Shadows and Enlightenment Michael Baxandall,2017 Shadows are holes in light We see them all the time and sometimes we notice them but their part in our visual experience of the world is mysterious In this book an eminent art historian draws on contemporary cognitive science eighteenth century theories of visual perception and art history to discuss shadows and the visual knowledge they can offer Michael Baxandall begins by describing the physical constitution and different varieties of shadows He then sketches the eighteenth century empirical nativist debate on the role of shadows in the perception of shape Next he surveys modern research by cognitive scientists and machine vision workers explaining how research is divided on the issue of how far and by what means shadows help or hinder perception of shape Baxandall continues his exploration by recounting a neglected episode of shadow theory the observations of a group of mid eighteenth century French scientists and artists on shadows as related to light and space Finally he sets these various shadow universes into relation with each other addressing the special problem of painting shadows and analyzes Chardin s painting The Young Draughtsman in which shadow painting is both medium and theme The book includes an appendix that situates and summarizes the shadow system of Leonardo da Vinci which has had a strong though partly underground influence on thinking about shadows for five hundred years Publisher s description **Grasping Shadows** William Chapman

Sharpe,2017-08-04 Grasping Shadows offers the most thorough examination of the cultural uses of shadows Exploring a myriad of major literary and artistic evocations of shadows Grasping Shadows puts forth a unifying theory for how shadows function and how they transformed our relationship to darkness and light **Shadows** Roberto Casati,2004-08-10 In this original wide ranging and endlessly thought provoking work of popular nonfiction a leading science writer uncovers the pervasive presence of shadows in our world For Plato shadows were the symbol of our limitations For Galileo they knocked the Earth from the center of the cosmos They are a source of fear and a symbol of ignorance and they loom large in art and design mythology and folklore physics and metaphysics and architecture and urban planning From shadows puppets and the psychology of shadows to the role of shadows in astronomy and the influence of shadows on the architectural profiles of our cities Roberto Casati awakens our fascination in this tour de force of investigation and imagination **Shades of Meaning:**

Shadows in Medieval Manuscript Illumination Dominique DeLuca,2025-03-27 Are there shadows in medieval art Studies on the role of shadows in art history have either glanced over or ignored the medieval period yet people of the Middle Ages certainly saw and thought about shadows and recorded their ideas about these phenomena in texts and images This book

examines references to shadows in science religion and folklore of the Middle Ages Through the lens of fifteenth century manuscript painting it investigates visual metaphorical and supernatural shadows in art to discover what shadows meant to the medieval viewer

Ethics and Politics in Contemporary Theory Between Critical Theory and Post-Marxism Mark Devenney, 2004-02-24 In addressing the political and theoretical debates between critical and post Marxist theorists this book discusses the politics of communication and rationality subjectivity sovereignty ethics and deliberative democracy considering questions such as Does the theory of communicative action justify deliberative democracy Is a theory of hegemony compatible with an account which relies upon an ideal of communicative success Is autonomy a good which should be fostered Can the ideal of democracy extend beyond the nation state Does post Marxism have anything interesting to say about ethics Analysing the work of Ernesto Laclau and Jürgen Habermas as representatives of different choices made in regard to theory politics and morality Ethics and Politics in Contemporary Theory develops a critical response to the contrasting conclusions of these approaches

The Philosopher's Gaze David Michael Kleinberg-Levin, 1999 This collection of essays presents an ongoing exploration of the moral character and enlightenment potential of vision It examines texts by Descartes Husserl Wittgenstein Nietzsche Heidegger Benjamin Merleau Ponty and Levinas

The Fruits of the Struggle in Diplomacy and War Ahmad ibn al-Mahdi al-Ghazzal, 2016-11-23 In 1766 the Moroccan ambassador Ahmad ibn al Mahdi al Ghazzal embarked on an unprecedented visit to Spain during a time of eased tensions between the two countries The sultan Sidi Muhammad ibn Abdallah wanted the return of Muslim prisoners and sacred Islamic texts while the Spanish king hoped to improve trade and security across the Strait of Gibraltar With royal welcome and escort al Ghazzal traveled for several months in order to meet with Carlos III at his summer palace north of Madrid There they negotiated a historic treaty and then the Moroccan ambassador made his way back to Marrakesh where the treaty was ratified in the presence of the Spanish ambassador Jorge Juan and hundreds of freed Muslim captives In total the trip lasted a year and covered more than fifty Spanish cities and towns Most remarkable however is the fact that al Ghazzal's travelogue in which he recorded the experience in great detail and moving prose has been lost to history This first full translation with critical introduction recovers his voice It offers insight into the dawn of modern diplomacy and its overlap with literature it looks at eighteenth century Europe through Arab eyes and it explores the deep nostalgia that the Islamic past of Andalusia provoked for a Moroccan traveler who traced his family ties to exiles of the region Finally al Ghazzal's visit has further significance as the neglected backdrop to one of Spain's most canonical eighteenth century works the Moroccan Letters of José Cadalso Thus the world literature approach of the present introduction also reimagines the pluralism of Cadalso's foreign gaze through the encounters of the actual ambassador in his own words

Animating the Antique Sarah Betzer, 2022-01-28 Framed by tensions between figural sculpture experienced in the round and its translation into two dimensional representations *Animating the Antique* explores enthralling episodes in a history of artistic and aesthetic encounters Moving across varied locations among them Rome Florence Naples London Dresden and Paris Sarah Betzer explores a history that has yet to be written that of the Janus faced nature of interactions with the antique by which sculptures and beholders alike were caught between the promise of animation and the

threat of mortification Examining the traces of affective and transformative sculptural encounters the book takes off from the decades marked by the archaeological art historical and art philosophical developments of the mid eighteenth century and culminates in fin de siècle anthropological psychological and empathic frameworks It turns on two fundamental and interconnected arguments that an eighteenth century ontology of ancient sculpture continued to inform encounters with the antique well into the nineteenth century and that by attending to the enduring power of this model we can newly appreciate the distinctively modern terms of antique sculpture's allure As Betzer shows these eighteenth century developments had far reaching ramifications for the making and beholding of modern art the articulations of art theory the writing of art history and a significantly queer Nachleben of the antique Bold and wide ranging Animating the Antique sheds light upon the work of myriad artists in addition to that of writers ranging from Goethe and Winckelmann to Hegel Walter Pater and Vernon Lee It will be especially welcomed by scholars and students working in eighteenth and nineteenth century art history art writing and art historiography

Expanding Fields of Architectural Discourse and Practice Matthew Butcher, Megan O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art
