globalized capitalist economies In these economies the role of sponsored Indian expatriate immigrants numbering at least 20 million during the past half century was vitally important Taking the rentier state as the theoretical perspective the author argues that the sponsorship kafala system tended to have a different impact on the Indian expatriates incorporation and promotion of the entrepreneurs and professionals as business elites and the perpetual exploitation of the working classes The book is not only the first ever definitive and comprehensive work on the Indian diaspora in the nine countries of the Gulf region it also stands as the author's final statement on his three odd decades of research and writing on the subject Besides highlighting the role of Indian diaspora the book also profiles all the Gulf based recipients of the Pravasi Bharatiya Samman Awards Bilateral trade investment and political relations between India and individual Persian Gulf states constitute another focus area of the volume The volume will be an interesting read for teachers researchers and policy makers connected with migration and diaspora studies labour studies political economy international relations and geopolitics

Authoritarian Regimes and their Islamist Rivals Miaad A. Hassan, 2024-10-31 This book explores the political trajectories of various countries in the Middle East and North Africa MENA region tracing the shifts in party systems and regime transitions along a model like trajectory that spans from revolutionism to authoritarianism and electoral Islamism Adopting a comparative perspective this book places patterns of party formation and developments in authoritarian and semi authoritarian systems within a historical and regional context It argues that during distinct periods such as the prevalence of nationalism in the 1920s pre independence era the flourishing of pan Arabism in the 1950s and the rise of Islamism in the 1970s ideologies have played a pivotal role in shaping the political landscape While secular nationalism initially wielded a significant influence on political social and cultural change in the MENA region the author argues that political Islam emerged as its primary rival Even as secular leaders in MENA guided their republics through top down reforms to establish a unified national ideology many though not all eventually incorporated Islam to address popular demands This book's key contribution lies in conceptualizing Islamism as a form of dialectical ideology This book offers an in depth analysis of politics party systems and regime transitions in the MENA region It is poised to resonate with students and researchers in political science history and Middle East studies

Barriers to Democracy Amaney A. Jamal, 2009-07-06 Democracy building efforts from the early 1990s on have funneled billions of dollars into nongovernmental organizations across the developing world with the U S administration of George W Bush leading the charge since 2001 But are many such civil society initiatives fatally flawed Focusing on the Palestinian West

Bank and the Arab world Barriers to Democracy mounts a powerful challenge to the core tenet of civil society initiatives namely that public participation in private associations necessarily yields the sort of civic engagement that in turn sustains effective democratic institutions Such assertions tend to rely on evidence from states that are democratic to begin with Here Amaney Jamal investigates the role of civic associations in promoting democratic attitudes and behavioral patterns in contexts that are less than democratic Jamal argues that in state centralized environments associations can just as easily promote civic qualities vital to authoritarian citizenship such as support for the regime in power Thus any assessment of the influence of associational life on civic life must take into account political contexts including the relationships among associations their leaders and political institutions Barriers to Democracy both builds on and critiques the multifaceted literature that has emerged since the mid 1990s on associational life and civil society By critically examining associational life in the West Bank during the height of the Oslo Peace Process 1993 99 and extending her findings to Morocco Egypt and Jordan Jamal provides vital new insights into a timely issue

Moving Beyond the Crisis : Reclaiming and Reaffirming our Common Administrative Space Demetrios Argyriades, Gérard Timsit, 2013-03-14 With the financial meltdown and the economic crisis in their fifth year already no one can any longer be in doubt about their exceptional gravity their truly global impact and their profound effects hurting vulnerable groups and the very poor especially As the world looks for an exit from this economic crisis the worst in eight decades the focus of attention is naturally on the causes the factors that account for its wide reach and severity as well as on strategies that might bring it to a closure The quest for exit strategies is at the very centre of the issues and concerns explored in the present volume produced by the IIAS Like the preceding volumes but even more emphatically this volume representing a collective endeavour of scholars and practitioners from many parts of the globe finds cause to lay the blame for our difficult predicament on the institutional deficit the policies the practices and values that have followed in the trail of a highly misleading and erroneous model of governance The Market Model of Governance as it is known sought to reform the structures and culture of administration and government in private sector ways While instrumental values like efficiency and effectiveness were raised and praised profusely those of democratic governance were discounted by comparison In particular integrity the rule of law and due process equity legality and public service professionalism suffered a steep decline in several parts of the world Likewise the invasion and the capture of public space inevitably led to an unprecedented surge of greed abuse and corruption that contributed directly to the crisis which is upon us Looking for exit strategies as its title aptly suggests the present volume offers a rich menu of ideas drawn from the current experience of all the world s main regions Not surprisingly two concepts stand out throughout the book as necessary

correctives as well as pressing remedies to the world's ongoing malaise. They call for the recapture of our common administrative space and the reaffirmation of the values and virtues appropriate for democratic governance. To the IIAS, none perhaps are more important than public service professionalism and none other can contribute more effectively to the reform and consolidation of sound institutions for national, sub-national, global and regional governance. For these reasons, at this juncture, the new volume like the others should be featured in every public library and become a vademecum of all scholars and practitioners of public administration and politics around the world.
