Gabrielle Palmer

Politics Of Breastfeeding:

The Politics of Breastfeeding Gabrielle Palmer, 2009-04-29 Now fully updated this text explores the political economic and social implications of bottle feeding versus breastfeeding in today's society **The Politics of Breastfeeding** Gabrielle Palmer, 1988 Pandora Issues in Women's Health is a series of investigative books written by women about all aspects of our bodies and health Each book takes into account women's lives in different countries and cultures and challenges conventional assumptions about health issues which affect us all **Ethics and Politics of Breastfeeding** Robyn

Lee, 2018-01-01 Responding to the most widely read breastfeeding manual La Leche League's The Womanly Art of Breastfeeding Robyn Lee's The Ethics and Politics of Breastfeeding explores breastfeeding as an art that must be developed through skillful application of effort and distinguished from a merely natural or physiological process The Ethics and Politics of Breastfeeding challenges the dominant understanding of breastfeeding and cultivates an alternative conception as an ethical embodied practice of the self Drawing on the work of Michel Foucault Emmanuel Levinas and Luce Irigaray Lee develops a new understanding of breastfeeding as an art of living where the practice is reconsidered in the light of ongoing social inequalities *Why the Politics of Breastfeeding Matter* Gabrielle Palmer, 2016-09-15 Pinter and Martin's Why it Matters series offer succinct balanced and evidence based introductions to the topics that affect family life in the 21st century The Politics of Breastfeeding first published in 1988 described how big business and vested interests influence the intimate relationship between mothers and their babies to the detriment of all rich or poor in the West or in the developing world In Why the Politics of Breastfeeding Matter the central ideas of The Politics of Breastfeeding are distilled into a concise form making it the perfect introduction to understanding the complex forces that govern what many think of as a simple choice to breastfeed or not [The Politics of Breastfeeding](#) Jennifer Lucas, 2013 **The Politics of Breast Cancer**

Maureen Hogan Casamayou, 2001-03-26 Between 1990 and 1993 breast cancer activism became a significant political movement The issue began to receive extensive media attention and federal funding for breast cancer research jumped dramatically Describing the origins of this surge in interest Maureen Hogan Casamayou attributes it to the emergence of politically potent activism among breast cancer survivors and their supporters Exploring the creation and development of the National Breast Cancer Coalition NBCC she shows how many of its key leaders were mobilized by their own traumatic experiences with the disease and its treatments Casamayou details the NBCC's meteoric rise and impressive lobbying efforts explaining how in contrast to grassroots movements founded by dedicated individuals the coalition grew from the simultaneous efforts of a network of women who invested their time energy money and professional skills in the fight for increased funding for breast cancer research This multiple leadership or collective entrepreneurialism says Casamayou was crucial to the NBCC's success framing the issue in the minds of the public and policymakers alike **The Politics of Breastfeeding 2009** Gabrielle Palmer, 2003 This work shows that breastfeeding is much more than a matter of personal

inclination Women all over the world are still being tricked into feeding their babies artificially and this affects everyone people s health the environment and the global economy

Gender and Crisis in Global Politics Laura Sjoberg, 2018-02-02 The global political arena is again in a time of crisis Different sources pay attention to different crises the Global Financial Crisis the Debt Crisis the Crisis of ISIL Daesh in Iraq and Syria the Crisis of Israel and Palestine and the Iran Nuclear Crisis have gotten significant attention in media coverage of global politics But those are not the only crises that scholars and practitioners discuss Environmentalists warn of ecological crisis health scholars warn of disease crises cyber security experts suggest a coming information crisis and migration experts warn of population crises Feminist work on global politics has addressed many of these crises historical and contemporary in crisis language and without it as well as a number of the non crises that looking for women and gender in the international arena draws into focus That work however had generally not explicitly theorized the conceptualization of crisis its gendered dimensions and or gender based crises as such Across this book feminist conversations about crisis in global politics suggests that a single feminist approach to definition of or politics of crisis is impossible to find That same variety of work though makes a strong case that paying attention to crises in the world and to the manufacture of crisis rhetoric alongside events in global politics is not only generally important but an important place for feminist scholarship feminist political activism and direct attention This book was previously published as a special issue of the International Feminist Journal of Politics

Naked Politics Brett Lunceford, 2012-06-14 Naked Politics Nudity Political Action and the Rhetoric of the Body by Brett Lunceford examines the rhetorical power of the unclothed body as it relates to protest and political action This study explores what the disrobed body communicates and how others are invited to make sense of this display The actions examined range from grassroots protests to those of professionalized social movement organizations Specifically Lunceford examines PETA and the use of chained women and the Running of the Nudes lactivists or women engaging in public breastfeeding as protest

action in both online and physical space the World Naked Bike Ride s worldwide protest against oil dependency and attempt to raise awareness of the vulnerability of cyclists and a contest held on College Humor that invited women to write their preferred presidential candidate on their exposed breasts and send the picture to them to post on the site Although these actions may seem to have little in common beyond their use of body exposure they all share the notions that something can happen when you take your clothes off and that the act of disrobing can have social and political consequences Moreover these groups illustrate the often paradoxical views of the exposed body by both the participants and the observers and how such bodies operate in the public sphere Even when the voice is silent the body still speaks Naked Politics considers what is being said

Breastfeeding Rights in the United States Karen M. Kedrowski, Michael E. Lipscomb, 2007-12-30 Breastfeeding Rights in the United States shows that the right to breastfeed in this country exists only in a negative sense you can do it unless someone takes you to court Kedrowski and Lipscomb catalog and analyze all the laws policies judicial opinions cultural mores and public attitudes that bear on breastfeeding in America They then explore the classic double bind social norms promulgated by the medical and public health establishment say breast is best but social practices in the workplace and in public spaces make breastfeeding difficult Aggravating the double bind is the prominence of the breast in

American culture as a sexual object The double bind creates coercively structured choices that are incompatible with the meaningful exercise of rights The authors conclude that the solution to this problem requires new theory and new strategy They posit a new democratic feminist theory of the breastfeeding right that is predicated on the following distinctions DT It is not a right to breastfeed but a right to choose to breastfeed DT It is a woman s right to choose not a baby s right to be breastfeed DT It is a right not a duty The authors predict that framing the breastfeeding right in this way provides the basis for a new strategic coalition between breastfeeding advocates and liberal feminists who have historically been wary of one another s rhetoric Breastfeeding Rights in the United States represents an important advance toward policy change

The Politics of Women's Health Care in the United States M. Palley,2014-02-24

In a social and political environment that has become more accepting of gender equity women s health issues have emerged in the forefront of the social policy agenda of the United States The organized women s movement has been successful in many of its endeavors to improve opportunities for women in society in areas such as education business sports and the professions As this book shows they also have been successful in changing the definition of women s health and placing many elements of health care needs on the nation s policy agenda During the late 1960s and early 1970s abortion rights emerged as a central concern for many women s rights activists some of whom took on women s other health issues The Politics of Women s Health Care in the United States shows how the evolution of the women s health agenda has been a reaction to the empowerment of women in the years after the emergence of the contemporary women s movement in 1966 and the subsequent social reconstruction of women from dependent to advantaged population

The Bottle, The Breast, and the State Maureen Rand

Oakley,2015-07-01 The Bottle the Breast and the State The Politics of Infant Feeding in the United States explores the ways in which breastfeeding is both promoted and made difficult in the United States It also examines how the use of formula is often shamed yet encouraged by many standard medical and government practices Using both qualitative and quantitative methods it explores the politics policies and individual experiences surrounding infant feeding Oakley shows that a failure to

separate the issue of breastfeeding rights and support from problematic approaches to breastfeeding advocacy in both academic scholarship and public discourse has led to a deadlock that prevents groups from working together in support of breastfeeding without shaming. Drawing on a feminist ethic of care, Oakley develops a caring infant feeding advocacy. This approach values the caring work done by parents and recognizes the benefits of this work for society. It promotes policies supportive of parenting in general and breastfeeding in particular in order to remove barriers that present a challenge to some women who wish to breastfeed. Caring infant feeding advocacy also works to promote the development of better alternatives for those who do not breastfeed.
