*Political Knowledge in the Czech Republic* Pat Lyons, 2017-06-01 The book examines the origins nature and impact of different facets of political knowledge in the Czech Republic between 1967 and 2014 The central argument presented in this book is that evaluating citizens on the basis of objective or factual knowledge alone makes little sense What citizens know about politics comes from a variety of sources that are complementary This is the first detailed study of how much Czechs know about politics and why it matters Here are some of the key findings of this book There are many forms of political knowledge Citizens make decisions using different forms of political knowledge Czechs knowledge of politics has remained constant over time How people answer knowledge questions in surveys matters Political knowledge is shaped by personality traits Factual knowledge is linked with forecasting social change but is not always linked with making correct voting Experts with high levels of knowledge do not agree on what is a correct answer **Political Literacy** Fredric G. **Roman Political Culture** Laurens E. Tacoma, 2020-03-04 This volume offers an innovative analysis of Roman political culture in Italy from the first to the sixth century AD on the basis of seven case studies Its main contention is that during the period in which Italy was subject to single rule political culture took on a specific form being the product of the continued

existence of two traditional political institutions the senate in the city of Rome and the local city councils in the rest of Italy Under single rule the position of both institutions was increasingly weakened and they became part of a much wider institutional landscape although the fact that they continued to function until the end of the sixth century AD must imply that they retained meaning for their members even while society as a whole was undergoing radical changes As their powers and prerogatives shrank considerably their significance became social rather than political as they allowed elites to enact and negotiate their own position in society However the tension between the participatory nature of these institutions and the restriction of their power generated complex social dynamics on the one hand participants became locked in mutual expectations about each other's behaviour and were compelled to enact particular social roles while on the other hand they retained a degree of agency They were encapsulated in an honorific language and in a set of conventions that regulated their behaviour but that at the same time offered them room for manoeuvre this degree of autonomy provides a compelling basis on which to challenge the prevailing view among historians that deliberative and participatory politics effectively ended with the institution of the Roman monarchy under Augustus

Justice and Legitimacy in Upbringing Matthew Clayton, 2006-04-06 Issues concerning the upbringing of children are among the most contested in modern political debate How should childrearing rights and resources be distributed between families To what extent are parents morally permitted to shape the beliefs and desires of their children At what age should children acquire adult rights such as the right to vote Justice and Legitimacy in Upbringing sets out a liberal conception of political morality that supports a set of answers to these questions which many liberals have been

reluctant to accept The central argument is that the ideals of justice and individual autonomy place significant constraints on both governments and parents Clayton insists that while their interests should count directly in allocating childrearing rights parents should exercise their rights in accordance with these liberal ideals He argues that we owe our children a childhood that develops their sense of justice but in which further attempts to enrol them into particular religious practices for instance are illegitimate Justice and Legitimacy in Upbringing is a work of applied political philosophy that will be of interest to students of political theory the philosophy of education and social and public policy

**Emancipated Education** Azhar Ibrahim, 2022-12-06 The obsession with world rankings and vocational training has turned universities into factories for the production of students and publications Teaching plays second fiddle to research output normally circulated within a small circle of experts to be validated or condemned to the abyss leading to the justifiable charge that universities are ivory towers In Emancipated Education Dr Azhar Ibrahim's call to reclaim the space of what he calls the educative front as a site for emancipation is timely and urgent Channelling the thoughts of giants like Paulo Freire and N F S Grundtvig the book articulates the higher purpose of higher education It serves to re-humanise the human process of learning that we may have harmed Dr Nazry Bahrawi Literary and cultural critic Co founder of the Bras Basah Open School for Theory and Philosophy Dr Azhar's book is a detour around the current climate of global education which tends to celebrate rankings at the expense of empowerment and humanisation He clearly shows that education should be a combative front against any establishment without having to succumb to dogmatic power through a combination of reason ethics conscience and spirituality For him education is not just a ladder for immediate gains but is also supposed to be a part of supra structure to ensure social justice Emancipated Education is a must read book for teachers lecturers and education policy makers alike who wish to recharge their intellectual spirits Dr Achmad Uzair Fauzan Director of the Office for International Affairs Sunan Kalijaga State Islamic University Yogyakarta

Sokoloff, 2019-08-29 The field of political science has not given sufficient attention to pedagogy This book outlines why this is a problem and promotes a more reflective and self critical form of political science pedagogy To this end the author examines innovative work on radical pedagogy such as critical race theory and feminist theory as well as more traditional perspectives on political science pedagogy Bridging the divide between this research and scholarship on both teaching and learning opens the prospect of a critical radical and utopian form of political science pedagogy With chapters on Socrates Frantz Fanon Paulo Freire Leo Strauss Sheldon S Wolin e learning and a prison field trip this book outlines a new path for political science pedagogy

Participation Samuel Hickey, Giles

Mohan, 2013-07-04 Participation has established itself as a significant approach to project implementation policy making and governance in developing and developed countries alike. Recently however it has become fashionable to dismiss participation as more rhetoric than substance and subject to manipulation by agencies and social change agents intent simply on pursuing their own agendas under cover of community consent. In this important new volume development and other social policy scholars and practitioners seek to rebut this simplistic conclusion while addressing the problems of power and politics which have beset some approaches to participation. They describe and analyse new experiments in participation from a wide diversity of social contexts that show how far from being a redundant and depoliticizing concept participation can, given certain conditions, be linked to genuinely transformative processes and outcomes for marginalized communities and people. This volume is the first comprehensive attempt to evaluate the state of participatory approaches in the aftermath of the Tyranny critique. It captures the recent convergence between participatory development and participatory governance and spans the range of institutional actors involved in these approaches: the state, civil society and donor agencies. It places participatory interventions in a political context and links them directly to issues of popular agency. The volume embeds participation within contemporary advances in development theory and proposes theoretical and practical ways forward for relocating participation as a genuinely transformative approach. Scholars and practitioners alike, and from a diversity of disciplines and community and development agencies, are likely to find this volume a theoretically illuminating and practically useful source of ideas about how participation can achieve concrete liberatory outcomes.

**Political Education in Times of Populism** Edda Sant, 2021-06-21 In professional and academic contexts nothing is more important than helping people to understand and engage with democratic society. Sant has written an excellent book which helps greatly towards that end. She has developed incisive new arguments about the nature of contemporary politics and education. Using the most recent as well as classic literature, she explores key ideas and issues. Through wide-ranging discussions and by referring to her own valuable empirical work, she characterizes and creates thoughtful insights and innovative pedagogical approaches. This book achieves the very difficult task of illuminating complex ideas at the same time as helping to determine practical ways to achieve social justice through education. Political education has been neglected for too long. This book is a bold new step in its achievement. Ian Davies, Emeritus Professor, University of York, UK. This book examines political education in times of democratic crisis, polarisation and uncertainty. Using populism as a diagnostic tool, the book scrutinises current democratic practices and considers alternatives for future social studies and citizenship education. The author examines contemporary events including Brexit, the Catalan referendum for independence and protests in Chile to ask how democratic educators can respond to times of crisis. Centered on themes of knowledge and ideology, the book draws together political philosophy and educational research to map out, critically analyse and offer alternatives to dominant debates on political education. It will be of interest

and value to scholars examining the relationship between democracy and educational theory and practice Edda Sant is Senior Lecturer at Manchester Metropolitan University UK A former social studies teacher her research interests lie in citizenship political and democratic education She has published widely in this field and in 2016 was recognized with a Children s Identity Citizenship European Association Award Citizenship Education and Social Development in Zambia Ali A. Abdi,Edward Shizha, Lee Ellis, 2010-06-01 Zambia the butterfly shaped central African country has a population of about 11 million people and as other Sub Saharan African countries has been trying to democratize since the early 1990s Clearly though the promise of political reform did not fulfill the expectations of the public and with about 60 percent of the population living below the poverty line many Zambians are no longer confident that more open political systems can improve their lives But the problem may not be inherent in the political process itself and could be found more in the apparent disconnection between people s needs and the way the country s affairs are run It is with respect to these and related issues that this book emphasizes the crucial relationship between education and political participation and specifically highlights citizenship education as essential for Zambia s social development Social development which should comprise inter alia the economic political and cultural wellbeing of societies can be enhanced by citizenship education which focuses on elevating people s understanding of their rights and responsibilities vis vis government institutions structures and functions Indeed it is the centrality of the political component in people s lives especially its relationship with public policy and public programs that should underline the important role of citizenship education In describing these issues the book analyzes the role of the media women s groups and youth in enhancing the political educational and by extension the economic lives of the Zambian people The book should interest students and scholars of Zambian as well as African education politics and social development It should also be useful for policy makers institutional managers and both public and para public leaders in Zambia and elsewhere in the continent
