Political Economy Of The Arms Race:

The Arms Race Miroslav Nincic, 1982 **The Political Economy of the Arms Race** R.T. Maddock, 1990-06-18 Written by the author of *The Political Economy of Soviet Defence Spending* and co author of *The Growth of the British Economy* this book looks at the international dimension the American and the Soviet defence economy the NATO alliance the Warsaw Pact and the international arms trade **The Political Economy of the Arms Race** Rowland Thomas Maddock, 1990 **The Global Spread Of Arms** Frederic S Pearson, 2018-02-19 This book surveys the broad terrain covered by the concept of the security dilemma and points out landmarks along the route proceeding from proliferation to economic interests showing that the arms trade is built into development of both industrial technology and political competition **The Political Economy of Military Spending in the United States** Alex Mintz, 2002-01-31 Leading scholars examine the links between domestic politics defense spending and the economics of the US defense industry **Political Economy of Soviet Military Power** Leo Cooper, 1989-06-18 A study of the political economy of Soviet military power examining Soviet Russian ideology and tradition theory and practice of the military doctrine the domestic aspect and new economic realism technology and efficiency and Perestroika and Glasnost from 1985 1987 **The Political Economy of War and Peace** Murray Wolfson, 2012-12-06 cancer n any malignant tumor Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up secondary tumors Each individual primary tumor has its own pattern There are probably many causative factors Treatment depends on the type of tumor the site of the primary tumor and the extent of the spread Oxford Concise Medical Dictionary 1996 97 Let us begin by stating the obvious Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction To be sure all wars have features in common people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise Consequently it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace The fact that wars are historical events need not discourage us On the contrary we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand It follows that the study of conflict must be an interdisciplinary one It is or a penchant for eclecticism that leads to that conclusion but the not humility multi dimensionality of war itself **Global Political Economy and the Modern State System** Tobias Ten Brink, 2014-04-03 In *Global Political Economy and the Modern State System* Tobias ten Brink contributes to an understanding of the modern state system its conflicts and its transformation In contrast to the political attractiveness of optimistic theoretical approaches to globalisation this book demonstrates how an analytical approach rooted in Global Political Economy GPE helps to explain both the tendencies towards integration and towards rivalry in international relations By way of a historical reconstruction of different world order phases in the twentieth century ten Brink analyses multiple phase specific variations of socioeconomic and geopolitical conflicts that are significant for the modern capitalist world

system Revised edition of Geopolitik Geschichte und Gegenwart kapitalistischer Staatenkonkurrenz Verlag Westf lisches Dampfboot M nster 2008 **The Economics of Military Expenditures** Christian Schmidt,1987-07-07 *Economic Theories of Peace and War* Fanny Coulomb,2004-07-29 War often comes down to one thing money The role of economics in the study of both peace and war is arguably then the most important single factor when it comes to the study of defence This excellent new book from Fanny Coulomb will be of interest not only to those involved in the burgeoning field of defence economics it will also be of vital interest to students and academics from international relations defence studies philosophy and political science backgrounds Political Economy and Grand Strategy Mark R. Brawley,2009-09-10 This book examines traditional balance of power theory from a political economic perspective using historical examples to draw out distinctions between the liberal and realist approach and how this affects grand strategy The realist view of the balance of power theory includes implicit assumptions that economic assets can be turned quickly into power and that states always respond to threats quickly and only with a view to the short run These assumptions drive many of the expectations generated from traditional balance of power theory discouraging realists from looking at domestic sources of power which in turn undermined their ability to frame strategic decisions properly By thinking about how power must be managed over time however we can model the choices policy makers confront when determining expenditures on defense while keeping an eye on the impact of those costs on the economy By emphasizing the role of the state identifying different causal patterns in domestic politics and demonstrating the importance of systemic competition this book aims to establish why a neo classical realist approach is not only different from a liberal approach but also superior when addressing questions on grand strategy This book will be of much interest to students of security studies international political economy grand strategy and IR theory in general Mark R Brawley is Professor of Political Science at McGill University Montreal Canada He is author of several books on International Relations specialising in the connections between political economic issues and security **A Political Economy of American Hegemony** Thomas Oatley,2015-02-16 In A Political Economy of American Hegemony Thomas Oatley explores how America s military buildups have produced postwar economic booms that have culminated in monetary and financial crises The 2008 subprime crisis as well as the housing bubble that produced it was the most recent manifestation of this buildup boom and bust cycle developing as a consequence of the decision to deficit finance the wars in Afghanistan and Iraq Earlier instances of financial crises were generated by deficit financed buildups in the 1980s and the late 1960s The buildup boom and bust pattern results from the way political institutions and financial power shape America s response to military challenges political institutions transform increased military spending into budget deficits and financial power enables the United States to finance these deficits by borrowing cheaply from the rest of the world Oatley examines how this cycle has had a powerful impact on American and global economic and financial performance The Political Economy of Regional Peacemaking Steven E. Lobell,Norrin M. Ripsman,2016-02-02 An expansive investigation of the efficacy
