Inside/Outside R. B. J. Walker, 1993 In this book Rob Walker offers an original analysis of the relationship between twentieth century theories of international relations and the political theory of civil society since the early modern period He views theories of international relations both as an ideological expression of the modern state and as a clear indication of the difficulties of thinking about a world politics characterized by profound spatiotemporal accelerations International relations theories should be seen the author argues more as aspects of contemporary world politics than as explanations of contemporary world politics These theories are examined in the light of recent debates about modernity and post modernity sovereignty and political identity and the limits of modern social and political theory This book is a major contribution to the field of critical international relations and will be of interest to social and political theorists and political scientists as well as students and scholars of international relations **A Reader in International Relations and Political Theory** Howard L.

Williams, Tony Evans, Moorhead Wright, 1993 This reader has been assembled in response to increasing dissatisfaction among a growing number of international relations scholars with the currently dominant theory of realism as well as in recognition of the large number of newly independent states which are having to write new constitutions and develop foreign relations The book includes excerpts and essays from political theory and international relations which provide a starting point for further study of these subjects It draws together writings representing two distinct traditions and demonstrates their interconnections In political theory excerpts are drawn from classical texts which have an important bearing on problems of international relations In international relations the collection includes essays which have had a seminal influence on the development of this discipline **International Relations and the Limits of Political Theory** Howard

Williams, 2016-07-27 This book shows how the traditional concerns of political theory push it increasingly into the study of international relations This is done first by demonstrating how many of the issues usually dealt with by political theory such as democracy and justice arise within an increasingly global context and secondly by considering how international issues such as colonialism and war are best illuminated by building on the work of political theorists The book suggests that political theory and international relations theory can now both be successfully engaged in as a joint enterprise only

Political Theory and International Relations Charles R. Beitz, 1999-07-01 In this revised edition of his 1979 classic Political Theory and International Relations Charles Beitz rejects two highly influential conceptions of international theory as empirically inaccurate and theoretically misleading In one international relations is a Hobbesian state of nature in which moral judgments are entirely inappropriate and in the other states are analogous to persons in domestic society in having rights of autonomy that insulate them from external moral assessment and political interference Beitz postulates that a theory of international politics should include a revised principle of state autonomy based on the justice of a state's domestic institutions and a principle of international distributive justice to establish a fair division of resources and wealth among persons situated in diverse national societies *Political Theory and International Relations* Charles R. Beitz, 1999

International Relations, Political Theory, and the Problem of Order Nicholas J. Rengger, 2000 This book seeks to offer a general interpretation and critique of both methodological and substantive aspects of International theory

International Relations: Section I. The nature and purpose of international relations theory. Section II.

Idealism and realism Andrew Linklater, 2000 **International Political Theory after Hobbes** R. Prokhovnik, G.

Slomp, 2011-01-05 The idea of international political theory after Hobbes is a timely and lively focus through which to raise key questions about international politics and to set up dialogues between historical political theory and contemporary theories of international relations about the legacy of Hobbes in international politics The move by political theorists towards consideration of the international realm and the consequent blurring of the distinction between domestic and international politics over recent years has been marked In the light of these changes the role of Hobbes in the dominant realist theory of

International Relations requires urgent re examination This book makes an important and distinctive contribution to the argument that international political theory is moving beyond the reading of Hobbes as a founding theorist of the modern state in an inter state system perpetuated by orthodox International Relations The volume brings together a set of internationally respected researchers with an expertise on Hobbes views on international relations in the context of the history of political thought Hobbesian realism and on Hobbes and contemporary international political theory

Theory as Ideology in International Relations Benjamin Martill, Sebastian Schindler, 2020-03-13 Are theoretical tools nothing but political weapons How can the two be distinguished from each other What is the ideological role of theories like liberalism neoliberalism or democratic theory And how can we study the theories of actors from outside the academic world This book examines these and related questions at the nexus of theory and ideology in International Relations The current crisis of politics made it abundantly clear that theory is not merely an impartial and neutral academic tool but instead is implicated in political struggles However it is also clear that it is insufficient to view theory merely as a political weapon This book brings together contributions from a number of different scholarly perspectives to engage with these problems The contributors drawn from various fields of International Relations and Political Science cast new light on the ever problematic relationship between theory and ideology They analyse the ideological underpinnings of existing academic theories and examine the theories of non academic actors such as staff members of international organisations Ecovillagers and liberal politicians This edited volume is a must read for all those interested in the contemporary political crisis and its relation to theories of International Relations
