Art and Political Thought in Medieval England, C. 1150-1350 Laura Slater (Lecturer in history of art), 2018 An exploration of how power and political society were imagined represented and reflected on in medieval English art Images and imagery played a major role in medieval political thought and culture but their influence has rarely been explored This book provides a full assessment of the subject Starting with an examination of the writings of late twelfth century courtier clerics and their new vision of English political life as a heightened religious drama it argues that visual images were key to the development and expression of medieval English political ideas and arguments It discusses the vivid pictorial metaphors used in contemporary political treatises and highlights their interaction with public decorative schemas in English great churches private devotional imagery seal iconography illustrations of English history and a range of other visual sources Meanwhile through an exploration of events such as the Thomas Becket conflict the making of Magna Carta the Barons War and the deposition of Edward II it provides new perspectives on the political role of art especially in reshaping basic assumptions and expectations about government and political society in medieval England LAURA SLATER is a Fulford Junior Research Fellow at Somerville College University of Oxford

Edward the Black Prince David Green, 2023-08-08 This fully updated second edition uses the career of Edward the Black Prince to explore key developments in the history of late medieval Europe The eruption of the Hundred Years War the arrival of the Black Death England's first religious heresy and major innovations in the role of parliament all took place during Edward's lifetime As king in waiting and one of the most significant noblemen in the realm the prince was a major influence over local and international politics and his example helped reshape concepts of lordship throughout the Plantagenet estates This thoroughly revised edition includes new sources and builds on the wealth of scholarship which has been published in recent years about the fourteenth century It includes considerations of the prince's military career in France and Iberia his household and the colonial characteristics of his administrations in Wales and Aquitaine The prince's career also reveals the influence of the chivalric ethic and the importance of Gascony to the English crown while his relationship with Joan the Fair Maid of Kent is suggestive of the changing character of female agency in the later middle ages Drawing on central themes such as plague chivalry lordship parliament gender and religion Edward the Black Prince is essential reading for all students and scholars concerned with society culture and power in medieval Europe

Heraldry, Pageantry and Social Display in Medieval England Peter R. Coss, Maurice Keen, 2003 Discussion of display through a range of artefacts and in a variety of contexts family and lineage social distinction and aspiration ceremony and social bonding and the expression of power and authority Medieval culture was intensely visual Although this has long been recognised by art historians and by enthusiasts for particular media there has been little attempt to study social display as a

subject in its own right And yet display takes us directly into the values aspirations and indeed anxieties of past societies In this illustrated volume a group of experts address a series of interrelated themes around the issue of display and do so in a way which avoids jargon and overly technical language Among the themes are family and lineage social distinction and aspiration ceremony and social bonding and the expression of power and authority The media include monumental effigies brasses stained glass rolls of arms manuscripts jewels plate seals and coins Contributors MAURICE KEEN DAVID CROUCH PETER COSS CAROLINE SHENTON ADRIAN AILES FR D RIQUE LACHAUD MARIAN CAMPBELL BRIAN and MOIRA GITTOS NIGEL SAUL FIONN PILBROW CAROLINE BARRON and JOHN WATTS

Royal Regulation of Loans and Sales in Medieval England Gwen Seabourne, 2003 Financial legislation demonstrates the advancing role of law in the later middle ages

The Baronage in the Reign of Richard II, 1377-1399 Dr Keith E. Fildes, 2009-03-26

War, Politics and Finance in Late Medieval English Towns Christian Drummond Liddy, 2005 The strengthening of ties between crown and locality in the fourteenth century is epitomised by the relationships between York and Bristol then amongst the largest and wealthiest urban communities in England and the crown This book combines a detailed study of the individuals who ruled Bristol and York at the time with a close analysis of the texts which illustrate the relationship between the two cities and the king thus offering a new perspective on relations between town and crown in late medieval England Beginning with an analysis of the various demands financial political and commercial made upon the towns by the Hundred Years War the author argues that such pressures facilitated the development of a partnership in government between the crown and the two towns meaning that the elite inhabitants became increasingly important in national affairs The book goes on to explore in detail the nature of urban aspirations within the kingdom arguing that the royal charters granting the towns their coveted county status were crucial in binding their ruling elites into the apparatus of royal government and giving them a powerful voice in national politics

Robert de Vere, Earl of Oxford and Duke of Ireland (1362-1392) James Ross, 2024 The first full length study of one of the most controversial figures of later fourteenth century England

Education and Learning in the City of York, 1300-1560 Joann H. Moran, 1979

Law, Governance, and Justice, 2013-01-14 How law is made how governance works and the response of the governed remain crucial modern questions whose roots in many parts of the world reach deep into the past of medieval England Scholars have long discussed these issues and new perspectives regularly emerge This volume brings together contemporary views from leaders in the field and from younger scholars both historians and literary critics Classic themes and incidents are creatively revisited and new avenues of approach are suggested

Early Common Petitions in the English Parliament, c.1290-c.1420 W. Mark Ormrod, Helen Killick, Phil Bradford, 2017-10-30 This volume contains previously unpublished fourteenth century parliamentary common petitions the basis for much of the royal legislation of the period

Government and Merchant Finance in Anglo-Gascon Trade, 1300-1500 Robert Blackmore, 2020-02-22 The Late Middle Ages c 1300 c 1500 saw the development of many of the key

economic institutions of the modern unitary nation state in Europe After the commercial revolution of the thirteenth century taxes on trade became increasingly significant contributors to government finances and as such there were ever greater efforts to control the flow of goods and money This book presents a case study of the commercial and financial links between the kingdom of England and the duchy of Aquitaine across the late medieval period with a special emphasis on the role of the English Plantagenet government that had ruled both in a political union since 1154 It establishes a strong connection between fluctuations in commodity markets large monetary flows and unstable financial markets most notably in trade credit and equity partnerships It shows how the economic relationship deteriorated under the many exogenous shocks of the period the wars plagues and famines as well as politically motivated regulatory intervention Despite frequent efforts to innovate in response both merchants and governments experienced a series of protracted financial crises that presaged the break up of the union of kingdom and duchy in 1453 with the latter's conquest by the French crown Of particular interest to scholars of the late medieval European economy this book will also appeal to those researching wider economic or financial history

Representing History, 900-1300 Robert Allan Maxwell, 2010 Brings together the disciplines of art music and history to explore the importance of the past to conceptions of the present in the central Middle Ages Provided by publisher A Century of British Medieval Studies Alan Deyermond, 2007-11-29 This is an authoritative guide to the complete range of medieval scholarship undertaken in twentieth century Britain history archaeology language culture Some of the twenty nine essays focus on changes in research method or on the achievements of individual scholars others are the personal account of a lifetime's work in a discipline Many outline the ways in which subjects may develop in the twenty first century Public Order and Law Enforcement Anthony Musson, 1996 The period from 1294 to 1350 witnessed the final phase of the Angevin administrative advances in England and was crucial in determining the shape and principal features of England's new judicial system This study challenges the received orthodoxy on judicial development in the first half of the 14th century It concentrates on the personnel of local justice and the wider administrative context to build up a composite picture of attitudes to public order and law enforcement through a systematic examination of the surviving legal records The Commercialisation of English Society, 1000-1500 R. H. Britnell, 1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such
