Political Capacity In Developing Societies:

Political Capacity in Developing Societies A. H. Somjee, 1982-03-11 **Political Capacity And Economic Behavior** Marina Arbetman, Jacek Kugler, 2018-10-08 Given today's heightened competition between national economies in the global marketplace many have come to believe that government intervention is needed in order for a country to maximize its economic well being But to what extent can even the most capable government act to attract investment and enhance economic growth without creating or exacerbating conflicts in society especially when unpopular measures such as those aimed at controlling inflation and population growth must be implemented This timely book by an international team of economists and political scientists tackles that question head on The contributors draw on theory and empirical data to provide a framework for measuring governments ability to gather material resources and mobilize populations They analyze a variety of policy choices made in the United States and in other nations around the world during the past fifty years showing how states can increase their political capacity and thereby reduce economic transaction costs and domestic resistance to government goals **Political Society in Developing Countries** A.H. Somjee, 1984-06-18 Parallels and Actuals of Political Development A.H. Somjee, 1986-06-18 *Globalization, Political Institutions and the Environment in Developing Countries* Gabriele Spilker, 2013-01-04 Though industrialized countries are usually the ones indicted when environmental pollution is discussed over the few last years the rate of emissions in developing countries has increased by a startling amount The fallout from this increase is evidenced by the struggle of cities like Beijing to improve their air quality Yet there also exist developing countries such as Thailand that have managed to limit their emissions to more tolerable levels raising the question why are some developing countries more willing or able to take care of their environment than others In this volume Gabriele Spilker proposes two factors for the differences in developing countries environmental performance integration into the international system and domestic political institutions Focusing on developing countries generally but also closely examining important global powers such as China and India Spilker employs a rigorous quantitative analysis to demonstrate the importance of considering various aspects of the international system in order to draw more comprehensive conclusions about how globalization affects environmental performance She asserts that democratic political institutions can shield developing countries from the negative consequences of either trade or foreign direct investment But at the same time developing countries by avoiding demanding commitments are more likely to use environmental treaties as a cover than as a real plan of action Adding a new dimension to the existing body of research on environmental quality and commitment Spilker convincingly demonstrates how international and domestic political factors interact to shape developing countries ability and willingness to care for their natural environment **The Political Economy of Climate Finance Effectiveness in Developing Countries** Mark Purdon, 2024-01-01 There is ample evidence that engaging developing countries on climate change mitigation would have significant positive impacts on global climate efforts There is much debate however on the

most effective strategy for unlocking these low cost mitigation opportunities While the Clean Development Mechanism CDM emerged as the main climate finance instrument for engaging developing countries under the Kyoto Protocol the carbon market approach it embodied would largely be replaced by a new array of climate finance instruments based on climate funds In *The Political Economy of Climate Finance Effectiveness in Developing Countries* Mark Purdon shows that the effectiveness of climate finance instruments to reduce emissions under either strategy has depended on the interaction between prevailing ideas about how to develop a nation's economy as well as state interests in various economic sectors Based on multiple field visits over a decade in three countries the author demonstrates that climate finance instruments have been more effectively implemented when the state treats them as vehicles for addressing priority development issues Climate finance instruments were more consistently and effectively implemented in Uganda and Moldova than Tanzania despite differences in state capacity between countries This pattern held for the CDM as well as subsequent instruments largely based on climate funds such as Reducing Emissions from Deforestation and Forest Degradation REDD and other national mitigation actions Contributing to broader debates on international climate cooperation Purdon's findings inform international efforts to support national climate plans and catalyze low carbon development by emphasizing the importance of domestic politics and the state

Public Sector Reforms in Developing Countries Charles Conteh,Ahmed Shafiquel Huque,2014-04-03 The underpinning assumption of public management in the developing world as a process of planned change is increasingly being recognized as unrealistic In reality the practice of development management is characterized by processes of mutual adjustment among individuals agencies and interest groups that can constrain behaviour as well as provide incentives for collaborative action Paradoxes inevitably emerge in policy network practice and design The ability to manage government departments and operations has become less important than the ability to navigate the complex world of interconnected policy implementation processes Public sector reform policies and programmes as a consequence are a study in the complexities of the institutional and environmental context in which these reforms are pursued Building on theory and practice this book argues that advancing the theoretical frontlines of development management research and practice can benefit from developing models based on innovation collaboration and governance The themes addressed in *Public Sector Reforms in Developing Countries* will enable public managers in developing countries cope in uncertain and turbulent environments as they seek optimal fits between their institutional goals and environmental contingencies

Papers on the Political Economy of Tanzania Kwan S. Kim,Robert B. Mabele,Michael J. Schultheis,1979 **Political Parties, Business Groups, and Corruption in Developing Countries** Vineeta Yadav,2011-04-13 Political corruption is one of the globe's most pressing yet seemingly permanent problems It is a root cause of low growth and inequality and plagues numerous nations throughout the world in varying degrees In *Political Parties Business Groups and Corruption in Developing Countries* Vineeta Yadav tackles the puzzle of corruption by analyzing the role that business lobbying plays in it She shows that the

structure of a developing nation's legislative institutions frequently determines whether such institutions promote or restrain corruption. Combining focused studies of legislative institutions and business groups in India and Brazil with a broader survey of corruption in sixty-four developing democracies, Yadav shows how systems with powerful parties rather than ones with powerful individual legislators encourage the most corruption. A rigorous comparative examination of the connections between political institutions, lobbying, and corruption, this work will reshape our understanding of how developing country democracies can both discourage and encourage bribery, vote buying, and influence peddling.

The Political Economy of Bank Regulation in Developing Countries Emily Jones, 2020. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. International banking standards are intended for the regulation of large, complex risk-taking international banks with trillions of dollars in assets and operations across the globe. Yet they are being implemented in countries with nascent financial markets and small banks that have yet to venture into international markets. Why is this? This book develops a new framework to explain regulatory interdependence between countries in the core and the periphery of the global financial system. Drawing on in-depth analysis of eleven countries across Africa, Asia, and Latin America, it shows how financial globalisation generates strong reputational and competitive incentives for developing countries to converge on international standards. It explains how specific cross-border relations between regulators, politicians, and banks within developing countries and international actors, including investors, peer regulators, and international financial institutions, generate regulatory interdependence. It explains why some configurations of domestic politics and forms of integration into global finance generate convergence with international standards, while other configurations lead to divergence. This book contributes to our understanding of the ways in which governments and firms in the core of global finance powerfully shape regulatory decisions in the periphery and the ways that governments and firms from peripheral developing countries manoeuvre within the constraints and opportunities created by financial globalisation.

Public Finance and Economic Growth in Developing Countries Stephen Peterson, 2015-04-24. Public finance is crucial to a country's economic growth, yet successful reform of public finances has been rare. Ethiopia is an example of a country that undertook comprehensive reform of its core financial systems independent of the IMF and the World Bank and successfully transformed itself into one of the fastest growing economies in Africa. With Ethiopia's twelve-year reform as its guiding case study, this book presents new analytical frameworks to help governments develop better financial reforms. It shows in detail how four core financial systems—budgeting, accounting, planning, and financial information systems—can be reformed. One of the principal findings presented is that governments must establish basic public financial administration before moving to more sophisticated public financial management. Other key findings include the identification of four strategies of reform: recognize, improve, change, and sustain. The centrality of ongoing learning to the process of reform and the importance of government ownership
