Algo Bots and the Law Gregory Scopino,2020-10-15 The trillion dollar markets for futures swaps

commodity options and related derivatives are extremely important to the global economy because among other things they

influence the prices that people pay for everything from heating oil and bread to the interest rates connected to mortgages

and student loans Due to technological advances in automation and artificial intelligence these markets have recently

undergone a dramatic transformation away from human centered trading and operations to control by high speed automated

systems In this work Gregory Scopino explains how such changes present challenges to the oversight of these markets and

discusses potential ways for authorities to address issues presented by computerized trading and related systems This book

should be read by anyone interested in learning how artificial intelligence is used in the financial markets and how those markets are and should be regulated
