Medicinal Product Liability and Regulation Richard Goldberg, 2014-07-18 The piecemeal developments in product liability reform in Europe have their origins in the tragic association of phocomelia in children with thalidomide in 1962 In many ways these events have continued to generate pressure for reform of product liability especially for the victims of drug induced injury This monograph attempts to address the major problems that typify claims for drug induced injury as well as highlighting the complex interrelationship between liability exposure and drug regulation While medicinal products are subject to strict liability under the product liability directive the claimant may have considerable difficulty in establishing that the relevant product is defective and that it caused the damage It may also be necessary to overcome the development risk defence where this is pleaded The monograph addresses these problems on a comparative jurisprudential basis and seeks to determine whether medicinal products should be treated as a special case in the field of product liability It examines the role of epidemiological evidence in assessing causation in product liability cases concerning medicinal products in the light of recent developments in the UK Supreme Court the United States Canada and France In particular it addresses the difficulties in reconciling the standards of proof in law and science including the theory that causation can be proved on the balance of probabilities by reference to the doubling of risk of injury An important case study compares and contrasts the approaches of the UK and the US to the measles mumps rubella Litigation The book also examines the question as to whether compliance

with regulatory standards should protect pharmaceutical manufacturers from product liability suits It seeks to support a via media whereby the victims of drug induced injury can receive justice while at the same time encouraging drug safety and innovation in drug development

PRODUCT LIABILITY Helmut Koziol,Michael D. Green,Mark Lunney,Ken Oliphant,Lixin Yang,2017-11-07 Where products develop ever more rapidly the law may face difficulties in responding accordingly to new security threats which may arise In the field of product liability an extraordinary need for legal development has thus been perceived with legislators and judges feeling compelled to find new solutions and to look across borders for these In the detailed reports in this book the World Tort Law Society proves that it is in an ideal position to examine the most significant concepts The report on North America studies the special regime for product liability from its origin in the case law of the US the European report is centred around the EU Product Liability Directive with its merits and faults and the influence of these two systems as well as new answers are shown in the reports on Asia Russia and four key jurisdictions in the rest of the world Similar questions are discussed worldwide How can a strict liability regime for products be justified and can it be justified in all cases How does the special regime relate to general rules of tort law Should services be subject to a similar regime The Members of the Society seek to provoke thought for solutions to these pervasive problems In this spirit the volume s comparative conclusions invite discussion and the book includes four responses to that call from eminent tort lawyers from different legal backgrounds

The Liability Maze Peter W. Huber,Robert E. Litan,2010-12-01 With an ever increasing number of liability lawsuits are corporations electing to play it safe rather than risk the uncertainties accompanying innovation In The Liability Maze experts address the issues surrounding

safety and innovation and present the most detailed and comprehensive study to date on the actual impact of U S liability law In recent decades it has been widely assumed that liability laws promote safety by significantly raising the price companies must pay for negligence product defects and accidents More recently others have suggested that the broad and unpredictable sweep of these laws actually deters innovation The risks of lawsuits are so great that corporations are showing more caution in product innovation than ever before The contributors focus on five sectors of the economy where the liability system appears to have had the greatest effects positive or negative the private aircraft automobile chemical and pharmaceutical industries and the medical profession They suggest that in many sectors liability law has hampered innovation In others it has stimulated safety improvements although perhaps not so much as vigilant safety regulations
