars in the field Collectively these essays assess and rethink the nature of modern British political history itself and suggest avenues and questions for future research The Oxford Handbook of Modern British Political History thus provides a unique resource for those who wish to understand Britain s political past and a thought provoking long view for those interested in current political challenges

Distrust of Institutions in Early Modern Britain and America Brian P. Levack, 2022 Distrust of public institutions which reached critical proportions in Britain and the United States in the first two decades of the twenty first century was an important theme of public discourse in Britain and colonial America during the early modern period Demonstrating broad chronological and thematic range the historian Brian P Levack explains that trust in public institutions is more tenuous and difficult to restore once it has been betrayed than trust in one s family friends and neighbors because the vast majority of the populace do not personally know the officials who run large national institutions Institutional distrust shaped the political legal economic and religious history of England Scotland and the British colonies in America It provided a theoretical and rhetorical foundation for the two English revolutions of the seventeenth century and the American Revolution in the late eighteenth century It also inspired reforms of criminal procedure changes in the system of public credit and finance and challenges to the clergy who

dominated the Church of England the Church of Scotland and the churches in the American colonies This study reveals striking parallels between the loss of trust in British and American institutions in the early modern period and the present day The English Catalogue of Books Published from January, 1835, to January, 1863, 1864 **Modern Political**

Science Robert Adcock, Mark Bevir, Shannon C. Stimson, 2009-01-10 Since emerging in the late nineteenth century political science has undergone a radical shift from constructing grand narratives of national political development to producing empirical studies of individual political phenomena What caused this change Modern Political Science the first authoritative history of Anglophone political science argues that the field's transformation shouldn't be mistaken for a case of simple progress and increasing scientific precision On the contrary the book shows that political science is deeply historically contingent driven both by its own inherited ideas and by the wider history in which it has developed Focusing on the United States and the United Kingdom and the exchanges between them Modern Political Science contains contributions from leading political scientists political theorists and intellectual historians from both sides of the Atlantic Together they provide a compelling account of the development of political science its relation to other disciplines the problems it currently faces and possible solutions to these problems Building on a growing interest in the history of political science Modern Political Science is necessary reading for anyone who wants to understand how political science got to be what it is today or what it might look like tomorrow **Modern England, 1901-1984** Alfred F. Blackie's modern cyclopedia of universal information, ed. by C. Annandale Blackie & Son,1897 **Transfer State** Peter Sloman,2019-10-30 The idea of a guaranteed minimum income has been central to British social policy debates for more than a century Since the First World War a variety of market economists radical activists and social reformers have emphasized the possibility of tackling poverty through direct cash transfers between the state and its citizens As manufacturing employment has declined and wage inequality has grown since the 1970s cash benefits and tax credits have become an important source of income for millions of working age households including many low paid workers with children The nature and purpose of these transfer payments however remain highly contested Conservative and New Labour governments have used in work benefits and conditionality requirements to activate the unemployed and reinforce the incentives to take low paid work an approach which has reached its apogee in Universal Credit By contrast a growing number of campaigners have argued that the challenge of providing economic security in an age of automation would be better met by paying a Universal Basic Income to all citizens Transfer State provides the first detailed history of guaranteed income proposals in modern Britain which brings together intellectual history and archival research to show how the pursuit of an integrated tax and benefit system has shaped UK public policy since 1918 The result is a major new analysis of the role of cash transfers in the British welfare state which sets Universal Credit in a historical perspective and examines the cultural and political barriers to a Universal Basic Income **The United States Catalog** Mary Burnham,Carol Hurd,1928 Ideology and Politics in
